**Fake It** Pernille Tranberg, Steffan Heuer, 2012-08-28 Do you ever think about who knows what about you? That whenever you are online, on the web or using apps, your behaviour can affect your chances of landing a great job or losing it, being accepted at the school of your dreams, or receiving the best price for your insurance policy or a simple airline ticket? At home, at work, at school. Where you're jogging or dating, shopping or searching, streaming music or simply reading something. You are constantly tracked - most often without you noticing or knowing about it. When Google, Facebook, Twitter and Co. let you find information, stay in touch and entertain yourself it is by no means free. You pay with your personal data - today's oil. Companies feast on your digital identity. They mine, store and sell information about your interests, tastes, religion, age, political belief, health, sexual orientation, even your friends. And they make billions scraping together the pieces of your identity. Fake It guides you through the maze and madness of oversharing. How to take care of your identity and reputation online. Who keeps an eye on you and why. What happens to your data, and which tools can you use, such as blocking cookies and trackers, disconnecting social buttons and - most importantly - using more identities, hiding behind pseudonyms and aliases. Your privacy is more important than the terms of service dictated by for-profit entities.

*Automating the News* Nicholas Diakopoulos, 2019-06-10 From hidden connections in big data to bots spreading fake news, journalism is increasingly computer-generated. Nicholas Diakopoulos explains the present and future of a world in which algorithms have changed how the news is created, disseminated, and received, and he shows why journalists—and their values—are at little risk of being replaced.

I'd like to make this book required reading for every employee at Gomez.-- Imad Mouline, CTO of Gomez

**Indigenous Australian Youth Futures** Kate Senior, Richard Chenhall, Victoria Burbank, 2021-07-08 Adolescents are at a critical life stage where they will soon be able to contribute to the wellbeing of humankind, or do it great harm. Consequently, it is vital that the challenges and possibilities of adolescence be well understood and addressed. In Australia, such understanding is urgently needed with respect to Aboriginal adolescents. Not only

must they adjust to their changing bodies and minds, but they must negotiate these changes within a context usually characterised by racism and poverty. They must also do this within intercultural environments that include the disparate and sometimes incompatible beliefs and practices of their multicultural populations. The chapters in this collection address these challenges to Aboriginal adolescents in the Northern Territory and the intercultural contexts in which they take place. Their discussions include the adolescents' experiences with health and health care, education, and the criminal justice system. They also address their hopes, dreams, plans and politics, engagement with social media, food preferences and nutrition, engagement with language, family, and changing mores affecting sexual behaviour and marriage. The book aims to provide readers with a greater understanding of the day-to-day lives of Aboriginal adolescents, and some of the adults who care for or neglect them. It seeks to provide readers with a better understanding of the circumstances, processes and factors that affect adolescent health, wellbeing and future prospects in their intercultural environments, and glimpse the multiplicity of these circumstances, processes and factors and the complexity of their interaction.

*Social Media in Emergent Brazil* Juliano Spyder, 2017-10-23 Since the popularisation of the internet, low-income Brazilians have received little government support to help them access it. In response, they have largely self-financed their digital migration. Internet cafés became prosperous businesses in working-class neighbourhoods and rural settlements, and, more recently, families have aspired to buy their own home computer with hire purchase agreements. As low-income Brazilians began to access popular social media sites in the mid-2000s, affluent Brazilians ridiculed their limited technological skills, different tastes and poor schooling, but this did not deter them from expanding their online presence. Young people created profiles for barely literate older relatives and taught them to navigate platforms such as Facebook and WhatsApp

**Boundaries in an Overconnected World** Anne Katherine, 2013-10-15 Over the past decade, 24/7 connectivity has given us not only convenience and fun but worries about privacy, interruptions while working or trying to enjoy family or other downtime, and new compulsions — from shopping to tweeting and cute-cat watching. Anne Katherine, one of the authors who brought boundary setting to a mass audience, has now written a book on how to set healthy boundaries with technology. The first of its kind, this resource doesn't suggest anyone go "cold turkey." Instead, it helps people make social media, smart phones, and other innovations work for, rather than against, them. Readers learn to protect themselves online in every way — from predators and data mining as well as time-devouring friends and acquaintances — with an emphasis on preserving and optimizing meaningful personal connections. Anyone who has ever wondered if their cute little gadget was actually an enemy invader will welcome Katherine's strategies for ensuring "that your life is truly your own."

