Ideas in Food Aki Kamozaawa,H. Alexander Talbot,2010-12-28 Alex Talbot and Aki Kamozaawa, husband-and-wife chefs and the forces behind the popular blog Ideas in Food, have made a living out of being inquisitive in the kitchen. Their book shares the knowledge they have gleaned from numerous cooking adventures, from why tapioca flour makes a silkier chocolate pudding than the traditional cornstarch or flour to how to cold smoke just about any ingredient you can think of to impart a new savory dimension to everyday dishes. Perfect for anyone who loves food, Ideas in Food is the ideal handbook for unleashing creativity, intensifying flavors, and pushing one's cooking to new heights. This guide, which includes 100 recipes, explores questions both simple and complex to find the best way to make food as delicious as possible. For home cooks, Aki and Alex look at everyday ingredients and techniques in new ways—from toasting dried pasta to lend a deeper, richer taste to a simple weeknight dinner to making quick “micro stocks” or even using water to intensify the flavor of soups instead of turning to long-simmered stocks. In the book's second part, Aki and Alex explore topics, such as working with liquid nitrogen and carbon dioxide—techniques that are geared towards professional cooks but interesting and instructive for passionate foodies as well. With primers and detailed usage guides for the pantry staples of molecular gastronomy, such as transglutaminase and hydrocolloids (from xanthan gum to gellan), Ideas in Food informs readers how these ingredients can transform food in miraculous ways when used properly. Throughout, Aki and Alex show how to apply their findings in unique and appealing recipes such as Potato Chip Pasta, Root Beer-Braised Short Ribs, and Gingerbread Soufflé. With Ideas in Food, anyone curious about food will find revelatory information, surprising techniques, and helpful tools for cooking more cleverly and creatively at home.

Food Mark Hyman,2018-02-27 #1 New York Times bestselling author Dr. Mark Hyman sorts through the conflicting research on food to give us the skinny on what to eat. Did you know that eating oatmeal actually isn't a healthy way to start the day? That milk doesn't build bones, and eggs aren't the devil? Even the most health conscious among us have a hard time figuring out what to eat in order to lose weight, stay fit, and improve our health. And who can blame us? When it comes to diet, there's so much changing and conflicting information flying around that it's impossible to know where to look for sound advice. And decades of misguided common sense, food-industry lobbying, bad science, and corrupt food polices and guidelines have only deepened our crisis of nutritional confusion, leaving us overwhelmed and anxious when we head to the grocery store. Thankfully, bestselling author Dr. Mark Hyman is here to set the record straight. In Food: What the Heck Should I Eat? -- his most comprehensive book yet -- he takes a close look at every food group and explains what we've gotten wrong, revealing which foods nurture our health and which pose a threat. From grains to legumes, meat to dairy, fats to artificial sweeteners, and beyond, Dr. Hyman debunks misconceptions and breaks down the fascinating science in his signature accessible style. He also explains food's role as powerful medicine capable of reversing chronic disease and shows how our food system and policies impact the environment, the economy, social justice, and personal health, painting a holistic picture of growing, cooking, and eating food in ways that nourish our bodies and the earth while creating a healthy society. With myth-busting insights, easy-to-understand science, and delicious, wholesome recipes, Food: What the Heck Should I Eat? is a no-nonsense guide to achieving optimal weight and lifelong health.

