Antisocial Media Siva Vaidhyanathan, 2018-05-15 A fully updated paperback edition that includes coverage of the key developments of the past two years, including the political controversies that swirled around Facebook with increasing intensity in the Trump era. If you wanted to build a machine that would distribute propaganda to millions of people, distract them from important issues,

energize hatred and bigotry, erode social trust, undermine respectable journalism, foster doubts about science, and engage in massive surveillance all at once, you would make something a lot like Facebook. Of course, none of that was part of the plan. In this fully updated paperback edition of *Antisocial Media*, including a new chapter on the increasing recognition of--and reaction against--Facebook's power in the last couple of years, Siva Vaidhyanathan explains how Facebook devolved from an innocent social site hacked together by Harvard students into a force that, while it may make personal life just a little more pleasurable, makes democracy a lot more challenging. It's an account of the hubris of good intentions, a missionary spirit, and an ideology that sees computer code as the universal solvent for all human problems. And it's an indictment of how social media has fostered the deterioration of democratic culture around the world, from facilitating Russian meddling in support of Trump's election to the exploitation of the platform by murderous authoritarians in Burma and the Philippines. Both authoritative and trenchant, *Antisocial Media* shows how Facebook's mission went so wrong.

The Tyranny of Big Tech Josh Hawley, 2021-05-04

The reign of Big Tech is here, and Americans' First Amendment rights hang by a keystroke. Amassing unimaginable amounts of personal data, giants like Google, Facebook, Amazon, and Apple—once symbols of American ingenuity and freedom—have become a techno-oligarchy with overwhelming economic and political power. Decades of unchecked data collection have given Big Tech more targeted control over Americans' daily lives than any company or government in the world. In *The Tyranny of Big Tech*, Senator Josh Hawley of Missouri argues that these mega-corporations—controlled by the robber barons

of the modern era—are the gravest threat to American liberty in decades. To reverse course, Hawley argues, we must correct progressives’ mistakes of the past. That means recovering the link between liberty and democratic participation, building an economy that makes the working class strong, independent, and beholden to no one, and curbing the influence of corporate and political elites. Big Tech and its allies do not deal gently with those who cross them, and Senator Hawley proudly bears his own battle scars. But hubris is dangerous. The time is ripe to overcome the tyranny of Big Tech by reshaping the business and legal landscape of the digital world.

Surveillance Valley Yasha Levine, 2018-02-06 The internet is the most effective weapon the government has ever built. In this fascinating book, investigative reporter Yasha Levine uncovers the secret origins of the internet, tracing it back to a Pentagon counterinsurgency surveillance project. A visionary intelligence officer, William Godel, realized that the key to winning the war in Vietnam was not outgunning the enemy, but using new information technology to understand their motives and anticipate their movements. This idea -- using computers to spy on people and groups perceived as a threat, both at home and abroad -- drove ARPA to develop the internet in the 1960s, and continues to be at the heart of the modern internet we all know and use today. As Levine shows, surveillance wasn't something that suddenly appeared on the internet; it was woven into the fabric of the technology. But this isn't just a story about the NSA or other domestic programs run by the government. As the book spins forward in time, Levine examines the private surveillance business that powers tech-industry giants like Google, Facebook, and Amazon, revealing how these companies spy on their users for profit, all while doing double duty as

military and intelligence contractors. Levine shows that the military and Silicon Valley are effectively inseparable: a military-digital complex that permeates everything connected to the internet, even coopting and weaponizing the antigovernment privacy movement that sprang up in the wake of Edward Snowden. With deep research, skilled storytelling, and provocative arguments, Surveillance Valley will change the way you think about the news -- and the device on which you read it.

