Runes and Magic Stephen E. Flowers,1986 From the beginnings of the scientific study of runes, questions concerning their magical nature have been raised. In this book Stephen Flowers puts this question in the context of current theories of magic for the first time. He approaches problems of runes and their connection to magical thinking from a structural standpoint based on linguistic models of communication. Certain formulas are isolated and analysed as to the possible ways in which they could be considered «magical» within the context of general conceptions of magic in archaic Germanic culture. Flowers'analysis of the runic evidence from the perspective of current theories of magic and the history of writing systems brings us a good measure closer to a comprehensive answer to the riddle of the runes.

Runes Made Easy Richard Lister,2021-11-30 A new addition to the Made Easy series, this book will teach readers about the ancient power of Northern traditions, the runes and their magic. This is your key to unlocking the ancient power and wisdom of the runes and their magic. Learn how to use them for divination, guidance and more. The runes are some of the most powerful tools available to you. They are more than just a method of words and writing: each rune has a phonetic sound, similar to the sounds heard in Norwegian or Icelandic. They were used to communicate, for divination, to provide guidance and were also bound together to make magic spells. In this insightful, practical book, Rich Lister will provide you with a resource that you can use to build your knowledge and develop your own relationship with the runes. In Runes Made Easy, you will discover: an introduction to Norse mythology and the role of the runes within it how to use and work with each rune how to make your own set of runes, which materials to use and how the material you choose impacts the energy and resonance of the runes the characteristics and meaning of each of the 24 Elder Futhark runes how to set an intention for your rune use The runes, if used and treated with respect and honour, provide a support system and life-navigation tool. When you learn how to use them, you'll receive the guidance and answers you've been looking for. 'Rich is the real deal. He's a Viking warrior with a healing heart and soul.' - Kyle Gray, bestselling author of Raise Your Vibration

The Armanen Runes - An Operator's Manual Douglas Buchanan,2022-11-24 When most people hear of yoga the one that usually comes to mind is Hatha Yoga. The several others, for which Hatha Yoga is only a preparation, are largely unknown to the public at large. The same is true of the Runes. If anyone has ever heard of the Runes they are likely to be thinking of the Elder Futhark runes made popular by the effective marketing of Ralph Blum's book, with its splendid set of cast runes. Handling these runes brought back ancient memories to many people with European DNA. The Sacred Eighteen Armanen Runes are the magician's runes. In many parts of Europe these are the runes that come to mind whenever runes are discussed. The immense magickal power of these runes is associated with all their shapes being derived from the hexagon and its associated diameters. Everyone has heard about Solomon's Seal or the Star of David, made by merging two equilateral triangles into one another. This figure is associated with the magick of the Kabbalah and holds the secret of the exact dimensions of the Tree of Life. The Armanen Runes, by virtue of their geometry are connected with the ancient Kabbalistic magick and the work of the alchemists who used the hexagon and its triangles as symbols of the elements. Anyone from any path involving ritual magick could experience the boost given to their work by using the Armanen Runes. Because of the neutrality of their geometric forms they can cross all magickal egregores as a cohesive magickal system. Everything in this book is derived from my own experience and the practical experiences of personal students, men and women, studying the runes to improve their magickal abilities or spiritual insights, and to harness the powers of the runes for personal use. These are the runes that have worked through the centuries. It is my hope that these data and methods of using the runes will inspire the magickal or spiritual work of the reader, no matter what his or her path is, or may become. For the average student the material herein is about two years work. It's not like a newspaper report that you read straight through. Every bit reinforces every other bit whether going ahead, or reviewing. Practicing the exercises makes you a runist. Reading the words only exercises your eyes, and is pretty much a waste of what's left of your current incarnation. Douglas Buchanan.

Combing historical lore with a detailed investigation, Runelore focuses on the esoteric aspects of the runic tradition. In Part One, Historical Lore, Thorsson uses archaeological evidence to explain where the runes come from, what they mean, and how they evolved. In Part Two, Hidden Lore, he takes a more psychological view of the runes and looks at the entire cosmology of the Old Norse to explain the role runes played and how they were used over time. Included are specific sections on rune magic and divination, rune poems, runic numerology, and concise explanations of the mysteries of the 24 runes. Complete with a unique set of illustrations, The Runes is a great beginner's guide to this writing system, which was also and can still be used for magical purposes. They are a key to the wisdom of the ancient peoples who used them in language, life and magic, with these surviving writings not only clarifying these uses, but providing at least the bones of what you need to use them yourself today. A world view that doesn't hide the warts, but that finds plenty worth loving at the same time. Step into the world of the Runes on steady feet, and start a spiritual journey from which you may never wish to turn back.

The Wisdom of the Kabbalah Philosophical Library,2010-11-16 DIV DIVDIVExplore the third of the great literatures in Judaism/divDIV /div/divDIVWhile many readers may have heard of Kabbalah in recent years, how many understand the origins and unique perspective of this collection of Jewish mystical beliefs? Handed down in the oral tradition for thousands of years and transcribed in fourteenth-century Spain, the Kabbalah is the classical expression of Jewish mysticism. This collection draws from the main work of Kabbalah—Sepher ha-Zohar, or The Book of Splendor—and offers insight into the great body of Hebrew literature that sprang up and grew parallel to the traditional writings of rabbinical literature. Written in the dialectic style as a commentary to the Torah, the Kabbalah examines man's mystical union with God in thoughts of wisdom and deeds of kindness through a symbol-laden examination of the God before creation. A mix of ethics and mysticism, Kabbalah's wisdom is frequently imparted through gematria, or a symbolic language based in numbers that correspond with the letters of the Hebrew alphabet./divDIV /divDIVThis ebook features a new introduction, image gallery, and index of the Hebrew alphabet./div /div

The Practical Guide To Using Ancient Runes For Modern Divination Dayanara Blue Star,2015-02-15 Runes are an ancient method of divination that still remain popular and useful today. Many people find them intriguing, because of their unique history and specific means of divination. Unlike fortune telling, runes are used to delve into a person's subconscious, and explore their true desires. They can be a wonderful aid in meditational practice, gaining self-awareness, or just getting some more perspective on various situations in your life. To people unfamiliar with divination tools, it may seem like some kind of spooky magic trick, witchcraft or even something demonic. None of those descriptions are accurate, and actually, runes encourage a person to explore their own mind and gain self-introspection. Initially part of an ancient Germanic alphabet, Runes have existed for hundreds of years. Versions of runes have been found in many different cultures all across the world, with stones created in a multitude of alphabets and designs. Simply put, runes are an old relic that has survived the test of time and is still proven useful today. The stones are a simple oracle which one can use to stimulate the thinking process. When the stones are cast, they aren't always entirely specific, meaning it is up to you to consider what they are telling you and how it relates to what you were asking. This often opens that pathway for critical thinking, solving problems and reducing stress.