Kid Food Bettina Elias Siegel,2019 It has never been so difficult to raise a healthy eater in America. Along with the picky eating and public tantrums that have forever tested the limits of parental patience, today's parents also fend off sophisticated assaults from outside their kitchens: unhealthy food-marketing campaigns aimed at kids; misleading product labels aimed at parents; and a school-food program so starved for cash that it sells name-brand junk food to grade school students. In Kid Food, nationally recognized food writer Bettina Elias Siegel (New York Times, The Lunch Tray) explores the cultural delusions and industry deceptions that have made it all but impossible to raise a healthy eater in America. Combining first-person reporting with the hard-won understanding of a food advocate and parent, it presents a startling portrayal of the current food landscape for children - and the role of parents in navigating it. Siegel also lifts the curtain on shadowy food industry front-groups, including clever marketing techniques that intentionally confuse parents about a product's nutritional value. (Did you know that made with real fruit may mean a product is less healthy?) What emerges is the industry's divide-and-conquer strategy, one that stokes kids' desire for junk food while breaking down parents' ability to act as responsible gatekeepers. For anyone who frets over what their child is eating, Kid Food offers both essential reading and a deeper understanding of the factors at play in their child's food environment. Written in the same engaging and relatable voice that has made The Lunch Tray a trusted resource for parents for almost a decade, Kid Food offers a well of compassion - and expertise - for those fighting the good fight at home.

Chicago Daniel R. Block, Howard B. Rosing, 2015-09-03 Chicago began as a frontier town on the edge of white settlement and as the product of removal of culturally rich and diverse indigenous populations. The town grew into a place of speculation with the planned building of the Illinois and Michigan canal, a boomtown, and finally a mature city of immigrants from both overseas and elsewhere in the US. In this environment, cultures mixed, first at the taverns around Wolf Point, where the forks of the Chicago River join, and later at the jazz and other clubs along the “Stroll” in the black belt, and in the storefront ethnic restaurants of today. Chicago was the place where the transcontinental railroads from the West and the “trunk” roads from the East met. Many downtown restaurants catered specifically to passengers transferring from train to train between one of the five major downtown railroad stations. This also led to “destination” restaurants, where Hollywood stars and their onlookers would dine during overnight layovers between trains. At the same time, Chicago became the candy capital of the US and a leading city for national conventions, catering to the many participants looking for a great steak and atmosphere. Beyond hosting conventions and commerce, Chicagoans also simply needed to eat—safely and relatively cheaply. Chicago grew amazingly fast, becoming the second largest city in the US in 1890. Chicago itself and its immediate surrounding area was also the site of agriculture, both producing food for the city and for shipment elsewhere. Within the city, industrial food manufacturers prospered, highlighted by the meat processors at the Chicago stockyards, but also including candy makers such as Brach's and Curtiss, and companies such as Kraft Foods. At the same time, large markets for local consumption emerged. The food biography of Chicago is a story of not just culture, economics, and innovation, but also a history of regulation and regulators, as they protected Chicago's food supply and built Chicago into a city where people not only come to eat, but where locals rely on the availability of safe food and water. With vivid details and stories of local restaurants and food, Block and Rosing reveal Chicago to be one of the foremost eating destinations in the country.

Good Clean Food Lily Kunin,2017-03-07 The creator of the Clean Food Dirty City brand shares 100 simple, vibrant, gluten- and dairy-free recipes for looking and feeling your best. In her debut cookbook, *Good Clean Food*, health coach Lily Kunin shares plant-based recipes for irresistibly clean, wholesome food. With Lily's less-is-more approach, you'll learn how to create nourishing dishes, bowls, salads, smoothies, and more using gluten- and dairy-free ingredients. Her delicious recipes are complemented by the same vibrant, textured, and stunning photography that has become a trademark of her popular site Clean Food Dirty City. Organized by the way that food makes you feel—awakened, nourished, cleansed, restored, sustained, and comforted—*Good Clean Food* highlights key ingredients that support healthy eating and clean living. The book contains a flavorful mix of recipes, including: Falafel Bowl with Mediterranean Millet and Green Tahini Walnut Taco Salad + Avocado Pesto Zucchini Noodles Evergreen Detox Bowl Sunny Immunity Smoothie Bowl Salted Caramel Bonbons The book also features a "Bowl Builder" section that walks readers through the process of building the perfect grain bowl, and provides helpful advice on how to stock a healthy kitchen and prep for the week ahead. Helpful tips and recipes instruct on using the same ingredients from your pantry for beauty enhancement, like a raw honey-turmeric facemask and rosemary-coconut oil hair treatment. "I love this vibrant, welcoming cookbook! Instead of structuring itself around rigid rules and restrictions, it leads by delicious example—first with Lily's story of how she healed herself through food, and then, most importantly, with dozens of fresh, wholesome, super-enticing recipes." —Lukas Volger, author of *Bowl*

