⯀ 🅑 Hardware The Open The Open Courses Library,2019-12-12 Hardware Information Systems for Business An information system is made up of five components: hardware, software, data, people, and process. The physical parts of computing devices – those that you can actually touch – are referred to as hardware. In this book, you will take a look at this component of information systems, learn a little bit about how it works, and discuss some of the current trends surrounding it. Besides these more traditional computer hardware devices, many items that were once not considered digital devices are now becoming computerized themselves. Digital

technologies are being integrated into many everyday objects so the days of a device being labeled categorically as computer hardware may be ending. Examples of these types of digital devices include automobiles, refrigerators, and even beverage dispensers. In this book, you will also explore digital devices, beginning with defining what is meant by the term itself. Chapter Outline: Digital Devices 7 Tour of a PC 11 Other Computing Devices 21 The Commoditization of the Personal Computer The Open Courses Library introduces you to the best Open Source Courses.
