Music and Video Streaming Carla Mooney, 2015-12-15 This succinct title breaks down the complex mechanisms behind audio and video streaming and explains them in terms a middle-school-aged audience can understand. This volume introduces the concept of streaming and then explains how it works and what its uses are. Along the way, important digital terminology and concepts are introduced, such as bandwidth, codecs, plugins, and protocol. A discussion of Internet safety and how to produce and share streaming content wraps up this enlightening text.

Video Marketing Made Simple For Business Owners Raymond Wayne, 2020-09-18 Video Marketing is literally on fire! Embrace the Power and Potential of Video Marketing And use this medium to catapult your web business to the next level. Check out on “ Video Marketing Made Simple For Business Owners ” Finally, you have this once in lifetime opportunity to get your hands on the video marketing tools & Strategies that are generating million dollar revenues . Businesses invest a lot of time determining who their target demographic is, and for good reason. When a business knows which demographic is buying and using their product, it’s going to be easier to market to that demographic. Middle-aged women are going to respond to ads differently than millennials; and what one group finds engaging and interesting, another may not. So it’s important for businesses to understand what demographic they are targeting so they get the marketing just right for them. But, businesses don’t have to go to such trouble when they’re using video marketing because video marketing reaches every demographic and is interesting to every demographic. And this is because men and women, and people of every age, love video. As long as it’s interesting and creative, people will like a video regardless of their background or history. This can be a bonus for businesses that know who their demographic is, simply because more people will share it and like it, even if they don’t make up part of the business’ demographic. But it’s also especially good news for businesses with a shifting demographic, or for those that don’t know how makes up their demographic. That happens sometimes when a business changes directions or changes their product or service slightly, and then they have to start back at square one with their marketing efforts. But when a business has already created videos as part of their marketing plan, they don’t have to change a thing because those videos will already be suitable for every demographic. Imagine one type of marketing that appeals to every single demographic. It seems too good to be true, but it’s not. That type of marketing is video marketing, and reaching every demographic is just one very good reason why every business should be investing in it.

Foundation ActionScript 3 Paul Milbourne, Darren Richardson, 2014-12-02 ActionScript 3 is a full-fledged programming language, with complete object-oriented capabilities, event handling, sound and video support, drawing capabilities, support for regular expressions, and much more. Whether you are just starting out on the road to computer programming and animation or an experienced developer who wants to learn a new language, you’ll find all you need to know in Foundation ActionScript 3. Starting with the fundamentals, you’ll learn how to add interactivity to your Flash movies by using ActionScript objects, manipulating sound and video, and harnessing the power of regular expressions and XML. The book concludes with two case studies to consolidate what you’ve learned and introduce some additional advanced techniques. You’ll gain a solid understanding of the exciting world of ActionScript 3 and see how everything fits together, so you’ll be able to build your own professional applications. The sensible layout of the book makes it easy to find information about specific techniques. It focuses on the essential skills that will enable you to get up and running quickly. With this book as your guide, you’ll be creating killer Flash applications before you know it.

Computational Vision and Robotics Ishwar K. Sethi, 2015-01-03 Computer Vision and Robotic is one of the most challenging areas of 21st century. Its application ranges from Agriculture to Medicine, Household applications to Humanoid, Deep-sea-application to Space application, and Industry applications to Man-less-plant. Today’s technologies demand to produce intelligent machine, which are enabling applications in various domains and services. Robotics is one such area which encompasses number of technology in it and its application is widespread. Computational vision or Machine vision is one of the most challenging tools for the robot to make it intelligent. This volume covers chapters from various areas of Computational Vision such as Image and Video Coding and Analysis, Image Watermarking, Noise Reduction and Cancellation, Block Matching and Motion Estimation, Tracking of Deformable Object using Steerable Pyramid Wavelet Transformation, Medical Image Fusion, CT and MRI Image Fusion based on Stationary Wavelet Transform. The book also covers articles from applications of soft computing techniques such as Target Searching and Tracking using Particle Swarm Optimization, PSO-based Functional Artificial Neural Network, etc. The book also covers article from the areas of Robotics such as Solar Power Robot Vehicle, Multi Robot Area Exploration, Intelligent Driving System based on Video Sequencing, Emotion Recognition using MLP Network, Identifying the Unstructured Environment.

