The science requires the gunfitter to understand the structure of the shooter's body and what stock specifications are needed to accommodate the shooter's physique. To master the art of the process, the fitter must understand how shooters shoot and how the eye and brain see and read the target. The fitter must critically evaluate the shooter's stance, mount, and level of experience along with taking into consideration the shooter's discipline and style and how the shooter will develop and evolve.

In this near-legendary handbook, respected firearms expert Bob Brister offers advice, instructions, and solutions to every situation a shotgunner might face, making Shotgunning a guide from which both seasoned veterans and novice shooters will benefit. Based on years of tests, meticulous study of data, and a lifetime of insider expertise, this book will help any shooter make every shot count.
