Art Made from Books ,2013-08-20 Artists around the world have lately been turning to their bookshelves for more than just a good read, opting to cut, paint, carve, stitch or otherwise transform the printed page into whole new beautiful, thought-provoking works of art. Art Made from Books is the definitive guide to this compelling art form, showcasing groundbreaking work by today's most showstopping practitioners. From Su Blackwell's whimsical pop-up landscapes to the stacked-book sculptures of Kylie Stillman, each portfolio celebrates the incredible creative diversity of the medium. A preface by pioneering artist Brian Dettmer and an introduction by design critic Alyson Kuhn round out the collection.

Printer's Error J. P. Romney,Rebecca Romney,2017-03-14 A funny and entertaining history of printed books as told through absurd moments in the lives of authors and printers, collected by television's favorite rare-book expert from HISTORY's hit series Pawn Stars. Since the Gutenberg Bible first went on sale in 1455, printing has been viewed as one of the highest achievements of human innovation. But the march of progress hasn't been smooth; downright bizarre is more like it. Printer's Error chronicles some of the strangest and most humorous episodes in the history of Western printing, and makes clear that we've succeeded despite ourselves. Rare-book expert Rebecca Romney and author J. P. Romney take us from monasteries and museums to auction houses and libraries to introduce curious episodes in the history of print that have had a profound impact on our world. Take, for example, the Gutenberg Bible. While the book is regarded as the first printed work in the Western world, Gutenberg's name doesn't appear anywhere on it. Today, Johannes Gutenberg is recognized as the father of Western printing. But for the first few hundred years after the invention of the printing press, no one knew who printed the first book. This long-standing mystery took researchers down a labyrinth of ancient archives and libraries, and unearthed surprising details, such as the fact that Gutenberg's financier sued him, repossessed his printing equipment, and started his own printing business afterward. Eventually the first printed book was tracked to the library of Cardinal Mazarin in France, and Gutenberg's forty-two-line Bible was finally credited to him, thus ensuring Gutenberg's name would be remembered by middle-school students worldwide. Like the works of Sarah Vowell, John Hodgman, and Ken Jennings, Printer's Error is a rollicking ride through the annals of time and the printed word.

From Dissertation to Book William Germano,2014-02-27 How to transform a thesis into a publishable work that can engage audiences beyond the academic committee. When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. "You know something!" I would say if it could hear me. "Now tell it to us in language we can understand!" Since its publication in 2005, From Dissertation to Book has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of From Dissertation to Book is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. He also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, he reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add "author" to their curriculum vitae.

From Ghent to Aix Paul Arblaster,2014-06-10 Exploring the early decades of print journalism in the cities at Northern Europe's information crossroads, From Ghent to Aix reveals how news of war, diplomacy and politics travelled, and how political and commercial imperatives shaped the ways it was presented.

From Financial Crisis to Global Recovery Padma Desai,2011-06-01 In this book, Padma Desai makes the complexities of economic policy and financial reform accessible to a wide audience. Merging a compelling narrative with scholarly research, she begins with a systematic breakdown of the factors leading to America's recent recession, describing the monetary policy, tax practices, subprime mortgage scandals, and lax regulation that contributed to the crisis. She also discusses the Treasury-Fed rescue deals that saved several financial institutions and the involvement of Congress in passing restorative policies. Desai follows with an analysis of stress tests and other economic measures, and she frankly assesses whether the U.S. economy is truly on the mend. Expanding her view, she considers the prospects for recovery in North America as a whole, as well as in Europe, Asia, and South America, and the extent and value of U.S. and E.U. regulatory proposals. Refocusing on American financial practices, Desai evaluates hedge funds and derivatives, credit default swaps, and rating agencies, pondering whether the dollar can remain a reserve currency. She concludes with a historical comparison of the Great Depression and the Great Recession, weighing the effect of the economic collapse on the future of American capitalism.

Cynicism from Diogenes to Dilbert Ian Cutler,2005-07-01 Cynicism began as a school of philosophy that was largely inspired by Socrates and often decried by popular commentators as a social pathology, a nihilistic rebellion against the foundations of civilization. Modern definitions of the cynic describe an individual who is negative and sarcastic, violently opposed to established authority and social convention, and dedicated to existentialism. This book attempts to vindicate cynicism, arguing that it is both a progressive approach to social dilemmas and an enlightened understanding of the human condition. Chapter One establishes the foundations of classical Greek cynicism, while later chapters illustrate the varied faces of the cynic phenomenon in the persons of such disparate characters as Machiavelli, Nietzsche, Diogenes, the Dadaists, George

Bataille, Samuel Beckett, Auberon Waugh, the creators of South Park, and others. Nietzsche is portrayed as the most important representative of both classical and postmodern cynicism, as well as the pivotal link between the two. The book focuses on significant periods of historical change, such as the Renaissance, and the historical cynics responsible for several seminal social ideas, including cosmopolitanism (citizenship of the world), asceticism (personal growth through self-testing), and parrhesia (finding one's voice in the presence of tyrannical forces). The author claims that aspects of Greek cynicism are present in contemporary society, offering a positive strategy for living in a hostile world.

