Strap! Forex Automated Trading Software Can Make You Millions! Jasuli Suliadi,2019-08-14 This book aims to debunk beliefs that Forex Robot (EAs for short) is a myth and that there is no software out there that can trade Forex automatically totally without human supervision. From a simple EA to a compound EA to a multi-time frame compound EA I aim to prove the skeptics wrong by showing how in nine years I had developed one of the most accurate EAs you can find in the market where profit/loss win ratio is concerned. My findings in this book could save you years if you're a budding EA developer. I will show you how I make a simple MacD EA, how I combine EAs and how I use higher time frames and time factors to improve their performances. I came across truths in of Law of Large Numbers (rigorous testing), Law of Diminishing Returns (using too much filters), Fibonacci Sequence (the larger Cycle is interdependent on the smaller Cycles) and many more learning experiences as an EA developer. If you work in the Trading Department of a bank this book is proof that not all Algorithms exist in High Speed. With the COMP EAs all losses are paper losses ...

Forex Trading Robot and A.I. Development Nsikak Edet,2020-10-15 Forex trading is big business and looks like a time-consuming task to undertake. Renko Forex strategy - Let's make money Geza Varkuti,2015-01-23 The first step on the road to perfection is to focus on the essentials. There is an ancient Japanese proverb, which sounds like this. It hasn't been put here by accident. On the following pages a centuries-old Japanese technique, the actual application of the Renko chart will be discussed. According to the descriptions, rice traders used this technique to visualize the movement of the rice prices. Were they the first futures traders? The Japanese culture is known for simple elegant forms and clear lines, both in the world of design and thought, but this simplicity originates from reducing things to their most essential content. If we see a chart of a currency pair, index or a bond today, we can read a lot of information out of it. Opening and closing prices can be seen up to 1 minute resolution, peaks, volumes, etc. Now if we pack up a few more indicator to the chart, draw more trend lines, look at Fibonacci-levels etc. we believe we know almost everything about the current status of the market, but what does all this really tell us about the future? Does it really help us to make trading decisions, or is all that wealth of information just giving us the illusion of predictability? The Renko charts do not care about the time, but are solely focused on the movements. It only shows that the price has taken a certain distance or not. No matter how long that takes. This creates a clean chart with no unnecessary information, which is much easier to read. This is the basic of my winning strategy.
