Freeware Rudy Rucker,2017-08-14 Now, in 2053, 'moldies' are the latest robotic advancement-evolved artificial lifeforms made of soft plastic and gene-tweaked molds and algae, so anatomically inventive and universally despised that their very presence on the planet has thrown the entire low-rent future into a serious tailspin. So the moon is the place to be, if you're a persecuted 'moldie' or an enlightened 'flesher' intent an creating a new, more utopian hybrid civilization. Of course up there, there are other intergalactic intelligences to contend with-and some not so intelligent-who have their own agendas and appetites.Rudolf von Bitter Rucker is an American mathematician, computer scientist, science fiction author, and philosopher, and is one of the founders of the cyberpunk literary movement. The author of both fiction and non-fiction, he is best known for the novels in the Ware Tetralogy, the first two of which (Software and Wetware) both won Philip K. Dick Awards.As his own alternative to cyberpunk, Rucker developed a writing style he terms: Transrealism, as outlined in his 1983 essay The Transrealist Manifesto, is science fiction based on the author's own life and immediate perceptions, mixed with fantastic elements that symbolize psychological change. Many of Rucker's novels and short stories apply these ideas.Rucker often uses his novels to explore scientific or mathematical ideas; White Light examines the concept of infinity, while the Ware Tetralogy (written from 1982 through 2000) is in part an explanation of the

use of natural selection to develop software (a subject also developed in his The Hacker and the Ants. His novels also put forward a mystical philosophy that Rucker has summarized in an essay titled, with only a bit of irony, The Central Teachings of Mysticism.