Breaking Away Maurice E. Stucke, Douglas a Blaze Distinguished Professor of Law Maurice E Stucke, 2022-03-31 Breaking Away sounds a warning call alerting readers that their privacy and autonomy concerns are indeed warranted, and the remedies deserve far greater attention than they have received from our leading policymakers and experts to date. Through the various prisms of economic theory, market data, policy, and law, the book offers a clear and accessible insight into how a few powerful firms - Google, Apple, Facebook (Meta), and Amazon - have used the same anticompetitive playbook and manipulated the current legal regime for their gain at our collective expense. While much has been written about these four companies' power, far less has been said about addressing their risks. In looking at the proposals to date, however, policymakers and scholars have not fully addressed three fundamental issues: First, will more competition necessarily promote our privacy and well-being? Second, who owns the personal data, and is that even the right question? Third, what are the policy implications if personal data is non-rivalrous? Breaking Away not only articulates the limitations of the current enforcement and regulatory approach but offers concrete

proposals to promote competition, without having to sacrifice our privacy. This book explores how these platforms accumulated their power, why the risks they pose are far greater than previously believed, and why the tools need to be far more robust than what is being proposed. Policymakers, scholars, and business owners, managers, and entrepreneurs seeking to compete and innovate in the digital platform economy will find the book an invaluable source of information.

"I Have Nothing to Hide" Heidi Boghosian, 2021-07-13
An accessible guide that breaks down the complex issues around mass surveillance and data privacy and explores the negative consequences it can have on individual citizens and their communities. No one is exempt from data mining: by owning a smartphone, or using social media or a credit card, we hand over private data to corporations and the government. We need to understand how surveillance and data collection operates in order to regain control over our digital freedoms—and our lives. Attorney and data privacy expert Heidi Boghosian unpacks widespread myths around the seemingly innocuous nature of surveillance, sets the record straight about what government agencies and corporations do with our personal data, and offers solutions to take back our information. "I Have Nothing to Hide" is both a necessary mass surveillance overview and a reference book. It addresses the misconceptions around tradeoffs between privacy and security, citizen spying, and the ability to design products with privacy protections. Boghosian breaks down misinformation surrounding 21 core myths about data privacy, including: • "Surveillance makes the nation safer." • "No one wants to spy on kids." • "Police don't monitor social media." • "Metadata doesn't reveal much about me." • "Congress and the courts protect us

from surveillance.” • “There’s nothing I can do to stop surveillance.” By dispelling myths related to surveillance, this book helps readers better understand what data is being collected, who is gathering it, how they’re doing it, and why it matters.

Introduction to Contemporary Social Theory

Anthony Elliott, Charles Lemert, 2022-04-24 In this comprehensive and clear introduction to contemporary social theory, Anthony Elliott and Charles Lemert explore the major theoretical traditions from the Frankfurt School to the digital revolution and beyond. Fully revised and updated, this second edition has been expanded to consider the most recent developments in social theory, including a new chapter on the digital revolution and the increasingly significant impact of technological developments (such as artificial intelligence, machine learning and robotics) on society, culture and politics. *Introduction to Contemporary Social Theory* provides the reader with a superb overview of key developments in social theory, including the Frankfurt School, American pragmatism, structuralism, post-structuralism, feminism, globalization and world-systems theory. In doing so, the textbook explores the ideas of a wide range of social theorists, including Theodor Adorno, Herbert Marcuse, Talcott Parsons, Erving Goffman, Harold Garfinkel, Michel Foucault, Jacques Lacan, Jacques Derrida, C. Wright Mills, Anthony Giddens, Pierre Bourdieu, Julia Kristeva, Jürgen Habermas, Judith Butler, Slavoj Žižek, Manuel Castells, Cornel West, Immanuel Wallerstein and Zygmunt Bauman. This textbook provides stylish exposition with powerful social critique and original insights. It will be indispensable to students and academics alike.

Annual accountability hearing with the Care Quality Commission Great Britain: Parliament: House of Commons:

Health Committee,2011-09-14 Following its annual review of the work of the Care Quality Commission (CQC), the Health Committee reports that the bias of the work in the CQC away from its core function of inspection and towards the essentially administrative task of registration, represents a significant distortion of priorities. The Committee reports that: the CQC was established without sufficiently clear and realistic definition of its priorities and objectives; the timescales and resource implications of the functions of the CQC were not properly analysed; the registration process itself was not properly tested and proven before it was rolled out; the CQC failed to draw the implications of these failures adequately to the attention of ministers, Parliament and the public. Consequently, the Committee welcomes the government's decision to postpone registration of GP practices, and recommends that proper planning, including piloting of the model for registration, should be undertaken before the revised date of April 2013 is confirmed. The Committee also welcomes recent announcements that the CQC intends to undertake annual visits of all NHS and social care providers. It goes on to stress the importance of the role of inspectors in assessing the culture in care providers, especially concerning the obligation which rests on all healthcare professionals to raise concerns if they recognise, or ought to have recognised, evidence of failure of professional standards. Each provider organisation should recognise and respect this professional obligation and provide proper security to those professional staff who discharge it effectively.

