Never Good Enough Ariel Ducey, 2009 A thoughtful and provocative critique of job training in the health care sector.

Profit from Happiness Jake Ducey, 2016-06-07 Jake Ducey shows readers that the secret to prosperity and fulfillment at work and at home is to connect more deeply with those around you. Imagine doubling your income, without doubling your work hours. Imagine a world where everyone woke up happy, excited for work, and went home fulfilled. Imagine you could not stop smiling because you constantly felt so good about your professional and personal life. Most people believe that the best way to make more money is to work harder than ever and, as a result, they compromise their relationships, happiness, and energy. Others believe they have to quit their job and travel the world or volunteer their time to find happiness. These are both untrue, according to Ducey. In this enlightening, simple, heart-opening book, he asserts that the secret to high achievement and happiness at work, at school, in your heart, and at home is the deeply human need to wholeheartedly connect with and become more valuable to those around you. Ducey gives you mind-expanding and practical new ways to create more success, money, and happiness. The result is an enlightening and fulfilling read that will strengthen your relationship with money, bring you closer to those around you, and transform what you do at work, at school, and at home. If you would like to make more money, deepen your connection with others, and increase your energy and happiness, this book is for you.

A Nation of Villages Michael T. Ducey, 2022-08-23 During the period 1769-1850, republican national institutions slowly replaced colonial and monarchical rule. This was a turbulent time in rural Mexico. It was a period of political instability marked by violent peasant rebellions that were longer, more violent, and involved more people than those that occurred in the colonial era. Mexican villagers became skilled insurrectionists. In this

book, Michael Ducey analyzes the peasant rebellions in Mexico's Huasteca region over that time, beginning with short-lived colonial riots, progressing through a long and brutal insurrection associated with the war of independence and several region-wide uprisings, and culminating in the Caste War of the Huasteca of the 1840s. He asks not just why villagers revolted but how their discontent fit into the political drama of early national Mexico. Ducey shows how the war offered opportunities for villagers to settle scores with members of the local elite as peasants discovered new ways of imagining the state. They were far from being the isolated traditionalists who occasionally rebelled against political or economic change described in older scholarship. At least until the 1848-1850 Caste War, political disputes were more important than land. This region's peasants were both remarkably diverse and politically astute. Villagers adapted colonial political culture and later republican ideas to fashion local institutions that fit their own needs. Over the course of a hundred years, peasant tactics and political discourse evolved in a constant dialogue with the changing political climate, shifting from rhetorical statements of loyalty to the king to proclamations of federalism and their rights as citizens. *A Nation of Villages* ably demonstrates that rural villagers were more aware of elite ideologies than urban rulers were of the villagers' political ideas. This long-term analysis of one region illuminates how rural people helped shape the republican state.

The Rajah of Renfrew Brant Ducey, 1998-12 Baseball has been an essential strand in Edmonton's social fabric. This bush league town was also the source of considerable major-league talent in the early decades of this century. *The Rajah of Renfrew* surveys the arrival and development of baseball in western Canada, and John Ducey's role in bringing professional ball to the prairies.

Liberation Sociology Joe R. Feagin, Hernan Vera, Kimberly Ducey, 2015-11-17 Many people of all ages today continue to be attracted to sociology and other social sciences because of their promise to contribute to better political, social, and moral understandings of themselves and their social worlds-and often because they hope it will help them to build a better society. In a world of new movements and deepening economic inequality following the Great Recession, this new edition is vital. It features dozens of new examples from the latest research, with an emphasis on the next generation of liberation sociologists. The authors expand on the previous edition with the inclusion of sections on decolonisation paradigms in criminology, critical speciesism, and studies of environmental racism and environmental privilege. There is an expanded focus on participatory action research, and increased coverage of international liberation social scientists. Work by psychologists, anthropologists, theologians, historians, and others who have developed a liberation orientation for their disciplines is also updated and expanded.

Systemic Racism Ruth Thompson-Miller, Kimberley Ducey, 2017-10-17 This volume identifies some of the remaining gaps in extant theories of systemic racism, and in doing so, illuminates paths forward. The contributors explore topics such as the enduring hyper-criminalization of blackness, the application of the white racial frame, and important counter-frames developed by people of color. They also assess how African Americans and other Americans of color understand the challenges they face in white-dominated environments. Additionally, the book includes analyses of digitally constructed blackness on social media as well as case studies of systemic racism within and beyond

U.S. borders. This research is presented in honor of Kimberley Ducey's and Ruth Thompson-Miller's teacher, mentor, and friend: Joe R. Feagin.

