Fast forward to today, and an average Joe can have one running in minutes. There are now a lot of companies providing website services, driving costs down on the part of consumers. Making it even better, some of these companies are generous enough to let you have a website without paying anything. However, it's not everyone who knows how to get a free website. Besides, having a lot of companies that provide the same thing can leave you confused and not knowing which one to choose. Actually, if you are not careful, you can end up paying a high price for something that was advertised as free. This book will act as your guide to getting a free website. But, as you may know, free usually comes at a cost. So, we will look at the pros and cons of going down this road. I will then show you how easy it can be to set up a free website. But, since a website will do nothing on its own, I will also give you tips on how you can increase traffic with great content, SEO, and other methods. I'm sure you will find this book useful, so without wasting any more time, let's get started, because a free website awaits you.

Due to advancements in web designing, you do not need to spend years learning HTML; "drag and drop" website builders make everything easy for newbies. Sweetening the deal even further, you can create your website without spending a penny. However, the difficult part is finding a good provider that will let you make a decent free website. As you may know, "free" usually comes at a cost. In this book, not only will I show you how to create a website, but I will also recommend some of the best free website providers you can sign up with. Anyone who has ever started a website knows that making it is easy. But, finding motivation to keep it going is the most difficult part. So, I will also give you tips you can follow to keep on creating content. Furthermore, there are sections in the book dealing with website promotion, SEO, and other topics. Since the internet can be dangerous to young people, I recommend that you communicate to your parents or guardians about your intentions to make a free website. It's even better if they take part in the whole process. So without further ado, let's get started.