Succeed with Social Media Like a Creative Genius Brainard Carey, 2019-07-02 How to Build a Following, Make Authentic Connections, and Promote Your Work Whether you’re an artist or craftsman selling your work, the owner of a small start-up hoping to network, or just looking for a more meaningful social media experience, this is the book for you. Brainard Carey draws from his experience and interviews with others to show creative people how to make the most of their time on outlets like Twitter, Facebook, and Instagram. Chapter topics include: Building a following Maintaining an authentic image Creative ways to share information Using social media to earn a living And much more With chapters focusing on practical how-tos and real-world examples, Succeed with Social Media Like a Creative Genius™ provides readers with both instructive and demonstrative lessons in making the most of their online presence. Everyone can do it with the right tools, and Carey offers an insider's guide to an otherwise daunting process. This book will awaken and nurture the creative genius in everyone.

Programming Flash Communication Server Brian Lesser, Giacomo Guilizzoni, Joey Lott, Robert Reinhardt, Justin Watkins, 2005-02-22 With the advent of Flash Communication Server MX (FCS), Macromedia believes that it's on the edge of a breakthrough in how people think about the Internet. FCS has been designed to provide web developers with the means to add polished interactive audio and video features to their sites, the sort of features that users have come to expect. Naturally, the process of efficiently integrating rich media into applications, web sites, and web content is a complex one, to say the least. That's where Programming Flash Communication Server factors in. As the foremost reference on FCS, it helps readers understand how FCS can facilitate: Video on demand Live webcasts Video chat and messaging Shared desktop conferences Live auctions Interactive whiteboard presentations Workflow collaboration Multi-user games Programming Flash Communication Server not only explains how to use the pre-built FCS components to construct a simple application, it also explains the architecture so that developers can program custom components to make even more advanced applications. In addition, the book explains how to truly optimize performance, and talks about considerations for networked applications as well as the media issues pertaining to FCS. Programming Flash Communication Server gives developers a sorely needed leg up on this potentially intimidating technology. It lets users develop cool web applications ranging from direct dating experiences with real-time video, to pre-recorded corporate presentations, to news services with video and audio, and much more. At last, the ability to build web sites with rich interactive features--minus the complex downloads and installation hassles--is a reality. And now, with Programming Flash Communication Server from O'Reilly by your side, you can do more quickly and easily than you ever dreamed possible.

Signal Processing for 5G Fa-Long Luo, Charlie Jianzhong Zhang, 2016-08-04 A comprehensive and invaluable guide to 5G technology, implementation and practice in one single volume. For all things 5G, this book is a must-read. Signal processing techniques have played the most important role in wireless communications since the second

generation of cellular systems. It is anticipated that new techniques employed in 5G wireless networks will not only improve peak service rates significantly, but also enhance capacity, coverage, reliability, low-latency, efficiency, flexibility, compatibility and convergence to meet the increasing demands imposed by applications such as big data, cloud service, machine-to-machine (M2M) and mission-critical communications. This book is a comprehensive and detailed guide to all signal processing techniques employed in 5G wireless networks. Uniquely organized into four categories, New Modulation and Coding, New Spatial Processing, New Spectrum Opportunities and New System-level Enabling Technologies, it covers everything from network architecture, physical-layer (down-link and up-link), protocols and air interface, to cell acquisition, scheduling and rate adaption, access procedures and relaying to spectrum allocations. All technology aspects and major roadmaps of global 5G standard development and deployments are included in the book. Key Features: Offers step-by-step guidance on bringing 5G technology into practice, by applying algorithms and design methodology to real-time circuit implementation, taking into account rapidly growing applications that have multi-standards and multi-systems. Addresses spatial signal processing for 5G, in particular massive multiple-input multiple-output (massive-MIMO), FD-MIMO and 3D-MIMO along with orbital angular momentum multiplexing, 3D beamforming and diversity. Provides detailed algorithms and implementations, and compares all multicarrier modulation and multiple access schemes that offer superior data transmission performance including FBMC, GFDM, F-OFDM, UFMC, SEFDM, FTN, MUSA, SCMA and NOMA. Demonstrates the translation of signal processing theories into practical solutions for new spectrum opportunities in terms of millimeter wave, full-duplex transmission and license assisted access. Presents well-designed implementation examples, from individual function block to system level for effective and accurate learning. Covers signal processing aspects of emerging system and network architectures, including ultra-dense networks (UDN), software-defined networks (SDN), device-to-device (D2D) communications and cloud radio access network (C-RAN).