Shadow Government Tom Engelhardt, 2014-09-15 "A book about secrets and surveillance . . . [from] one of the great forces on the side of clarity, democracy, openness, and really good writing" (Rebecca Solnit, author of *Hope in*

the Dark). In 1964, a book entitled *The Invisible Government* shocked Americans with its revelations of a growing world of intelligence agencies playing fast and loose around the planet, a secret government lodged inside the one they knew that even the president didn't fully control. Almost half a century later, everything about that "invisible government" has grown vastly larger, more disturbing, and far more visible. In his new book, Tom Engelhardt takes in something new under the sun: what is no longer, as in the 1960s, a national security state, but a global security one, fighting secret wars that have turned the president into an assassin-in-chief. *Shadow Government* offers a powerful survey of a democracy of the wealthy that your grandparents wouldn't have recognized. "Tom Engelhardt is an iconoclast . . . Again and again, he goes to the heart of the matter, drawing on his awesomely wide reading, his knowledge of history, and his acute political radar system." —Adam Hochschild, author of *King Leopold's Ghost* and *Mirror at Midnight* "This collection, focused on the new Orwellianism, is some of the finest writing and finest public service gathered together in book form for your portable pleasure and outrage." —Rebecca Solnit of *Call Them by Their True Names* "Tom Engelhardt's writing on the new forms of government surveillance is crucial because he has spent a lifetime studying the rise of the national security state." —Juan Cole, professor of history at the University of Michigan

Popular Mechanics Who's Spying On You? Erik Sofge, Davin Coburn, 2013-01-02 Its not paranoia; we ARE being watched. Today, thanks to technology and new media--cell phone GPS, backscatter scanners, online financial transactions, cloud-stored medical records, Facebook and Twitter--our every activity can be quietly monitored. And now that inexpensive gene sequencing seems imminent, even our bodies secrets may be up for grabs. This groundbreaking investigation shows how Americas privacy is under assault--and what we can do to protect ourselves. Covering everything from the News of the World hacking scandal to identity and credit theft, Popular Mechanics Whos Spying On You? features stories of real people whose privacy has been violated. It looks at the technology powering those intrusions, reveals the advances in security that may eventually protect us, and thoroughly explores the social and legal ramifications of our increasingly complex and high-tech society. A final chapter offers direct, service-oriented tips to safeguard privacy, along with an exploration of how a new, post-private generation willingly surrenders personal information--and the potential pitfalls and benefits of broadcasting your life on your own terms.

Censored 2012 Mickey Huff, Project Censored, 2011-10-04 Every year since 1976, Project Censored, our nation's oldest news-monitoring group—a university-wide project at Sonoma State University founded by Carl Jensen, directed for many years by Peter Phillips, and now under the leadership of Mickey Huff—has

produced a Top-25 list of underreported news stories and a book, *Censored*, dedicated to the stories that ought to be top features on the nightly news, but that are missing because of media bias and self-censorship. Seven Stories Press has been publishing this yearbook since 1994, featuring the top stories listed democratically in order of importance according to students, faculty, and a national panel of judges. Each of the top stories is presented at length, alongside updates from the investigative reporters who broke the stories. Beyond the Top-25 stories, additional chapters delve further into timely media topics: The Censored News and Media Analysis section provides annual updates on Junk Food News and News Abuse, Censored Déjà Vu, signs of hope in the alternative and news media, and the state of media bias and alternative coverage around the world. In the Truth Emergency section, scholars and journalists take a critical look at the US/NATO military-industrial-media empire. And in the Project Censored International section, the meaning of media democracy worldwide is explored in close association with Project Censored affiliates in universities and at media organizations all over the world. A perennial favorite of booksellers, teachers, and readers everywhere, *Censored* is one of the strongest life signs of our current collective desire to get the news we citizens need—despite what Big Media tells us.