Elite White Men Ruling Joe R. Feagin, Kimberley Ducey, 2017-04-07 This book examines the "who, what, when, where, and how" of elite-white-male dominance in U.S. and global society. In spite of their domination in the United States and globally that we document herein, elite white men have seldom been called out and analyzed as such. They have received little to no explicit attention with regard to systemic racism issues, as well as associated classism and sexism issues. Almost all public and scholarly discussions of U.S. racism fail to explicitly foreground elite white men or to focus specifically on how their interlocking racial, class, and gender statuses affect their globally powerful decisionmaking. Some of the power positions of these elite white men might seem obvious, but they are rarely analyzed for their extraordinary significance. While the principal focus of this book is on neglected research and policy questions about the elite-white-male role and dominance in the system of racial oppression in the United States and globally, because of their positioning at the top of several societal hierarchies the authors periodically address their role and dominance in other oppressive (e.g., class, gender) hierarchies.

Rhinoceros Kevin Ducey, 2004 Kevin Ducey's *Rhinoceros* was selected from over 1,000 manuscripts by Yusef Komunyakaa for the APR/Honickman First Book Prize. With lyrical turns and metaphorical sways, *Rhinoceros* embodies mythologies that are brought down to earth and riffs on history, desire, death, sex and food. We have lunch with Hawking and Disney before stopping in to see how Robert Browning's recording session with Thomas Edison is getting on. (They hate each other.) Komunyakaa writes in his introduction: *Rhinoceros* has a playfulness that pulses alongside a seriousness, and this rippling effect resonates beneath the skin. . . . A keen imagination drives these impressive poems. Kevin Ducey teaches creative writing at the University of Notre Dame and lives in South Bend, Indiana.

Racist America Joe R. Feagin, Kimberley Ducey, 2018-09-03 This fourth edition of *Racist America* is significantly revised and updated, with an eye toward racism issues arising regularly in our contemporary era. This edition incorporates many recent research studies and reports on U.S. racial issues that update and enhance the last edition's chapters. It expands the discussion and data on social science concepts such as intersectionality and gendered racism, as well as the concepts of the white racial frame, systemic racism, and the elite-white-male dominance system from research studies by Joe Feagin and his colleagues. The authors have further polished the book and added more examples, anecdotes, and narratives about contemporary racism to make it yet more readable for undergraduates. Student objectives, summaries, key terms, and study questions are available under the e-Resources tab at www.routledge.com/9781138096042.

Forest Mensuration John A. Kershaw, Jr., Mark J. Ducey, Thomas W. Beers, Bertram Husch, 2016-11-01 Forest mensuration – the science of measurement applied to forest vegetation and forest products – holds value for basic ecology as well as sustainable forest management. As demands on the world's forests have grown, scientists and professionals are increasingly called on to quantify forest composition, structure, and the goods and services forests provide. Grounded in geometry, sampling theory, and ecology as well as practical field experience, forest mensuration offers opportunities for creative problem solving and critical thinking. This fifth edition of the classic volume, *Forest Mensuration*, includes coverage of traditional and emerging topics, with attention to SI and Imperial units throughout. The book has been reorganised from the fourth edition to better integrate non-timber and ecological aspects of forest mensuration at the tree, stand, forest, and landscape scales throughout. The new edition includes new chapters that specifically address the integration of remotely sensed data in the forest inventory process, and inventory methods for dead and downed wood. One unifying theme, not only for traditional forestry but for the non-timber inventory and for remote sensing, is the use of covariates to make sampling more efficient and spatially explicit. This is introduced in the introductory chapter on statistics and the chapter on sampling designs has been restructured to highlight this approach and lay the foundation for further learning. New examples will be developed throughout the textbook with an emphasis on current issues and international practice. Students in applied forestry programs will find ample coverage of forest products and timber inventory, while expanded material on biodiversity, biomass and carbon inventory, downed dead wood, and the growing role of remote sensing in forest assessment will be valuable to a broader audience in applied ecology.
