**EU Socio-Economic Governance in Central and Eastern Europe** Mario Munta,2021-04-20 This book investigates to what extent and how the European Semester impacts on national employment policy in four EU member states of the Central and Eastern European (CEE) region. Using an original theoretical and methodological framework, and based on empirical evidence from extensive interviews with experts in the field, this book examines the relation between EU preferences, exemplified by the yearly list of country-specific recommendations, and national policy responses to EU suggestions, tracing the extent to which policy change can be attributed to the influence of the European Semester. It extracts three potential mechanisms of European Semester influence on policy change: External pressure, mutual learning and creative appropriation and identifies key contributing and inhibiting factors. The book provides several policy recommendations regarding the organisation and workings of the European Semester process. This text will be of key interest to students, academics and practitioners in European and EU politics, EU socio-economic governance, EU social policy, European integration, soft Europeanization and the Europeanization of Central and Eastern Europe.

**Coronavirus Disease (COVID-19): Pathophysiology, Epidemiology, Clinical Management and Public Health Response (volume I.C)** Zisis Kozlakidis,Denise L.Doolan,Shen-Ying Zhang,Yasuko Tsunetsugu Yokota,Tatsuo Shioda,Rukhsana Ahmed,Mohan Jyoti Dutta,Ata Murat Kaynar,Michael Kogut,Hannah Bradby,Slobodan Paessler,Alex Rodriguez-Palacios,Alexis M. Kalergis,Longxiang Su,Abdallah Samy,Zhongheng Zhang,2023-04-25 Volume I.C An outbreak of a respiratory disease first reported in Wuhan, China in December 2019 and the causative agent was discovered in January 2020 to be a novel betacoronavirus of the same subgenus as SARS-CoV and named severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Coronavirus disease 2019 (COVID-19) has rapidly disseminated worldwide, with clinical manifestations ranging from mild respiratory symptoms to severe pneumonia and a fatality rate estimated around 2%. Person to person transmission is occurring both in the community and healthcare settings. The World Health Organization (WHO) has recently declared the COVID-19 epidemic a public health emergency of international concern. The ongoing outbreak presents many clinical and public health management challenges due to limited understanding of viral pathogenesis, risk factors for infection, natural history of disease including clinical presentation and outcomes, prognostic factors for severe illness, period of infectivity, modes and extent of virus inter-human transmission, as well as effective preventive measures and public health response and containment interventions. There are no antiviral treatment nor vaccine available but fast track research and development efforts including clinical therapeutic trials are ongoing across the world. Managing this serious epidemic requires the appropriate deployment of

limited human resources across all cadres of health care and public health staff, including clinical, laboratory, managerial and epidemiological data analysis and risk assessment experts. It presents challenges around public communication and messaging around risk, with the potential for misinformation and disinformation. Therefore, integrated operational research and intervention, learning from experiences across different fields and settings should contribute towards better understanding and managing COVID-19. This Research Topic aims to highlight interdisciplinary research approaches deployed during the COVID-19 epidemic, addressing knowledge gaps and generating evidence for its improved management and control. It will incorporate critical, theoretically informed and empirically grounded original research contributions using diverse approaches, experimental, observational and intervention studies, conceptual framing, expert opinions and reviews from across the world. The Research Topic proposes a multi-dimensional approach to improving the management of COVID-19 with scientific contributions from all areas of virology, immunology, clinical microbiology, epidemiology, therapeutics, communications as well as infection prevention and public health risk assessment and management studies.

**International Brand Strategy** Sean Duffy,2021-01-03 In theory, the Internet allows all brands to market internationally. But in practice, most companies struggle to compete outside their home market. Written from a marketing practitioner's perspective, International Brand Strategy evens the playing field with clear, actionable techniques to guide any organization going through the process. This book helps companies build sales in foreign markets, but just as important it helps them thrive by maintaining price integrity and building brand equity at the same time. With the guidance provided in International Brand Strategy companies hit the ground running in foreign markets. This provides a competitive advantage from day one, empowers companies to avoid costly mistakes, and saves months of trial and error. The book lays out a unique methodology for managing brands abroad that can be implemented for any product in any market. These methods have proven their value for companies large and small across six continents. The book guides readers with pragmatic models and a wealth of examples from global companies such as Target Canada, Unilever and Apple. International Brand Strategy was written for those who are planning to enter a new market and for those who are already there but wish to improve their brand's performance. It helps the reader recognize some of the most common pitfalls and how to avoid them, provides practical tips to understand the dynamics of price, product and value from a foreign buyer's perspective, and defines a conceptual framework to assess and improve brand equity at home and abroad.

**Social policy in the European Union: state of play 2015** David Natali (OSE),Bart Vanhercke (OSE),2015-09-23 The sixteenth edition of Social policy in the European Union: state of play has a triple ambition. First, it provides easily accessible information to a wide audience about recent developments in both EU and domestic social policymaking. Second, the volume provides a more analytical reading, embedding the key developments of the year 2014 in the most recent academic discourses. Third, the forward-looking perspective of the book aims to provide stakeholders and policymakers with specific tools that allow them to discern new opportunities to influence policymaking. In this 2015 edition of Social policy in the European Union: state of play, the authors tackle the topics of the state of EU politics after the parliamentary elections, the socialisation of the European Semester, methods of political protest, the Juncker investment plan, the EU’s contradictory education investment, the EU’s contested influence on national healthcare reforms, and the neoliberal Trojan Horse of the Transatlantic Trade and Investment Partnership (TTIP).
