Managing Interdependencies in Federal Systems Johanna Schnabel,2020-02-18 Intergovernmental councils have emerged as the main structures through which the governments of a federation coordinate public policy making. In a globalized and complex world, federal actors are increasingly interdependent. This mutual dependence in the delivery of public services has important implications for the stability of a federal system: policy problems concerning more than one government can destabilize a federation, unless governments coordinate their policies. This book argues that intergovernmental councils enhance federal stability by incentivizing governments to coordinate, which makes them a federal safeguard. By comparing reforms of fiscal and education policy in Australia, Canada, Germany, and Switzerland, this book shows that councils' effectiveness as one of federalism's safeguards depends on their institutional design and the interplay with other political institutions and mechanisms. Federal stability is maintained if councils process contentious policy problems, are highly institutionalized, are not dominated by the federal government, and are embedded in a political system that facilitates intergovernmental compromising and consensus-building.

Part 2: Project New Hope Michel Pelletier,2016-06-02 Tensions between nations run high in the twenty-second century. Nuclear war reduced the global population from fifteen billion to barely one hundred million survivors. Much of the planet's surface is highly radioactive. Sources of food, clean water, and medical supplies are increasingly scarce. Isolated regions made distribution of supplies even harder to operate. In a time when co-operation is imperative, self-interest continues to prevail in many parts of the globe. Amidst this growing chaos, a new generation of leaders emerges to guide Eden into an uncertain future filled with incredible new technologies and daunting challenges. As they struggle to provide leadership through humanity's darkest days, they must also preserve what little survives of nature's blessings. Can they build hope for a new world from the ashes of the old, or will they make the same mistakes to which humanity has always succumbed? Part 2 of the Eden Democratic Kingdom trilogy follows the continuing development of Eden and its leaders as they work towards a better future for their young nation and all of Earth's creatures.

Teaching Controversial Political Issues in the Age of Social Media Rakefet Erlich Ron,Shahar Gindi,2023-06-09 Using Israel as a case study, this book examines teachers' approaches to Controversial Political Issues (CPI) in the classroom. The book focuses on the democratic responsibilities that teachers face in an era where social media use is ubiquitous, and polarization and fake news are increasingly common. Presenting original research on the topic and developing a pedagogical framework for dealing with controversial issues in a sensitive and effective manner, this accessible volume highlights social-emotional learning approaches and considers a broad definition of CPI to include issues of racism, religion, political differences, multiculturalism, and Jewish-Arab relations. Using the results of an in-depth research project foregrounding personal experience, the book explores situational accounts of teachers from a diverse range of subject disciplines and different minority-majority group settings to present comparative evidence from European contexts. Offering concrete suggestions for ways of dealing with controversial political issues and volatile remarks that are grounded in research, this timely book will be highly relevant for researchers, students, and educators in the fields of social studies, democratic and peace education, citizenship education, race and education, and educational politics.

Migration Policymaking in Europe Giovanna Zincone,Rinus Penninx,Maren Borkert,2011 Deze studie ontwikkelt een geheel nieuwe benadering van het vraagstuk: Hoe wordt migratie- en integratiebeleid in tien Europese landen gemaakt? Wie is daarbij betrokken? Welke invloed hebben wetenschappers en maatschappelijke partners op de vorming en uitvoering van beleid? De auteurs concluderen dat beleid begrepen moet worden als resultaat van nationale historische verhoudingen en opvattingen binnen nationale contexten enerzijds, en anderzijds ontstaan is onder invloed van wereldwijde en supra-nationale invloeden.

Understanding the codes will ensure that you get the record book that is best suited for your needs. SOME record books do not have numbers or letters and are the original record books. Some original books may contain an R or r in their title as well. Those with numbers are different variations of the originals, based upon customer input / feedback. For example, the record book title that ends with 2 is the second version of that particular book. The interior pages of each version of the books are formatted differently to facilitate specific needs. Record books with letters at the end of the title (i.e. an M/m or S/s) indicate the size relative to the original record book. For Example a title of Emergency Drug / Med Supply Kit (EDK) Record Book 3m would indicate the third version, mid-sized book with 2/3 as many pages as the original size. Metaphor in Use Fiona MacArthur,Jose Luis Oncins-Martinez,Manuel Sánchez-García,Ana María Piquer-Píriz,2012 Metaphor is a fascinating phenomenon, but it is also complex and multi-faceted, varying in how it is manifested in different modes of expression, languages, cultures, or time-scales. How then can we reliably identify metaphors in different contexts? How does the language or culture of speakers and hearers affect the way metaphors are produced or interpreted? Are the methods employed to explore metaphors in one context applicable in others? The sixteen chapters that make up this volume offer not only detailed studies of the situated use of metaphor in language, gesture, and visuals around the world – providing important insights into the different factors that produce variation – but also careful explication and discussion of the methodological issues that arise when researchers approach metaphor in diverse 'real world' contexts. The book constitutes an important contribution to applied metaphor studies, and will prove an invaluable resource for the novice and experienced metaphor researcher alike.

Soft Governance, International Organizations and Education Policy Convergence Tonia Bieber,2016-08-17 This book examines the extent to which international organizations have shaped reforms in education and training in federalist countries with regards to policy convergence. In advanced democracies, international organizations have become increasingly influential in government activity. This also applies to policy fields that have traditionally been nearly exclusively regulated by the nation-state. How strong is their influence in policy fields like education where they rely on purely soft governance to stimulate national policies? From a political science perspective, three major initiatives are analyzed: the OECD’s PISA study, the European Bologna process and the European Union’s Copenhagen process. Within a few years, these initiatives have contributed to deep transformations within the education arena. This book elucidates the processes in which nation-states comply with these initiatives, using the examples of Switzerland and the United States. div>

Sign-Changing Critical Point Theory Wenming Zou,2008-12-15 Many nonlinear problems in physics, engineering, biology and social sciences can be reduced to finding critical points of functionals. While minimax and Morse theories provide answers to many situations and problems on the existence of multiple critical points of a functional, they often cannot provide much-needed additional properties of these critical points. Sign-changing critical point theory has emerged as a new area of rich research on critical points of a differentiable functional with important applications to nonlinear elliptic PDEs. This book is intended for advanced graduate students and researchers involved in sign-changing critical point theory, PDEs, global analysis, and nonlinear functional analysis.