Digital Culture & Society (DCS) Ramón Reichert, Annika Richterich, Pablo Abend, Mathias Fuchs, Karin Wenz, 2016-12-31 »Digital Culture & Society« is a refereed, international journal, fostering discussion about the ways in which digital technologies, platforms and applications reconfigure daily lives and practices. It offers a forum for critical analysis and inquiries into digital media theory and provides a publication environment for interdisciplinary research approaches, contemporary theory developments and methodological innovation. The third issue »Politics of Big Data« edited by Mark Coté, Paolo Gerbaudo, and Jennifer Pybus, critically examines the political and economic dimensions of Big Data and thus details its contestation. The contributions focus on the materialities and processes which manifest Big Data and explore forms of value beyond the state and capital. These range from open data initiatives, social media metrics, machine learning algorithms, data visualisation to data dashboards, critical data analysis, and new modes of data action research and practice.

Producing Online News Ryan Thornburg, 2010-10-27 Buy your copy now and pay only \$5 for shipping!* (Use code C9BRGG when checking out. Applies only to orders in the US/Canada.) Follow the author's blog at <http://www.producingonlinenews.com>! The dazzling speed of change in online journalism can mask a simple truth: online news is still news. Cutting-edge technology benefits the audience only when journalists apply it in the service of good stories. Building on a foundation of news stories, Producing Online News shows students how to use the right tools to get the right information to the right people at the right time. The goal is to become a full-fledged online news producer and transform stories into a complete news experience for an ever more demanding audience. Ryan Thornburg, a journalism trainer who has managed the websites of top news organizations, hones the skills students need to produce stories using multimedia, interactivity and on-demand delivery- online journalism's three pillars. Practical instructions show students not just how to use the tools but also how to make good journalistic choices in applying them. The book works for courses specifically in online journalism or for any journalism course that incorporates multiple platforms. Features that make for stronger stories: TOOLS sections walk students through the latest technology- Twitter, Wordpress, Audacity, Caspio, Dipity and more- so their writing gains more immediacy and impact. Real-world examples from both traditional outlets and new-style sites like ProPublica, PolitiFact, BeliefNet and Global Voices showcase journalists connecting with their audiences. View Source boxes uncover the technology behind a specific news project- for example, how do just five editors at Yahoo News publish 2,000 stories a day? News Judgement boxes explore journalistic choices- sure, students can link a story to anything on the web- but should they?

No experience required in this step-by-step guide to website design and development Presents the important techniques you need to learn in easy-to-follow examples Takes the confusion out of languages, technologies, and all the important elements of the development process

