The Official MacGyver Survival Manual Allain Rhett,2019-09-17 Handy (and often hilarious) hacks from the resourceful TV hero. Includes illustrations! For over thirty years, the name MacGyver has been synonymous with astonishing feats of ingenuity, from fixing a car with nothing but water and egg whites to busting out of jail using a hairpin and a pair of repurposed handcuffs to, of course, saving the world with his favorite weapon, a simple paperclip. What you might not know is that every trick that the resourceful secret agent pulls off on CBS's hit show has been tested and fact-checked by

experts, and really works . . . most of the time. No one is saying that you should craft a DIY airplane out of trash bags and a lawnmower engine. But with this book, you could. The first official how-to guide to the MacGyver universe, this book is packed with drawings and step-by-step descriptions of the hacks that made this character the world's most resourceful secret agent. It's lots of fun for fans of the new hit series as well as the classic show that started it all—or anyone who enjoys a bit of applied physics and clever problem-solving.

Under Orders John Timpson,2016-10-06 When John Timpson, chairman of the eponymous high street chain, bought his wife Alex a racehorse in 2002, a friend commented that it would be 'a marvellous way to lose money'. Soon they were immersed in a world of trainers' yards, Novice Hurdles and handicaps, and well on the way to proving the old adage that the best way to make a small fortune is to start with a larger one, and buy a few racehorses. As the number of horses increased and Alex became a well-loved figure on the racing scene, John kept a diary of their experiences on and off the track. This witty book describes how racing brought something extra into their marriage – from Mondays at Ludlow to the Cheltenham Festival. It documents the wins, near misses, disappointments and occasional tragedies that make up a racing career – not to mention the friends made, the knowledge gained and the sheer thrill of it all. Under Orders is a joyous and humorous portrait of horseracing in Britain and a tribute to the owners whose dedication and enthusiasm make the whole thing possible. Sales of the book will raise money for the Injured Jockeys Fund.

Hardcase Dan Simmons,2014-09-16 Once Joe Kurtz needed revenge -- and revenge cost him eleven years in Attica prison. Now Kurtz needs a job, and the price is going to be higher. Out of prison, out of touch, Kurtz signs on with the Byron Farino, Don of a Mob family whose son Kurtz had been protecting on the inside. Farino enlists Kurtz's help to track down the Family's missing accountant -- a man with too much knowledge of Family business to have on the loose. But someone doesn't want the accountant found -- and with enemies inside the Family vying for his throne, and turf warfare just around the corner, Farino needs an outsider like Kurtz to flush out who's really behind this latest affront. As the story twists and turns and the body count rises, Kurtz no longer knows who he can trust. Everyone seems to be after something, from the mob boss's sultry yet dangerous daughter, to a hit man named The Dane, an albino killer who is good with a knife, and a dwarf who is armed to the teeth and hell-bent on revenge. Kurtz has always been

an ace investigator. Now he's about to discover that to get at the truth, sometimes you have to go after it -- hard.

Cataloging and Classification Athena Salaba,Lois Mai Chan,2023 The fifth edition of the classic Cataloging and Classification covers the analysis and representation of methods used in describing, organizing, and providing access to resources made available in or through libraries. Since the last edition, there have new developments in cataloging, with the introduction of the IFLA Library Reference Model (LRM) and the new, official RDA, following the 3R Project. This text presents the essence of library cataloging and classification in terms of four basic functions: descriptive cataloging, authority work, subject access, and classification. Within this framework, content has been re-organized, all chapters have been rewritten, and new chapters have been introduced to incorporate the changes that have occurred during the interval between the four and fifth editions. In each part, the historical development and underlying principles of the retrieval mechanism at issue are treated first, because these are considered essential to an understanding of cataloging and classification. Discussion and examples of provisions in the standards and tools are then presented to illustrate the operations covered in each chapter. Divided into seven parts--a general overview; record production and structure, encoding formats, and metadata records; RDA (original and official); subject access and controlled vocabularies; the organization of library resources; encoding & records of bibliographic and authority data; and cataloging ethics--this book includes lists of the standards and tools used in the preparation and processing of cataloging records covered, lists of RDA elements, and sample records. Its companion website with interactive learning activities and supplementary materials located at catclassintro.org make it a true multimedia tool.

Selling Science Stephen E. Mawdsley, 2016-08 Today, when many parents seem reluctant to have their children vaccinated, even with long proven medications, the Salk vaccine trial, which enrolled millions of healthy children to test an unproven medical intervention, seems nothing short of astonishing. In *Selling Science*, medical historian Stephen E. Mawdsley recounts the untold story of the first large clinical trial to control polio using healthy children—55,000 healthy children—revealing how this long-forgotten incident cleared the path for Salk’s later trial. Mawdsley describes how, in the early 1950s, Dr. William Hammon and the National Foundation for Infantile Paralysis launched a pioneering medical experiment on a previously untried scale. Conducted on over 55,000 healthy children in Texas, Utah, Iowa, and Nebraska, this landmark study assessed the safety and effectiveness of a blood component, gamma globulin, to prevent paralytic polio. The value of the proposed experiment was questioned by many prominent health professionals as it harbored potential health risks, but as Mawdsley points out, compromise and coercion moved it forward. And though the trial returned dubious results, it was presented to the public as a triumph and used to justify a federally sanctioned mass immunization study on thousands of families between 1953 and 1954. Indeed, the concept, conduct, and outcome of the GG study were sold to health professionals, medical researchers, and the public at each stage. At a time when most Americans trusted scientists, their mutual encounter under the auspices of conquering disease was shaped by politics, marketing, and at times, deception. Drawing on oral history interviews, medical journals, newspapers, meeting minutes, and private institutional records, *Selling Science* sheds light on the ethics of scientific conduct, and on the power of marketing to shape public opinion about medical experimentation.
