Hands-On Exploratory Data Analysis with Python Suresh Kumar Mukhiya, Usman Ahmed, 2020-03-27 Discover techniques to summarize the characteristics of your data using PyPlot, NumPy, SciPy, and pandas Key Features Understand the fundamental concepts of exploratory data analysis using Python Find missing values in your data and identify the correlation between different variables Practice graphical exploratory analysis techniques using Matplotlib and the Seaborn Python package Book Description Exploratory Data Analysis (EDA) is an approach to data analysis that involves the application of diverse techniques to gain insights into a dataset. This book will help you gain practical knowledge of the main pillars of EDA - data cleaning, data preparation, data exploration, and data visualization. You'll start by performing EDA using open source datasets and perform simple to advanced analyses to turn data into meaningful insights. You'll then learn various descriptive statistical techniques to describe the basic characteristics of data and progress to performing EDA on time-series data. As you advance, you'll learn how to implement EDA techniques for model development and evaluation and build predictive models to

visualize results. Using Python for data analysis, you'll work with real-world datasets, understand data, summarize its characteristics, and visualize it for business intelligence. By the end of this EDA book, you'll have developed the skills required to carry out a preliminary investigation on any dataset, yield insights into data, present your results with visual aids, and build a model that correctly predicts future outcomes. What you will learn

- Import, clean, and explore data to perform preliminary analysis using powerful Python packages
- Identify and transform erroneous data using different data wrangling techniques
- Explore the use of multiple regression to describe non-linear relationships
- Discover hypothesis testing and explore techniques of time-series analysis
- Understand and interpret results obtained from graphical analysis
- Build, train, and optimize predictive models to estimate results
- Perform complex EDA techniques on open source datasets

Who this book is for This EDA book is for anyone interested in data analysis, especially students, statisticians, data analysts, and data scientists. The practical concepts presented in this book can be applied in various disciplines to enhance decision-making processes with data analysis and synthesis. Fundamental knowledge of Python programming and statistical concepts is all you need to get started with this book.

Eda and Ilse Judith Carrington and Juanita Herff Dr, 2013-04 Grieving the sudden death of her beloved husband a few years after they lost their first child, Eda Kampmann Herff picks up an

abandoned ledger and starts writing a Diary on the first day of 1884. A century later, her granddaughter, Ilse Herff Frost yields to a grandson's pleading and writes her Reminiscence. She recounts growing up in South Texas Boerne and San Antonio in the early 20th century. These two women are descendents of J.H. Kampmann, one of the 19th century German settlers who brought their enterprise, culture and utopian ideals to the vivid Mexican city of San Antonio. JHK was a dynamic civic leader. He built several of the classic German houses in the city's King William District, along with now-historic business buildings downtown like the Menger Hotel. He also founded two breweries and a bank that later became a significant cornerstone in the Frost Bank organization. Eda was JHK's daughter. She married a Herff, a son in a family of active physicians serving the burgeoning population of the young city. Herffs were among the founders of Boerne in Texas Hill Country. Eda records 30 months of 19th century daily life in her Diary as she raises her surviving son, participates in social and civic life, and travels. Ilse, JHK's great-granddaughter, was a daughter of that son of Eda's known as Johnny or Buby Herff in her Diary. He eventually became another generation's Dr. John Herff. Ilse's Reminiscence details life two generations later as her family splits time between the city and the ranch in Boerne. These two documents are preserved through the efforts of two more Kampmann/Herff descendents. Judith Carrington is the granddaughter of Elizabeth Ilse's Aunt Elizabeth who was born to the diarist, Eda, after she remarried. Judith found Eda's Diary among family memorabilia hidden in her mother's storage. Judith made the Diary available to The Witte Museum in San Antonio for an exhibit chronicling the early German settlers, including a special collection documenting J.H. Kampmann. A volunteer translator brought the lost document, written in old German, to life more than 100 years after it was written. Juanita Herff Drought Chipman Johnny Herff's granddaughter and Ilse's niece compiled the documents, added historic family

photographs, and contributed sketches she drew from other, fading images, to create this book. These stories are valuable to the many descendents of South Texas' German settlers. History records the accomplishments of their men, but the women of the families also carry an important story bygone routines that kept homes running, raised children, and built community. Eating Disorders Anonymous Eating Disorders Anonymous (EDA),2016-11-21 Eating Disorders Anonymous: The Story of How We Recovered from Our Eating Disorders presents the accumulated experience, strength, and hope of many who have followed a Twelve-Step approach to recover from their eating disorders. Eating Disorders Anonymous (EDA), founded by sober members of Alcoholics Anonymous (AA), have produced a work that emulates the "Big Book" in style and substance. EDA respects the pioneering work of AA while expanding its Twelve-Step message of hope to include those who are religious or seek a spiritual solution, and for those who are not and may be more comfortable substituting "higher purpose" for the traditional "Higher Power." Further, the EDA approach embraces the development and maintenance of balance and perspective, rather than abstinence, as the goal of recovery. Initial chapters provide clear directions on how to establish a foothold in recovery by offering one of the founder's story of hope, and collective voices tell why EDA is suitable for readers with any type of problem eating, including: anorexia nervosa, bulimia, binge eating, emotional eating, and orthorexia. The text then explains how to use the Twelve Steps to develop a durable and resilient way of thinking and acting that is free of eating disordered thoughts and behaviors, including how to pay it forward so that others might have hope of recovery. In the second half of the text, individual contributors share their experiences, describing what it was like to have an eating disorder, what happened that enabled them to make a start in recovery, and what it is like to be in recovery. Like the "Big Book," these stories are in three sections: Pioneers of EDA, They Stopped in Time, and They Lost Nearly All. Readers using the Twelve Steps to recover from other issues will find the process consistent and reinforcing of their experiences, yet the

EDA approach offers novel ideas and specific guidance for those struggling with food, weight and body image issues. Letters of support from three, highly-regarded medical professionals and two, well-known recovery advocates offer reassurance that EDA's approach is consistent with that supported by medical research and standards in the field of eating disorders treatment. Intended as standard reading for members who participate in EDA groups throughout the world, this book is accessible and appropriate for anyone who wants to recover from an eating disorder or from issues related to food, weight, and body image.
