Streams in the Desert Charles E. Cowman, Mrs.,L. B. E. Cowman,2006-10 Few books ever attain such a widespread recognition and perennial appeal as Streams in the Desert. Now over seventy years since its first publication, this marvelous devotional by Mrs. Charles E. Cowman has established itself firmly in the ranks of the Christian classics. Written from Mrs. Cowman's rich experiences with life, from its dry wastelands to its well-watered gardens, Streams in the Desert is a legacy of faith and wisdom that is time-tested faithfully to the One who alone can slake their spiritual thirst. In the midst of today's fast-paced world, the wisdom of Streams in the Desert remains refreshing, relevant and trustworthy. Turn to it daily, tune out the clamor of living, and let these prayerful writings inspire fresh hope, confidence, and a deep awareness of God's presence in your life.

Scalable Continuous Media Streaming Systems Jack Lee,2005-11-01 Continuous media streaming systems will shape the future of information infrastructure. The challenge is to design systems and networks capable of supporting millions of concurrent users. Key to this is the integration of fault-tolerant mechanisms to prevent individual component failures from disrupting systems operations. These are just some of the hurdles that need to be overcome before large-scale continuous media services such as video-on-demand can be deployed with maximum efficiency. The author places the subject in context, drawing together findings from the past decade of research whilst examining the technology's present status and its future potential. The approach adopted is comprehensive, covering topics - notably the scalability and fault-tolerance issues - that previously have not been treated in depth. Provides an accessible introduction to the technology, presenting the basic principles for media streaming system design, focusing on the need for the correct and timely delivery of data. Explores the use of parallel server architectures to tackle the two key challenges of scalability and fault-tolerance. Investigates the use of network multicast streaming algorithms to further increase the scalability of very-large-scale media streaming systems. Illustrates all findings using real-world examples and case studies gleaned from cutting-edge worldwide research. Combining theory and practice, this book will appeal to industry specialists working in content distribution in general and continuous media streaming in particular. The introductory materials and basic building blocks complemented by amply illustrated, more advanced coverage provide essential reading for senior

undergraduates, postgraduates and researchers in these fields.

Web-Empower Your Church Mark Stephenson, 2010-09-01 A great church website is more about ministry than technology. Web-Empower Your Church offers step-by-step guidance to web implementers and other church leaders who are on the exciting journey to building an effective web ministry. Mark's engaging, conversational style makes technology accessible. He offers first-hand advice on every aspect of building an internet ministry: from assembling a team to designing and maintaining the website to adding powerful ministry features. A first-hand account from one of the true pioneers of online ministry. Anyone interested in online ministry ought to read this book and learn from Mark's example. Andrew Careaga Author, eMinistry: Connecting with the Net Generation A clear picture on the do's and don'ts of web ministry for churches. A must read for churches who want to effectively engage in web ministry. Walt Wilson Founder and Chairman, Global Media Outreach, a ministry of Campus Crusade for Christ Stephenson has truly unleashed the power of internet ministry for your church. If you're looking for a readable and educating book on web-empowered ministry, look no further. This book is it. I can't believe how much I learned from my first reading. I will be returning to the book over and over. Bill Easum President, Easum, Bandy & Associates Mark Stephenson is Director of CyberMinistry and Technology of Ginghamburg Church, Tipp City, Ohio. He started the Ginghamburg CyberMinistry back in 1996 as an unpaid servant. Over the years, as the ministry grew, Mark joined the Ginghamburg staff, first part time and then full time. Currently, Ginghamburg Church has one of the largest and most innovative church internet ministries in the world, and the ministry remains unpaid-servant based and "home grown" (no outside companies or consultants have been hired). The website has received national acclaim -- from write-ups in the Wall Street Journal to the Dallas Morning News to Christian Computing Magazine, and television stories by WBNS Channel 10 in Columbus, Ohio and on Fox News. Visionary leaders like Bill Easum and Len Sweet champion it as a must-see website. Mark, the "Church CyberGuy," is also a well-known speaker on CyberMinistry as he conducts presentations and workshops around North America for such organizations as Leadership Network, United Methodist Communications, North American Christian Convention, Brethren in Christ Church of North America, and Miami University of Ohio. Mark has provided consulting support to numerous churches from around the world to help them develop their web ministries. His passion for helping churches led him to start and lead the Web-Empowered Church, a ministry of The Foundation for Evangelism, to develop free web-ministry software for churches and ministries worldwide.

Research Anthology on Developing and Optimizing 5G Networks and the Impact on Society Management Association, Information Resources, 2020-11-27 As technology advances, the emergence of 5G has become an essential discussion moving forward as its applications and benefits are expected to enhance many areas of life. The introduction of 5G technology to society will improve communication speed, the efficiency of information transfer, and end-user experience to name only a few of many future improvements. These new opportunities offered by 5G networks will spread across industry, government, business, and personal user experiences leading to widespread innovation and technological advancement. What stands at the very core of 5G becoming an integral part of society is the very fact that it is expected to enrich society in a multifaceted way, enhancing connectivity and efficiency in just about every sector including healthcare, agriculture, business, and more. Therefore, it has been a critical topic of research to explore the implications of this technology, how it functions, what industries it will impact, and the challenges and solutions of its implementation into modern society. Research Anthology on Developing and Optimizing 5G Networks and the Impact on Society is a critical reference source that analyzes the use of 5G technology from the standpoint of its design and technological development to its applications in a multitude of industries. This overall view of the aspects of 5G networks creates a comprehensive book for all stages of the implementation of 5G, from early conception to application in various sectors. Topics highlighted include smart cities, wireless and mobile networks, radio access technology, internet of things, and more. This all-encompassing book is ideal for network experts, IT specialists, technologists, academicians, researchers, and students.