**The New Cyberwar** Dennis F. Poindexter, 2015-08-19 Carl Von Clausewitz described the purpose of war as the compulsory submission of the enemy to our will. Unlike conventional military conflicts of the past, war in the information age is more a battle of wills than artillery, and doesn't necessarily end with decisive conclusions or clear winners. Cyber warfare between nations is conducted not only without the consent or participation of citizens but often without their knowledge, with little to see in the way of airstrikes and troop movements. The weapons are information systems, intelligence, propaganda and the media. The combatants are governments, multinational corporations, hackers and whistleblowers. The battlefields are economies, command and control networks, election outcomes and the hearts and minds of populations. As with Russia's bloodless 2014 annexation of the Crimea, the cyberwar is fought before the infantry arrives. Written by a United States intelligence community insider, this book describes the covert aspects of modern wars and the agencies who fund and fight them.

**COVID-19 PANDEMIC: Monitoring Technologies, Healthcare and Panic buying behaviour** Dr. Safaa Najah Saud Al-Humairi,Dr. Nurzafirah Mazlan,Associate Professor Dr. Arun Kumar Tarofder,Dr. Husniza Razalli,2020-06-30 COVID-19 is an infectious disease that has become the biggest threat in the year 2020 so far. It has dramatically changed the human life and the world economy. The world has been traumatized by the terrifying effect of this virus. Not only the underdeveloped countries but also the most developed countries across the world, USA, Italy, Spain, Germany, to name a few, have witnessed the devastating effect of this lethal virus. Therefore, understanding the risk and management of this group of people is important for effective intervention and reducing the number of cases and fatality. In spite of this, COVID-19 imposes a heavy burden and costs on the health sector, and consequently, providing continuous monitoring by modern technologies will lead to a reduction of health costs and improve control of people's health practices, management, and prevention of this pandemic. Employing the mobile and advanced health systems to offer a remote medical diagnosis and monitoring system will significantly reduce the cost of health care and appropriate management of performance, especially in managing

and spreading COVID-19. This book explores the effect of COVID-19 on human health in three essential cores: medically, technologically, and economically. The Internet of Things (IoT) and Artificial Intelligence (AI) includes three principal methods: monitoring, diagnosis, and treatment were discussed. IoT could achieve long-term connectivity between hospitals, patients, and healthcare equipment by integrating sensors, information technology, artificial intelligence, and innovative networking devices, which could significantly enhance current medical conditions. This book also provides a theoretical comparison between normal buying behaviour and panic buying behaviour. Subsequently, it explains the reasons for this behaviour. Not only reasons, but the book also classified products based on this consumer buying pattern during this pandemic. The book ends with a case study on the implementation of the AI algorithms in Malaysia and the achieved results were presented accordingly with a remarkable conclusion.

Strike for the Common Good Rebecca Kolins Givan, Amy Schrager Lang, 2020-10-08 In February 2018, 35,000 public school educators and staff walked off the job in West Virginia. More than 100,000 teachers in other states—both right-to-work states, like West Virginia, and those with a unionized workforce—followed them over the next year. From Arizona, Kentucky, and Oklahoma to Colorado and California, teachers announced to state legislators that not only their abysmal wages but the deplorable conditions of their work and the increasingly straitened circumstances of public education were unacceptable. These recent teacher walkouts affirm public education as a crucial public benefit and understand the rampant disinvestment in public education not simply as a local issue affecting teacher paychecks but also as a danger to communities and to democracy. *Strike for the Common Good* gathers together original essays, written by teachers involved in strikes nationwide, by students and parents who have supported them, by journalists who have covered these strikes in depth, and by outside analysts (academic and otherwise). Together, the essays consider the place of these strikes in the broader landscape of recent labor organizing and battles over public education, and attend to the largely female workforce and, often, largely non-white student population of America's schools.