Modern Food, Moral Food Helen Zoe Veit,2013-08-01 American eating changed dramatically in the early twentieth century. As food production became more industrialized, nutritionists, home economists, and so-called racial scientists were all pointing Americans toward a newly scientific approach to diet. Food faddists were rewriting the most basic rules surrounding eating, while reformers were working to reshape the diets of immigrants and the poor. And by the time of World War I, the country's first international aid program was bringing moral advice about food conservation into kitchens around the country. In *Modern Food, Moral Food*, Helen Zoe Veit argues that the twentieth-century food revolution was fueled by a powerful conviction that Americans had a moral obligation to use self-discipline and reason, rather than taste and tradition, in choosing what to eat. Veit weaves together cultural history and the history of science to bring readers into the strange and complex world of the American Progressive Era. The era's emphasis on science and self-control left a profound mark on American eating, one that remains today in everything from the ubiquity of science-based dietary advice to the tenacious idealization of thinness.

A Bone to Pick Mark Bittman,2015-05-05 Since his New York Times op-ed column debuted in 2011, Mark Bittman has emerged as one of our most impassioned and opinionated observers of the food landscape. The Times' only dedicated opinion columnist covering the food beat, Bittman routinely makes readers think twice about how the food we eat is produced, distributed, and cooked, and shines a bright light on the profound impact that diet—both good and bad—can have on our health and that of the planet. In *A Bone to Pick*, Mark's most memorable and thought-provoking columns are compiled into a single volume for the first time. As abundant and safe as the American food supply appears to be, the state of our health reveals the presence of staggering deficiencies in both the system that produces food and the forces that regulate it. Bittman leaves no issue unexamined; agricultural practices, government legislation, fad diets, and corporate greed all come under scrutiny and show that the issues governing what ends up in our market basket and on our tables are both complex and often deliberately confusing. Unabashedly opinionated and invariably thought provoking, Bittman's columns have helped readers decipher arcane policy, unpack scientific studies, and deflate affronts to common sense when it comes to determining what "eating well" truly means. As urgent as the situation is, Mark contends that we can be optimistic about the future of our food and its impact on our health, as slow-food movements, better school-lunch programs, and even "healthy fast food" become part of the norm. At once inspiring, enraging, and enlightening, *A Bone to Pick* is an essential resource for every reader eager to understand not only the complexities inherent in the American food system, but also the many opportunities that exist to improve it.

We Are What We Eat Alice Waters,2022-06-07 From chef and food activist Alice Waters, an impassioned plea for a radical reconsideration of the way each and every one of us cooks and eats In *We Are What We Eat*, Alice Waters urges us to take up the mantle of slow food culture, the philosophy at the core of her life's work. When Waters first opened Chez Panisse in 1971, she did so with the intention of feeding people good food during a time of political turmoil. Customers responded to the locally sourced organic ingredients, to the dishes made by hand, and to the welcoming hospitality that infused the small space—human qualities that were disappearing from a country increasingly seduced by takeout, frozen dinners, and prepackaged ingredients. Waters came to see that the phenomenon of fast food culture, which prioritized cheapness, availability, and speed, was not only ruining our health, but also dehumanizing the ways we live and relate to one another. Over years of working with regional farmers, Waters and her partners learned how geography and seasonal fluctuations affect the ingredients on the menu, as well as about the dangers of pesticides, the plight of fieldworkers, and the social, economic, and environmental threats posed by industrial farming and food distribution. So many of the serious problems we face in the world today—from illness, to social unrest, to economic disparity, and environmental degradation—are all, at their core, connected to food. Fortunately, there is an antidote. Waters argues that by eating in a "slow food way," each of us—like the community around her restaurant—can be empowered to prioritize and nurture a different kind of culture, one that champions values such as biodiversity, seasonality, stewardship, and pleasure in work. This is a declaration of action against fast food values, and a working theory about what we can do to change the course. As Waters makes clear, every decision we make about what we put in our mouths affects not only our bodies but also the world at large—our families, our communities, and our environment. We have the power to choose what we eat, and we have the potential for individual and global transformation—simply by shifting our relationship to food. All it takes is a taste.