The Oxford Handbook of Mobile Music Studies, Volume 1 Sumanth Gopinath, Jason Stanyek, 2014-03 The two volumes of The Oxford Handbook of Mobile Music Studies consolidate an area of scholarly inquiry that addresses how mechanical, electrical, and digital technologies and their corresponding economies of scale have rendered music and sound increasingly mobile-portable, fungible, and ubiquitous. At once a marketing term, a common mode of everyday-life performance, and an instigator of experimental aesthetics, mobile music opens up a space for studying the momentous transformations in the production, distribution, consumption, and experience of music and sound that took place between the late nineteenth and the early twenty-first centuries. Taken together, the two volumes cover a large swath of the world-the US, the UK, Japan, Brazil, Germany, Turkey, Mexico, France, China, Jamaica, Iraq, the Philippines, India, Sweden-and a similarly broad array of the musical and nonmusical sounds suffusing the soundscapes of mobility. Volume 1 provides an introduction to the study of mobile music through the examination of its devices, markets, and theories. Conceptualizing a long history of mobile music extending from the late nineteenth century to the present, the volume focuses on the conjunction of human mobility and forms of sound production and reproduction. The volume's chapters investigate the MP3, copyright law and digital downloading, music and cloud computing, the iPod, the transistor radio, the automated call center, sound and text messaging, the mobile phone, the militarization of iPod usage, the cochlear implant, the portable sound recorder, listening practices of schoolchildren and teenagers, the ringtone, mobile music in the urban soundscape, the boombox, mobile music marketing in Mexico and Brazil, music piracy in India, and online radio in Japan and the US.

The Collection's at the Core Marcia A. Mardis, 2014-12-04 Common Core standards, OER, STEM, and collection development—where to begin? This book investigates these critical topics together to give you the power to transform your collection and practice and put your school library at the center of STEM. Curricula that focus on Science, Technology, Engineering, and Mathematics (STEM) areas of study aren't just important for furthering competency and careers in these fields; STEM helps ensure that future generations include inventive and critical thinkers. Digital resources offer a current, exciting direction to involve school librarians with their STEM teachers. With its specific focus on open digital multimedia learning resources, this book will enable school librarians to take advantage of this opportunity and evaluate, build, and maintain their STEM collections. The book comprises three sections: an overview of policy initiatives; a thorough exploration of STEM education policy, digital materials, and collection considerations; and detailed explanations of strategies for collection development and promotion. You'll learn how to perform a collection analysis to determine the age and extent of your STEM collections and make priorities for enriching them with appropriate digital multimedia resources as well as how to classify resources using Dewey and Sears and with regard to the Common Core State Standards and the Next Generation Science Standards.

The Collection Program in Schools Marcia A. Mardis, 2021-07-19 This thorough treatment of collection development for school library educators, students, and practicing school librarians provides quick access to information. This seventh edition of *The Collection Program in Schools* is updated in several key areas. It provides an overview of key education trends affecting school library collections, such as digital textbooks, instructional improvement systems, STEM priorities, and open education resource (OER) use and reuse. Topics of discussion include the new AASL standards as they relate to the collection; the idea of crowd sourcing in collection development; and current trends in the school library profession, such as Future Ready Libraries and new standards from the National Board for Professional Teaching Standards. Each chapter has been updated and revised with new material, and particular emphasis is placed on disaster preparedness and response as they pertain to policies, circulation, preservation, and moving or

closing a collection. This edition also includes updates to review of curation and community analysis principles as they affect the development of the library collection.

QuickTime for Filmmakers Richard Ferncase, 2003-12-04 Over the decades, distribution has remained the most elusive aspect of filmmaking. The Web provides filmmakers with a new option for distribution, exhibition, and broadcast. While other media streaming technologies are available, QuickTime remains the most popular option for its versatility, excellent quality, and ease of use. QuickTime for Filmmakers shows filmmakers and videographers how to utilize this industry standard tool and offers advice on how best to shoot a film for Internet delivery. Other topics include: Editing and converting video, adding and editing soundtracks and using text in QT movies, compressing media, and preparing movies for http and RTSP streaming or a combination of both. A chapter on virtual reality explores QuickTime's unique feature for creating 360 panoramas, immersive cubic VR, object movies and VR scenes. A companion CD-ROM demonstrates topics covered in the book and provides samples of film prepared for web delivery.

Enabling Technologies and Architectures for Next-Generation Networking Capabilities Elkhodr, Mahmoud, 2018-10-19 With the rise of mobile and wireless technologies, more sustainable networks are necessary to support communication. These next-generation networks can now be utilized to extend the growing era of the Internet of Things. Enabling Technologies and Architectures for Next-Generation Networking Capabilities is an essential reference source that explores the latest research and trends in large-scale 5G technologies deployment, software-defined networking, and other emerging network technologies. Featuring research on topics such as data management, heterogeneous networks, and spectrum sensing, this book is ideally designed for computer engineers, technology developers, network administrators and researchers, professionals, and graduate-level students seeking coverage on current and future network technologies.