Notes from the Bowery Benedict Giomo,2010-01-06 In the U.S., the homeless have traveled from the freight train to the shelter. Skid row was an extended stop along the way. Giomo reveals his encounter with the city and old Bowery of the 1970s. He simply followed the drift of homelessness. When it led him to the Bowery, the historic skid row, he dropped down to what had been, and still was at that time, the netherworld of New York City. Striving to attain authenticity, the author and his collaborator immersed themselves in the usual activities of the area and befriended the residents. As a result, they were enlightened about the lifestyle and meaning of skid row homelessness. Notes from the Bowery combines the personal essay, literary nonfiction, and cultural history to represent the significance of American life in the city and on the skids. Engaging, insightful, and deeply felt, Notes from the Bowery will give readers an enriching experience as they accompany the author on a journey of descent and discovery. Light from Darkness Samael Aun Weor,2012-05-01 Everything in existence functions because of laws of nature. Knowledge of those laws is what allows us to accomplish anything in life. Our spiritual and religious life is no different. Spiritual awakening is also managed by laws in nature. On every level of existence, there are basic facts that manage creation, development, decay, and death. Our consciousness or soul is no exception to these facts, and by knowing about them, we can achieve our complete development as a human being. Samael Aun Weor explains the fundamental laws and energies that we need to consciously harness in order to reach our full potential. These are the same energies that fuel the creation of any organism, from the smallest atom to the most expansive universe. The human being is called to be a radiant king or queen of nature, but to arrive at that level, one must know how.

Journey from Kilimanjaro Hoover Liddell,2000-09-01 This book is about the youth, schools, places, and ideas that significantly deepen my life. It examines insights, philosophies, and observations that I read, question, seriously investigate, and live. The students in the classroom can be natural inquirers who through connections they discover make sense of the world and the things and ideas they pursue and question. These students, just as humankind from its beginning journey and exploration, use a fundamental approach to observe, investigate and probe to understand the world. This is the source of our human depth and learning.

Learning from Memory Bianca Maria Pirani,Ivan Varga,2011-05-25 This challenging book, with excellent contributions from international social scientists, focuses on the link between body and memory that specifically refers to the use of digital technologies. Neuroscientists know very well that human beings automatically and unconsciously organize their experience in their bodies into spatial units whose confines are established by changes in location, temporality and the interactive elements that determine it. Our memories might be less reliable than those of the average computer, but they are just as capacious, much more flexible, and even more user-friendly. The aim of the present book is to outline, by the body, what we know of the sociology of memory. The authors and editors believe that an analysis at the sociological level will prove valuable in throwing light on accounts of human behavior at the interpersonal and social level, and will play an important role in our capacity to understand the neurobiological factors that underpin the various types of memory. This book is an ideal resource for advanced and postgraduate students in social sciences, as well as practitioners in the field of Information and Communication technologies. Scholarly and accessible in tone, Learning from Memory: Body, Memory and Technology in a Globalizing World will be read and enjoyed by members of the general public and the professional audience alike.

Controlling Emissions from Wood Burning Thomas Levander,Svante Bodin,2014-04-07 This report has been produced by the International Cryosphere Climate Initiative (ICCI) under a grant from the Nordic Council of Ministers under its Arctic Cooperation Program, as part of a pilot project to reduce emissions of black carbon reaching the Arctic from residential heating from wood burning in Nordic countries. The report reviews legislation and other measures in the Nordic countries pertinent to the reduction of particulate matter (PM2.5) and Black Carbon (BC) –soot. It then assesses the effectiveness of the different policy instruments used in the Nordic countries as well as points to measures which may be most effective in reducing emissions of Black Carbon and PM2.5 from wood burning.

Evidence from Earth Observation Satellites Ray Purdy,Denise Leung,2012-11-21 Evidence from Earth Observation Satellites is an edited collection analysing emerging legal issues surrounding the use of satellite data as evidence. It considers whether data from satellite technologies can be a legally reliable, effective evidential tool in contemporary legal systems.
