<u>Google's PageRank and Beyond</u> Amy N. Langville,Carl D. Meyer,2006-07-23 Why doesn't your home page appear on the first page of search results, even when you query your own name? How do other web pages always appear at the top? What creates these powerful rankings? And how? The first book ever about the science of web page rankings, Google's PageRank and Beyond supplies the answers to these and other questions and more. The book serves two very different audiences: the curious science reader and the technical computational reader. The chapters build in mathematical sophistication, so that the first five are accessible to the general academic reader. While other chapters are much more mathematical in nature, each one contains something for both audiences. For example, the authors include entertaining asides such as how search engines make money and how the Great Firewall of China influences research. The book includes an extensive background chapter designed to help readers learn more about the mathematics of search engines, and it contains several MATLAB codes and links to sample web data sets. The philosophy throughout is to encourage readers to experiment with the ideas and algorithms in the text. Any business seriously interested in improving its rankings in the major search engines can benefit from the clear examples, sample code, and list of resources provided.

Be #1 on Google Absolutely 100% Free. Search Engine Optimization, 2018-03-22 How To Rank #1 On Google!!! There are ONLY TWO WAYS to maintain Top Rankings on Google; 1. Outspend your competition.2. Read This Book!!? Nothing else works and why should it? Why does my website need SEO? The majority of web traffic is driven by the major commercial search engines, Google, Bing, and Yahoo!. Although social media and other types of traffic can generate visits to your website, search engines are the primary method of navigation for most Internet users. This is true whether your site provides content, services, products, information, or just about anything else. Search engines are unique in that they provide targeted traffic-people looking for what you offer. Search engines are the roadways that make this happen. If search engines cannot find your site, or add your content to their databases, you miss out on incredible opportunities to drive traffic to your site. Search queries-the words that users type into the search box-carry extraordinary value. Experience has shown that search engine traffic can make (or break) an organization's success. Targeted traffic to a website can provide publicity, revenue, and exposure like no other channel of marketing. Investing in SEO can have an exceptional rate of return compared to other types of marketing and promotion. Why can't the search engines figure out my site without SEO? Search engines are smart, but they still need help. The major engines are always working to improve their technology to crawl the web more deeply and return better results to users. However, there is a limit to how search engines can operate. Whereas the right SEO can net you thousands of visitors and increased attention, the wrong moves can hide or bury your site deep in the search results where visibility is minimal. In addition to making content available to search engines, SEO also helps boost rankings so that content will be placed where searchers will more readily find it. The Internet is becoming increasingly competitive, and those companies who perform SEO will have a decided advantage in visitors and customers. DNO the SEO Revolution Robert McAnderson,2011-09-01 The total number of searches conducted across all search engines in 2011, will exceed 300 Billion and will cost companies competing for these page-one listings in excess of 50 Billion Dollars. DNO the SEO Revolution is a how-to-guide for achieving Permanent page-one rankings for under \$100. This one extraordinarily simple idea will shatter traditional SEO concepts allowing every reader the opportunity to gain multiple Page One Rankings. I know because I have achieved multiple rankings for my own company and a select number of customers who participated in our trials. Achieving the top three listings on Page One of Google for under \$100 is an amazing accomplishment but for them to be permanently listed and not be under threat from competitors who are prepared to pay more for the ranked position is extraordinary. The use of SEO, PPC and SEM to achieve a Page One Google Ranking are expensive but more importantly they offer no permanency. Keyword auctions that encourage competitors to pay a higher price for the number one ranked position are insane and it is time to do things differently. Remember Einstein said, "The definition of insanity is doing the same thing over and over again and expecting a different result." Act now before your competitor does or face the consequences of their domination over you.
