The author is Matthew Gumke: Matthew Gumke is a 24 year old

Entrepreneur and Philanthropist who created his first 6 figure online business in 2017. Matthew has built a personal brand of over 100,000 Facebook followers and over 50,000 Instagram followers, along with being featured in major publications for his businesses for his expertise in SEO. Learning SEO led Matthew into many different industries, along with creating his own books and programs to teach people how he's been able to monetise Google Search Engine to create multiple income streams.Matthew's notable mentors and business partners include Tony Robbins, Naveen Jain, Forbes Riley, Tai Lopez and Ekim Kaya.Being 1st on Google maps is crucially important. To rank, you'll need to learn Google Maps SEO. When searching for a local business, many consumers search through maps. If you're not 1st on Google maps, you're losing: - Money, lots of money. Every single day, a potential long-term customer is going to your competitor. Unless the customer has a bad experience, it's likely you won't have them as a customer the rest of their life. Being 1st on Google maps isn't just costing you money on a day to day basis, it's negatively impacting every day the rest of your life. - Impact. You love your business, your business helps people. You're doing your customers a disservice when they search for a local business and go to a competitor. This effects the amount of impact you can leave in the world. - Respect. If you're not 1st on Google, you'll lose respect in the eyes of many of your customers. They won't see you as the market leader. They'll try to negotiate discounts and haggle you for every penny. It's not just your

customers, you'll lose respect in the eyes of many business owners. They won't think you're serious about your business. As a result, you'll lose referrals and other opportunities. - Freedom. The difference between freedom for many business owners is a 1st place Google ranking. When you're first on Google, you don't need to prospect for new customers. By dominating your industry, you can easily create time freedom. It's not the best business owner that gets freedom, it's the business owner that's first on Google. I could list more reasons why your business needs to be 1st on Google maps but to be honest, I don't want to disrespect your intelligence. If you didn't know you need to be 1st on Google maps, you wouldn't be reading this. In this book, I've laid out 8, easy to follow steps. An idiot could do this. SEO doesn't need to be difficult. It's really easy once you know everything. Anyone that tells you it's really difficult and you can't do it yourself is trying to sell you their services. Someone with no computer experience could follow these 8 steps and rank first on Google maps. What are you waiting for? Read the book today and ROCKET your business to the top.

Earth is a geographic browser or geobrowser which means that it can access images from satellites, the air, ocean, and other geographical data by using the internet. It represents the Earth as a three-dimensional globe. In simpler terms, it is a computer program that uses satellite imagery to provide a representation of the earth. It was first released on June 11, 2001. Subsequent versions were released thereafter, including the most recent version called Google Earth Update. Google Earth displays satellite imagery of the Earth's surface so that users can view cities, oceans, and pretty much almost all of the earth in 3D, or three dimensions. Users can also add their own data and make them available. There are many other things that users can do with Google Earth, and they will be mentioned further on in the book.
