Jawahar,Shiguang Shan,2015-04-10 The three-volume set, consisting of LNCS 9008, 9009, and 9010, contains carefully reviewed and selected papers presented at 15 workshops held in conjunction with the 12th Asian Conference on Computer Vision, ACCV 2014, in Singapore, in November 2014. The 153 full papers presented were selected from numerous submissions. LNCS 9008 contains the papers selected for the Workshop on Human Gait and Action Analysis in the Wild, the Second International Workshop on Big Data in 3D Computer Vision, the Workshop on Deep Learning on Visual Data, the Workshop on Scene Understanding for Autonomous Systems, and the Workshop on Robust Local Descriptors for Computer Vision. LNCS 9009 contains the papers selected for the Workshop on Emerging Topics on Image Restoration and Enhancement, the First International Workshop on Robust Reading, the Second Workshop on User-Centred Computer Vision, the International Workshop on Video Segmentation in Computer Vision, the Workshop: My Car Has Eyes: Intelligent Vehicle with Vision Technology, the Third Workshop on E-Heritage, and the Workshop on Computer Vision for Affective Computing. LNCS 9010 contains the papers selected for the Workshop on Feature and Similarity for Computer Vision, the Third International Workshop on Intelligent Mobile and Egocentric Vision, and the Workshop on Human Identification for Surveillance.

*Handbook of Mathematical Models in Computer Vision* Nikos Paragios,Yunmei Chen,Olivier D. Faugeras,2006-01-16 Abstract Biological vision is a rather fascinating domain of research. Scientists of various origins like biology, medicine, neurophysiology, engineering, mathematics, etc. aim to understand the processes leading to visual perception process and at reproducing such systems. Understanding the environment is most of the time done through visual perception which appears to be one of the most fundamental sensory abilities in humans and therefore a significant amount of research effort has been dedicated towards modelling and reproducing human visual abilities. Mathematical methods play a central role in this endeavour. Introduction David Marr's theory was a pioneering step towards understanding visual perception. In his view human vision was based on a complete surface reconstruction of the environment that was then used to address visual subtasks. This approach was proven to be insufficient by neuro-biologists and complementary ideas from statistical pattern recognition and artificial intelligence were introduced to better address the visual perception problem. In this framework visual perception is represented by a set of actions and rules connecting these actions. The emerging concept of active vision consists of a selective visual perception paradigm that is basically equivalent to recovering from the environment the minimal piece of information required to address a particular task of interest.

**Journalism, Reporting, Writing and Editing** Rowan Kidd,2018-01-25 The present book has been brought into being in view of incessant demand pertaining to the subject Journalism, inherently requires that stories be told in-depth. Many newspapers have cut out long articles even before the Internet. They have followed the example set by television news. They have been hit by the rising price of newsprint, and the renewed emphasis on cost cutting. They are convinced that readers are pressed for time, impatient with detail, and conditioned to ingest the news in pellet-like form. The bulk of broadcast news is reporting in the sense that is used is different rather than journalism. It is epitomized by the two-minute wire service radio bulletin on the hour already a fast disappearing format. In this incisive and well-presented work, the book has synthesized the findings to lay down principles of sound journalism for both those in the industry and the citizens, who rely on the free press as a fundamental element of democracy. First and foremost among these principles is journalism's obligation to the truth. It will immensely benefit students, teachers, mass communicators, theoreticians and practitioners alike. Something usable today, a ready reckoner for years to come and a collector's item for all times. A must read enduring and preservable

Karst Geohazards Barry F. Beck,2018-12-19 Geologists and geographers study how to develop how and where karst develops and how sinkholes form, but engineers must use this information to develop karst terrane. Over the past ten years, these multidisciplinary conferences on the applied aspects of karst hydrogeology and engineering have been successful in bringing together engineers, geologists, other scientists and government regulators who must safely establish human infrastructure on karst terrane whilst protecting the environment. The essences of these conferences has always been communciation between geologists and engineers with an emplasis on practical applications and case studies. This text contains the proceedings of the fifth conference on karst geohazards. It presents 65 papers that cover topics such as: groundwater contamination through sinkholes and the karst surface; stormwater drainage and flooding problems; and foundation considerations and improvements in karst.