The Little Food Book Craig Sams,2004 An explosive account of the food we eat today. This book will help you understand what's at stake.

Food Fights Charles C. Ludington,Matthew Morse Booker,2019 What we eat, where it is from, and how it is produced are vital questions in today's America. We think seriously about food because it is freighted with the hopes, fears, and anxieties of modern life. Yet critiques of food and food systems all too often sprawl into jeremiads against modernity itself, while supporters of the status quo refuse to acknowledge the problems with today's methods of food production and distribution. Food Fights sheds new light on these crucial debates, using a historical lens. Its essays take strong positions, even arguing with one another, as they explore the many themes and tensions that define how we understand our food--from the promises and failures of agricultural technology to the politics of taste. In addition to the editors, contributors include Ken Albala, Amy Bentley, Charlotte Biltekoff, Peter A. Coclanis, Tracey Deutsch, S. Margot Finn, Rachel Laudan, Sarah Ludington, Margaret Mellon, Steve Striffler, and Robert T. Valgenti.

The Visual Food Encyclopedia François Fortin,1996-10-15 The Visual Food Encyclopedia What does a tree tomato look like? What's the difference between a turnip and a rutabaga? Where does malanga come from? How do you trim an artichoke bottom? The Visual Food Encyclopedia answers all these food questions—and thousands more. The Visual Food Encyclopedia is the cook's companion in the market and the kitchen, illustrating and explaining everything other cookbooks assume you already know. It takes you by the hand and, with a no-nonsense approach, tells you how to look for freshness, when to buy each ingredient at its peak, how to store it once you get it home, and the best methods of preparation and cooking. This extensive guide covers more than 1,000 ingredients, including: 70 different kinds of vegetables 63 varieties of fruits 37 types of meat 62 species of fish 34 different cereals and grains 47 herbs, spices, and condiments 30 kinds of cheese and milk products Varieties of nuts and seeds, mushrooms, seaweed, sugars, fats and oils, and coffee and tea. In large part, the explaining is done with pictures, over 1,200 of them. The state-of-the-art computer images are so clear and richly colored, you'll want to eat the food right off the page. And because you just have to see how some things are done, like cutting a chicken into serving pieces, basic techniques are clearly illustrated with original step-by-step photographs. This unique book doesn't ignore health concerns either. All the entries include nutritional highlights. A glossary of terms along with a comprehensive index of the technical and most commonly known names for each entry are provided at the end of the book. Plus, while this is an encyclopedia, not a cookbook, serving ideas and traditional recipes using selected ingredients are featured. From the novice cook to the experienced chef, there are timeless lessons to be learned from The Visual Food Encyclopedia.

Food Warren Belasco,2008-09-01 Food: The Key Concepts presents an exciting, coherent and interdisciplinary introduction to food studies for the beginning reader. Food Studies is an increasingly complex field, drawing on disciplines as diverse as Sociology, Anthropology and Cultural Studies at one end and Economics, Politics and Agricultural Science at the other. In order to clarify the issues, Food: The Key Concepts distills food choices down to three competing considerations: consumer identity; matters of convenience and price; and an awareness of the consequences of what is consumed. The book concludes with an examination of two very different future scenarios for feeding the world's population: the technological fix, which looks to science to provide the solution to our future food needs; and the anthropological fix, which hopes to change our expectations and behaviors. Throughout, the analysis is illustrated with lively case studies. Bulleted chapter summaries, questions and guides to further reading are also provided.
