A Radical Guide for Women with ADHD Sari Solden, Michelle Frank, 2019-07-01 Live boldly as a woman with ADHD! This radical guide will show you how to cultivate your individual strengths, honor your neurodiversity, and learn to communicate with confidence and clarity. If you are a woman with attention deficit/hyperactivity disorder (ADHD), you've probably known—all your life—that you're different. As girls, we learn which behaviors, thinking, learning, and working styles are preferred, which are accepted and tolerated, and which are frowned upon. These preferences are communicated in innumerable ways—from media and books to our first-grade classroom to conversations with our classmates and parents. Over the course of a lifetime, women with ADHD learn through various channels that the way they think, work, speak, relate, and act does not match up with the preferred way of being in the world. In short, they learn that difference is bad. And, since these women know that they are different, they learn that they are bad. It's time for a change. A Radical Guide for Women with ADHD is the first guided workbook for women with ADHD designed to break the cycle of negative self-talk and shame-based narratives that stem from the common and limiting belief that brain differences are character flaws. In this unique guide, you'll find a groundbreaking approach that blends traditional ADHD treatment with contemporary treatment methods, such as acceptance and commitment therapy (ACT), to help you untangle yourself from the beliefs that have kept you from reaching your potential in life. If you're ready to develop a strong, bold, and confident sense of self, embrace your unique brain-based differences, and cultivate your individual strengths, this step-by-step workbook will help guide the way.

You'll learn how to deploy iptables as an IDS with psad and fwsnort and how to build a strong, passive authentication layer around iptables with fwknop. Concrete examples illustrate concepts such as firewall log analysis and policies, passive network authentication and authorization, exploit packet traces, Snort ruleset emulation, and more with coverage of these topics: -Passive network authentication and OS fingerprinting -iptables log analysis and policies -Application layer attack detection with the iptables string match extension -Building an iptables ruleset that emulates a Snort ruleset -Port knocking vs. Single Packet Authorization (SPA) -Tools for visualizing iptables logs Perl and C code snippets offer practical examples that will help you to maximize your deployment of Linux firewalls. If you're responsible for keeping a network secure, you'll find Linux Firewalls invaluable in your attempt to understand attacks and use iptables—along with psad and fwsnort—to detect and even prevent compromises.