ITEI 2022 Azah Kamilah Draman, Nadeem Akhtar, Mohd. Faizal Abdollah, 2023-06-14 This volume contains the papers presented at the 2nd International Conference on Internet Technology and Educational Informatization (ITEI 2022), held during December 23th-25th, 2023 in Harbin, China. Today, the rapid development in Internet and education technology poses new challenges to scientists that requires innovative approach and methodology or eventually new educational theories. Internet technology is the prerequisite for educational informatization to be realized. The specific Conference topics include: Artificial Intelligence in Education; User Interfaces and Human Computer Interaction; Distance Education for Computers; Computer Application in Social and Behavioural Sciences; Pedagogy Enhancement with E-Learning; Accessibility to Disabled Users; etc. Also, the Conference is intended to give students and research groups the opportunity to learn more about Internet Technology and Educational Informatization as an important tool in their applications and development. There were about 150 participants from countries all over the world attended the conference and they attended the presentations by scholars representing both institutes and academia. The scientific program consisted of in total 5 talks as well as many oral and poster presentations. Five talks were invited keynote speakers given by Pun Chi Man (University of Macau, China), Yongjun Feng (Shaanxi Normal University, China), Philippe Fournier-Viger (Shenzhen University, China), Rafidah Md Noor (Universiti Malaya, Malaysia) and Khe Foom HEW (The University of Hong Kong, China). Titles included Privacy Protection in Video Live Streaming, Research of Education Metaverse and Metaverse Education—Take E-Course Explosion as the Center, Advances and Challenges for the Discovery of Interesting Patterns in Network and Educational Data, The Rise of Mobile and Internet Technology in Higher Education and Remote Learning, and Engaging Students in Online Learning Activities Using Chatbots.

HTML5 Mobile Websites Matthew David, 2013-05-02 Build HTML5-powered mobile web experiences with the aid of development frameworks that speed the development of Native App-like experiences. Build on your foundation of HTML and JavaScript with a complete understanding of the different mobile Web browser technologies. You get carefully detailed techniques that are illustrated in full color so you can leverage the Web technologies unique to each mobile browser, apply frameworks such as Sencha Touch to rapidly build out your designs, and design techniques expressly suited for tablet devices. Business Models for Sustainable Telecoms Growth in Developing Economies Sanjay Kaul, Dr. Fuaad Ali, Dr. Subramaniam Janakiram, Dr. Bengt Wattenstrom, 2008-04-30 A little more than 3 billion people have access to basic mobile telephony, with 48% living close to or below the poverty line. These people, the so-called 'mass market', lack access to basic communicationstechnology. An ongoing issue facing communications providers is how to

facilitate and promote communications access to those who live in rural areas of developing economies. The authors utilize their considerable ‘hands on’ experience of working in successful telecommunications companies in order to address the challenges of creating, facilitating and maintaining sustainable telecommunications growth in developing nations. With this focus in mind the authors present a snapshot of these countries through real life case studies. Sustainable Telecoms Growth in Developing Economies: Presents innovative and sustainable business models to address telecommunications adoption in developing countries. Identifies the inherent drivers and barriers in the mass-market adoption of mobile services in developing economies. Discusses the impact and importance of telecoms in developing nations including customer needs and Internet-based services. Highlights the current state of communications in such markets. Includes real-world case studies and interviews with telecoms CEOs from all over the world. The author team provides decision makers, professionals, and application developers in IT, telecommunications and media with a thorough understanding of the current state and future evolution of sustainable telecommunications in developing countries. The book will also be of interest to advanced students in electrical engineering and telecommunications, analysts, and consultants with an interest in growing economies.

Mobile Video with Mobile IPv6 Daniel Minoli,2012-07-30 Increased reliance on mobile devices and streaming of video content are two of the most recent changes that have led those in the video distribution industry to be concerned about the shifting or erosion of traditional advertising revenues. Infrastructure providers also need to position themselves to take advantage of these trends. Mobile Video with Mobile IPv6 provides an overview of the current mobile landscape, then delves specifically into the capabilities and operational details of IPv6. The book also addresses 3G and 4G services, the application of Mobile IPv6 to streaming and other mobile video outputs, and closes with a chapter on future directions.

Advances in Network Systems Maciej Grzenda, Ali Ismail Awad, Janusz Furtak, Jarosław Legierski,2016-12-24 This book provides the reader with a comprehensive selection of cutting-edge algorithms, technologies, and applications. The volume offers new insights into a range of fundamentally important topics in network architectures, network security, and network applications. It serves as a reference for researchers and practitioners by featuring research contributions exemplifying research done in the field of network systems. In addition, the book highlights several key topics in both theoretical and practical aspects of networking. These include wireless sensor networks, performance of TCP connections in mobile networks, photonic data transport networks, security policies, credentials management, data encryption for network transmission, risk management, live TV services, and multicore energy harvesting in distributed systems.
