Servitization and Physical Asset Management Michael John Provost,2018-12-31 *Servitization and Physical Asset Management*, third edition, was developed to provide a structured source of guidance and reference information on the business opportunities linked to servitization and the management of physical assets. A growing trend in the global economy, servitization focuses on the actual deliverables of an asset from the perspective of the customer: electricity instead of the power plant, thrust instead of the engine, mobility instead of a plane or a car. The book offers high-level overviews of how to servitized and manage assets from a variety of perspectives, reviewing nearly 1,500 books, magazine articles, papers and presentations and websites. Written by Michael J. Provost, Ph.D., and a subject matter expert in modeling, simulation, analysis and condition monitoring, *Servitization and Physical Asset Management*, third edition, is an invaluable reference to those considering providing asset management services for the products they design and manufacture. It is also meant to support middle management wishing to know what needs to be done to look after the assets they are responsible for and who to approach for help, and academics doing research in this field. Michael Provost, is a British engineer with a doctoral degree in thermal power from Cranfield University.

Austin's Way with Skepticism Mark Kaplan,2018-07-04 J. L. Austin is famous for writing as if he thought it a condition, on the adequacy of what we say while doing epistemology, that it accord faithfully with what we would say in ordinary circumstances. A durable consensus formed after Austin's death that his pursuit of epistemology faithful to 'ordinary language' was fundamentally misguided. While critics saw his methods as resulting from a failure properly to understand the nature of the epistemologist's project, Mark Kaplan argues that this consensus arose from a misreading of Austin. In *Austin's Way with Skepticism: An Essay on Philosophical Method*, he sets out his stance that both the condition of adequacy to which Austin was committed and his reason for being committed to it, have been misunderstood by his critics. Starting by carefully analysing what Austin said about knowledge in 'Other Minds,' examining the response to skeptical arguments, and taking seriously the methodological remarks Austin scattered in his corpus, Kaplan demonstrates that Austin's methods were not born of a misunderstanding of the project of epistemology. Rather, Austin was a powerful critique of how that project has been conceived though was not against epistemological theorizing itself. Kaplan concludes that Austin understood himself to be offering substantive answers to key epistemological questions and defending a way of doing epistemology that is fully capable of

providing these important answers.

Manufacturing Civil Society T. Brandsen, W. Trommel, B. Verschuere, 2014-05-07 Faced with falling social cohesion governments have sought to revitalise society by trying to reconstruct local communities, civil society and citizenship. As a result, civil society is increasingly brought within the realm of public management, subject to accountability and embedded in hierarchies the impact and origins of which this book explores

Compact NMR Bernhard Blümich, Sabina Haber-Pohlmeier, Wasif Zia, 2014-08-22 The goal of this book is to provide an introduction to the practical use of mobile NMR at a level as basic as the operation of a smart phone. Each description follows the same didactic pattern: introduction, basic theory, pulse sequences and parameters, beginners-level measurements, advanced-level measurements, and data processing. Nuclear Magnetic Resonance (NMR) spectroscopy is the most popular method for chemists to analyze molecular structures while Magnetic Resonance Imaging (MRI) is a non-invasive diagnostic tool for medical doctors that provides high-contrast images of biological tissue depicting the brain function and the beating heart. In both applications large super-conducting magnets are employed which magnetize atomic nuclei of an object positioned inside the magnet. Their circulating motion is interrogated by radio-frequency waves. Depending on the operating mode, the frequency spectrum provides the chemist with molecular information, the medical doctor with anatomic images, while the materials scientist is interested in NMR relaxation parameters, which scale with material properties and determine the contrast in magnetic resonance images. Recent advances in magnet technology led to a variety of small permanent magnets, by which NMR spectra, images, and relaxation parameters can be measured with mobile and low-cost instruments.

Privacy, Due Process and the Computational Turn Mireille Hildebrandt, Katja de Vries, 2013-06-03 Privacy, Due process and

the Computational Turn: The Philosophy of Law Meets the Philosophy of Technology engages with the rapidly developing computational aspects of our world including data mining, behavioural advertising, iGovernment, profiling for intelligence, customer relationship management, smart search engines, personalized news feeds, and so on in order to consider their implications for the assumptions on which our legal framework has been built. The contributions to this volume focus on the issue of privacy, which is often equated with data privacy and data security, location privacy, anonymity, pseudonymity, unobservability, and unlinkability. Here, however, the extent to which predictive and other types of data analytics operate in ways that may or may not violate privacy is rigorously taken up, both technologically and legally, in order to open up new possibilities for considering, and contesting, how we are increasingly being correlated and categorized in relationship with due process – the right to contest how the profiling systems are categorizing and deciding about us.

In-situ Electron Microscopy Gerhard Dehm, James M.

Howe, Josef Zweck, 2012-05-29 Adopting a didactical approach from fundamentals to actual experiments and applications, this

handbook and ready reference covers real-time observations using modern scanning electron microscopy and transmission electron microscopy, while also providing information on the required stages and samples. The text begins with introductory material and the basics, before describing advancements and applications in dynamic transmission electron microscopy and reflection electron microscopy. Subsequently, the techniques needed to determine growth processes, chemical reactions and oxidation, irradiation effects, mechanical, magnetic, and ferroelectric properties as well as cathodoluminescence and electromigration are discussed.

Uncommon Prose Dianne Claire Charpentier,2012-11

Uncommon Prose defined: Poems, Quotes, and Soul Antidotes is Dianne's first book. It is a compilation of much of Dianne's life lessons presented as poetry (uncommon prose). In this book, she offers her musings of this world through her honest eyes and pen. Also included are her own quoted observations as a co-participant in humankind. Lastly, her Soul Antidotes are written in the true form of prose. The themes of this book are life based right from the heart, as Dianne engages both common and uncommon prose for the art and pleasure of it. This writing endeavor has been instrumental as a means to decipher the deeper meanings in life, perhaps for many of us. It involves love, loss, friendship, faith, hope, and the expansion of soul. May it be both entertaining and enlightening to you and your life experience as you go along for the read. An excerpt from the book: I Feel; Therefore, I Know I Am And my pen wrote: Although the step before me is not yet known, I feel my feet on my path. I know I am on my path. I saw a mother holding her new baby in her arms; I felt love. Although I

am neither mother nor baby, I feel love. I know love. I saw a man crying on the bus, so deep was his pain. I know not the source of his sorrow, yet I felt his pain. I know pain. Walking, I saw a tree dancing in the wind; it motioned, dance with me. I did not hear the invitation; I felt it. And together we danced. Are these mere memories or something deeper shared by all humankind in the kingdom outside the mind?
