The LA Fitness Personal Training Journal & Logbook Jack Reagan, Stephanie Bowen, 2016-01-31 What is The LA Fitness Personal Training Journal and Logbook all about? We have created a better Personal Training Journal and Logbook for both trainers and clients of LA Fitness Personal Training Programs. This will not only be a teach tool, and educational aide, but also valuable in recording which exercises a client has performed as they strive to reach their personal fitness goals. It tracks all of your workouts and has weekly and monthly measurements so you can track all your progress! Losing fat and building muscle, plain and simple. One concept that many people seem to have a problem with is the idea that in order to keep fat off of your body you need to put on muscle. While at first glance this may seem counterproductive - gaining weight in order to lose weight - it's all about metabolism. Metabolism can be summed up as all of the chemical reactions that take place within an organism. In terms of weight loss and fitness, metabolism basically means all of those calories that your body burns throughout the day. Your goal is to add lean tissue and in turn elevate our resting metabolic rate. Muscle creates metabolism So how do we do that? As we add lean muscle to our bodies the muscle will require more calories to survive. Imagine adding a bunch of plug-in space heaters into your apartment during the winter. As we keep adding heaters, the energy demands go up and our electric bill rises. More heaters, more heat. Similarly, as we keep adding lean muscle, our body must use more calories to operate that new muscle... Just like the space heaters. More muscle more calories burned. Now let's take it one step further

and consider the future. As we are adding lean muscle over the coming weeks and months your body will burn more and more at-rest calories. Let's look at our analogy of adding the heaters inside of our house. There is a certain point where you have enough heaters going to keep you from getting cold, and then you can set all of the heaters to their lowest setting and they will still keep your house warm, no matter how cold it is outside. We want enough lean muscle on our bodies so that the fat we have lost can't come back. There is a tipping point when you are working out, where you have developed enough lean tissue (somewhere between 6 and 15 pounds) that the fat you have lost can't come back because you're burning so many calories throughout the day. Think of pounds of fat in terms of the calories they represent. A single (1) pound of fat is roughly 3500 cal. In general terms, a pound of lean muscle will add an additional 20 to 30 cal. per day to your metabolism. That means if I were to put on 10 pounds of lean muscle I would be burning an extra 200 to 300 cal. each and every day. So if I have 10 pounds of fat to lose (35,000 cal.) that I need to put on enough muscle to compensate for that fat so that once it's gone I don't have to keep stressing about it. A reasonable workout should burn between 500 and 1,000 calories in a given day (weight training plus cardio, CrossFit, extreme cardio, etc.). If you are working out 3 to 4 days a week - which you need to be - you are burning an extra 3000 to 4000 cal. per week. That would burn a pound of fat each week. No one should be afraid of lean muscle; it doesn't take very much space. Ten (10) pounds of lean muscle is not much bigger than a cantaloupe - as far as how much space it takes up in your body (volume). Just 5 pounds of fat is roughly the size of an American football! You're right, that's f'ing gross. But think of it like this: you could put on 10 pounds of muscle and if you lost just 3 pounds of fat you would not be any bigger. We will teach you how to do that in the following workouts. So grab your water bottle, get your towel, and prepare to wage war on fat. Let's get started!

Return to Fitness Bill Katovsky, 2011-01-22 Bill Katovsky was a two-time Hawaii Ironman finisher, a guy who bicycled solo across the U.S., an endurance athlete who competed in a three-day race mountain bike race across Costa Rica. But through a series of misfortunes, including depression, losing his dog, death in his family, and debilitating health problems, Katovsky went from being a multisport junkie to complete couch potato. He stopped working out. For almost ten years! By the time he hit fifty, he decided it was time

for a change. How he fought his way back to fitness is not only a riveting, brutally honest, and ultimately inspiring story, it is also a hands-on guide to help anyone reclaim health and well-being. Katovsky supplements his personal story with those of others successfully making a return to fitness - an astronaut who spent five months in space; a former Wall Street trader who lost seventy-five pounds and became Hawaii's Fittest CEO; a retired two-time world-champion Hawaii Ironman triathlete with a bum hip that needed replacing, a Yosemite park employee who broke her spine in a hiking accident and is now back on the trails; and a sixty-something business educator who's had six heart bypasses but still backpacks and goes to the gym. With the advice of personal trainers, fitness experts, and multisport coaches, Katovsky offers a wealth of useful information, including: Diet and nutrition - what you need to know for a healthy body How aging, body fat, and motivation affect physical and mental health; and why exercise is good for depression Successfully building a proper aerobic and strength base - workouts you can do at home! Tips for injury prevention - from avoiding overtraining to why stretching isn't recommended.

Fit for America Harvey Green, 1986 It does seem to me that there would not be so much pain and suffering . . . if there were no doctors The skepticism reflected in this statement by a New York farmer in 1853, quoted in this fascinating study of medicine, American culture, and values, was definitely a sign of the times. Three medical philosophies and their offshoots—heroic, botanic, and homeopathic—were prevalent in the 19th century, often practiced by doctors with little more than six weeks of training. No wonder the skepticism of the masses and the high mortality rates. With meticulous scholarship, keen insight, and clear writing, Green shows how religion, the frontier spirit, ignorance about sanitation, and the national drive for perfection spawned these contrasting philosophies of health. A

lively social history with many lessons for our own time, recommended for public and academic libraries.--Library journal, Jack Forman, Mesa College Library, San Diego.
