Aspectuality and Temporality Zlatka Guentchéva,2016-03-09 This volume brings together a collection of articles exploring tense and aspect phenomena in a variety of non-related languages: Indo-European (Albanian, Bulgarian, Armenian, English, Norwegian, Hindi), Hamito-Semitic (Berber, Zenaga Berber, Arabic varieties, Neo-Aramaic), African (Wolof, Langi), Asian (Badaga, Korean, Mongolian languages - Khalkha, Buriat, Kalmuck - Thaï, Tibetic languages), Amerindian (Yucatec Maya, Sikuani), Greenlandic (Eskimo) and Oceanian (Nêlêmwa). Each article is grounded in solid empirical knowledge. It offers an in-depth study of aspectual and temporal devices as manifested in many diverse and complex ways from a cross-linguistic perspective and seeks to contribute to our understanding of the domain under consideration and more broadly to linguistic typology and theoretical linguistics, especially the enunciative approach. The book gives readers access to a collection of data and is of particular interest to scholars working on aspectuality and temporality, on pragmatics, on areal linguistics and on typology.

Efficiency of Investment in a Socialist Economy Mieczyslaw Rakowski,2013-10-22 Efficiency of Investment in a Socialist Economy sums up the work done by the Economic Research Division of the Planning Commission at the Council of Ministers of the People's Republic of Poland on the theory of studies on the efficiency of investment and its applications. This work was to a great extent connected with the preparation of the new General Instruction on Methods of Studies of the Economic Efficiency of Investment published by the Planning Commission in 1962. The book is organized into two parts. Part I on research methods covers methods for economically assessing of the efficiency of investments involving the construction of new plants; for the economic assessment of supplementary investments in already functioning plants; and for the analysis of smaller investments. Part II presents several examples including calculation of the efficiency of investment for a mine producing boiler coal; the efficiency of replacement of old thermal power stations; and the efficiency of production of natural gas and oil. This book may be of interest to persons dealing with studies on efficiency of investment by virtue of their profession.

Assessing Command and Control Effectiveness Peter Berggren,Staffan Nählinder,Erland Svensson,2017-09-18
Assessing Command and Control Effectiveness: Dealing with a Changing World offers a description of the current state of Command and Control (C2) research in imperfect settings, showing how a research process should assess, analyse and communicate results to the development cycle of methods, work, manning and C2-technology. Special attention is given to the development of C2 research methods to meet the current and coming needs. The authors also look forward towards a future where effective assessment of C2 abilities are even more crucial, for instance in agile organisations. The purpose of the C2 research is to improve the process and make it more effective while still saving time and money. Research methods have to be chosen carefully to be effective and simple, yet provide results of high quality. The methodological concerns are a major consideration when working under such circumstances. Furthermore, there is often a need for a swift iterative development cycle, and thus a demand to quickly deliver results from the research process. This book explains how field research experimentation can be quick, simple and effective, being able to draw valid conclusions even when sample sizes are small and resources are limited, collecting empirical data using measures and procedures that are minimally intrusive.

A General Theory of Competition Shelby D. Hunt,1999-11-30 Hunt convincingly demonstrates that competition is not about dividing up limited resources but about creating more resources and thus competition is pro-society. This truly interdisciplinary book successfully develops a general theory of competition which is rich in explanatory breadth and depth. Consequently, executives and entrepreneurs, management consultants, public makers, and scholars and students in economics, law, political science, and business should read and study this book. -Robert F. Lusch, University of Oklahoma This book develops a new theory of competition. This theory - labeled resource-advantage theory - stems from no single research tradition, but draws on several different traditions in economics, management, marketing, and sociology. In this ground-breaking volume, Shelby Hunt articulates R-A theory, uses the theory to explain and predict economic phenomena, and shows how (and why) it explains and predicts such phenomena.
