Handbook of Research on the Global Impacts and Roles of Immersive Media Morie, Jacquelyn Ford, McCallum,

Kate, 2019-12-06 The world is witnessing a media revolution similar to the birth of the film industry from the early 20th Century. New forms of media are expanding the human experience from passive viewership to active participants, surrounding and enveloping us in ways film or television never

could. New immersive media forms include virtual reality (VR), augmented reality (AR), mixed reality (XR), fulldome, CAVEs, holographic characters, projection mapping, and mixed experimental combinations of old and new, live, and generated media. With the continued expansion beyond the traditional frame, practitioners are crafting these new media to see how they can influence and shape the world. The Handbook of Research on the Global Impacts and Roles of Immersive Media is a collection of innovative research that provides insights on the latest in existing and emerging immersive technologies through descriptions of case studies, new business models, philosophical viewpoints, and scientific findings. While highlighting topics including augmented reality, interactive media, and spatial computing, this book is ideally designed for media technologists, storytellers, artists, journalists, designers, programmers, developers, manufacturers, entertainment executives, content creators, industry professionals, academicians, researchers, and media students.

Cyprus in the Long Late Antiquity Panayiotis

Panayides, Ine Jacobs, 2023-02-28 Cyprus was a thriving and densely populated late antique province. Contrary to what used to be thought, the Arab raids of the mid-seventh century did not abruptly bring the island's prosperity to an end. Recent research instead highlights long-lasting continuity in both urban and rural contexts. This volume brings together historians and archaeologists working on diverse aspects of Cyprus between the sixth and eighth centuries. They discuss topics as varied as rural prosperity, urban endurance, artisanal production, civic and private religion and maritime connectivity. The role of the imperial administration and of the Church is touched upon in several contributions. Other articles place Cyprus back into its wider Mediterranean context. Together, they produce a comprehensive impression of the quality of life on the island in the long late antiquity.

Climate Change and Museum Futures Fiona Cameron, Brett Neilson, 2014-12-05 Climate change is a complex and dynamic environmental, cultural and political phenomenon that is reshaping our relationship to nature. Climate change is a global force, with global impacts. Viable solutions on what to do must involve dialogues and decision-making with many agencies, stakeholder groups and communities crossing all sectors and scales. Current policy approaches are inadequate and finding a consensus on how to reduce levels of greenhouse gases in the atmosphere through international protocols has proven difficult. Gaps between science and society limit government and industry capacity to engage with communities to broker innovative solutions to climate change. Drawing on leading-edge research and creative programming initiatives, this collection details the important roles and agencies that cultural institutions (in particular, natural history and science museums and science centres) can play within these gaps as resources, catalysts and change agents in climate change debates and decision-making processes; as unique public and trans-national spaces where diverse stakeholders, government and communities can meet; where knowledge can be mediated, competing discourses and agendas tabled and debated; and where both individual and

collective action might be activated.

Basics Animation 01: Scriptwriting Paul Wells,2007-08-13

Basics Animation: Scriptwriting addresses the full range of approaches to scripting and developing for animated films. It details the issues faced by the animation scriptwriter, and the techniques to overcome them. It also seeks to promote the unique qualities of animation as a form of expression, using many images to illustrate and emphasise points made in the text. This book looks at genres in animation as a starting point for scripting, employing a range of case studies from feature films to public relations work to independent productions, in order to reveal a range of approaches to writing.

Recent Advances in Ambient Intelligence and Context-Aware Computing Curran, Kevin,2014-11-30 Modern devices, from phones and cars to houses and the appliances within them, are being designed with formidable computational power and expanded functionality. To be truly effective, these smart devices must effectively process data from their environment and experiences and make decisions based on that information. Recent Advances in Ambient Intelligence and Context-Aware Computing investigates the functionality of ubiquitous computational systems and how they may adapt to their environment to improve the quality of interaction for the end-user. This reference book will be of value to under- and post-graduate students, professionals, and researchers in networking, computer science, communications, and other information technology disciplines.
