*Augmented Dreams* Stephen B. Kagan,2012-06-10 It is the year 2048 and information has seeped into all the nooks and crannies of the world from layers of useful augmentations to vast virtual game worlds. Most people now access this web of information directly through nano built neural implants. Many of the advanced AI left after the Great Purge are now under the control of the military and powerful corporations. A few though are still free, hiding in the virtual game worlds of the Web. \*The newly edited version went live in September. Replacement copies are available upon request. Ben, a nature friendly virtual artist (world-weaver) and dream researcher follows a trail of darkness on an odyssey through different worlds of cyberspace to find a virtual art thief. Gordon, an MRI researcher, technophile and part time AI hunter seeks a cure for a mysterious web based sleeping sickness spreading throughout the population. Daniel, a recluse poet and Luddite struggles with having to use medical nanotechnology to cure his cancer but what he finds in the unconscious foundations of his biology is nothing less than a revelation that will change everything *Augmented Dreams* is an allegory of the modern mind (psyche) struggling to find balance between the roots of our ancestors and the modern world in a time of accelerating change. It is a palimpsest that takes place at the intersection between advanced technology, ancient myth, gaming and environmentalism. *Anthropology, Islands, and the Search for Meaning in the Anthropocene* Justin Armstrong,2022-11-02 Part ethnography, part memoir, and part critical reflection on the Anthropocene, this book examines the ways that islands form and inform human experiences of the everyday and the extraordinary. Utilizing carefully considered anthropological perspectives drawn from over a decade of anthropological fieldwork, the author employs islands as a complex set of lenses to examine the ways that we are intimately connected, separated, and divided from ourselves, one another, and the planet. Moving across time, place and disciplinary boundaries, this book traces a narrative route from the remote islands of Micronesia to the subarctic expanses of northern Iceland, all in service of gaining a deeper understanding of the cultural resonance of islands. This book offers the reader a type of ideological travel guide, one that exchanges restaurant reviews and hotel recommendations for pathways of reflection and new modes of seeing and being in the world. It will be of interest to scholars in the social sciences and humanities, and readers from human geography, cultural studies, sociology, philosophy and American studies.
