Mini Baby Countdown Clock Tracy Guth Spangler,2005-05-11 Here's just the thing for an excited expectant couple: a miniature digital clock that will count down the time from the moment of conception (if it's programmed just right!) to the baby's birth, plus a book of advice for expectant parents on things to do to prepare for the baby's arrival. The battery-operated clock can be reprogrammed for many uses.

The Baby Countdown Clock Tracy Guth Spangler,2004-06-15 From the moment the pregnancy test reads positive, everything in a pregnant woman's life involves counting down to the big day. This fully illustrated, gently humorous kit takes expectant parents from the first days of pregnancy to the final moment. Embedded in the front cover is a detachable, reusable digital clock that counts years, months, days, hours, minutes, and seconds backward to 0:00, plus batteries and instructions on using the clock. The 64page book fills parents in on all the prep work to be done before the baby arrives, including shopping for maternity clothes, baby-proofing the house, the mother-to-be's cravings, even what to pack for that life-altering trip to the hospital.

Utilizing A Patent 1440 Minute Countdown Clock Vicky Conyer,2021-07-15 This book will truly help you realize how much time you have available. If you decide to apply these concepts it will greatly increase your perceived quantity of time and more importantly will greatly increase the quality of every minute in your life. The 1440 Power System(R) expands on the concepts from The Time Factor. It is the connector! It breaks down further the 1,440 minutes we have each day into three separate time zones. Each is having its purpose, and when recognized the full power of the 1440-Experience will begin to emerge! The zones are SLEEP/LIVELIHOOD/ON-TIME. ON-TIME is the difference maker and replaces the words off, free, spare, and down! When you chunk down your day into this pure awareness, life becomes organized, leveraged, and powerful. 1440TIME(TM) is the cornerstone of this 21st-century principle, utilizing a patent 1440 Minute Countdown Clock as the instrument to activate our time awareness, turning our standard clock into a tangible reality and not just a number on a circular sphere!

Optimizing Discovery Systems to Improve User Experience Bonnie Imler,Michelle Eichelberger,2017-05-24 Two authors with more than 40 years of combined library experience tap into their wealth of knowledge about discovery and user experience, sharing proven methods for setting up, promoting, and teaching their own discovery systems. Discovery systems are the new one-stop search model for libraries, but simply implementing the software doesn't ensure that it will meet your users' search needs. This book looks at how discovery systems are actually used by examining the findings of several user experience (UX) studies, providing data and observations that will inform your decisions about selecting, implementing, and enhancing this software. This book provides library practitioners who choose, administer, and interact with discovery systems with insight for establishing or fine-tuning a discovery system. You will understand how the use and effectiveness of the top discovery systems compare to more traditional databases and web resources, get insight into the comparative strengths and weaknesses of the best-selling discovery systems, and examine the UX research findings of the authors on student response and faculty response. You'll also learn about key configuration options that help or hinder search success with these systems and affect content selection, linking software setup, and interlibrary loan processes. The book concludes with recommended best practices for promoting discovery systems, including web design, placement on the library's website, getting coworkers on board, and PR ideas.
