Securing Biometrics Applications Charles A. Shoniregun, Stephen Crosier, 2008-03-06 Biometrics is becoming increasingly common in establishments that require high security such as state security and financial sectors. The increased threat to national security by terrorists has led to the explosive popularity of biometrics. Biometric devices are now available to capture biometric measurements such as fingerprints, palm, retinal scans, keystroke, voice recognition and facial scanning. However, the accuracy of these measurements varies, which has a direct relevance on the levels of security they offer. With the need to combat the problems related to identify theft and other security issues, society will have to compromise between security and personal freedoms. *Securing Biometrics Applications* investigates and identifies key impacts of biometric security applications, while discovering opportunities and challenges presented by the biometric technologies available.

Biometric-Based Physical and Cybersecurity Systems Mohammad S. Obaidat, Issa Traore, Isaac Woungang, 2018-10-24 This book presents the latest developments in biometrics technologies and reports on new approaches, methods, findings, and technologies developed or being developed by the research community and the industry. The book focuses on introducing fundamental principles and concepts of key enabling technologies for biometric systems applied for both physical and cyber security. The authors disseminate recent research and developing efforts in this area, investigate related trends and challenges, and present case studies and examples such as fingerprint, face, iris, retina, keystroke dynamics, and voice applications. The authors also investigate the advances and future outcomes in research and development in biometric security systems. The book is applicable to students, instructors, researchers, industry practitioners, and related government agencies staff. Each chapter is accompanied by a set of PowerPoint slides for

use by instructors.

Kata Application Notebooks: Isshinryu Karate Scott Britt,2013-02-08 Using an innovative new format, this journal allows you to quickly and easily record applications (or Bunkai) for the movements in any kata in the Isshinryu karate system! Instead of frantically writing in class or at seminars not only the application being shown, but which kata and where in the kata the application applies, simply open this journal to that point in the kata to begin taking notes in specially formatted cells. Perfect for taking to seminars or karate class, or just using for home study, this journal can help deepen your knowledge and understanding of traditional karate katas. This journal includes step-by-step photos of the following katas: - Seison - Seiunchin - Naihunchi - Chinto - Kusanku - Sunsu - Sanchin

DEFENCE and INTERVENTION -1- Mürsel Sevindik,2020-04-25 This book covers Officer Survival Skills, Use of Force, Soft Empty Hand Control, Hard Empty Hand Control issues for law

enforcement officer. The most important priority of the officer is able to survive in dangerous situations. Survival techniques, if properly applied, provide the officer an opportunity to overcome the resistive behavior of subjects. These techniques also provide officers with self-confidence, which is needed to win. The primary responsibility of the law enforcement officer is to protect life, and ensure public order. They are authorized to use a range of force options to preserve the peace, prevent crimes, maintain order, and apprehend suspects. Soft empty hand techniques are the first option of physical response used to restrain a person who is resisting. By developing a high degree of proficiency with soft empty hand techniques, the officer will be able to respond in a more effective manner, with a minimal amount of force. Hard Empty Hand Control techniques are defined as striking techniques. They are always defensive not offensive. These techniques are used to control active aggression, with empty hands and feet, when the intermediate use of weapons is justified, but are not tactically available. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

Innovative Policing Asongwe N. Thomas, 2013-05-20 Innovative Policing is an overview of innovations and orientations both in policing missions, functions, and approaches that reflect democratic principles. It is intended to serve as resource material for law enforcement officers in training and those in the field, as well as for their administrators/managers. The public also needs to participate in ensuring their own safety and security through community policing. They want to know the legitimacy of law enforcement existence and operations, the basics about their training, their equipment and uses, the odds they face, and the sacrifices they make in ensuring community safety. Policing everywhere has a record of its merits and demerits. This book is also an appeal to law enforcement policy makers and all officers (the police, corrections, and security officers)

irrespective of political ideologies or systems where they serve to embrace and apply innovative operational approaches in policing, by employing new equipment and logistics to provide satisfactory services commensurate with their professional standards, ethics, and morality while eschewing bias in all its forms.

U.S. Marine Close Combat Fighting Handbook United States Marine Corps.,2011-01-26 There are currently more than 200,000 active-duty U.S. Marines and another 40,000 in the reserves. These Marines depend on the skills and techniques taught in this concise manual—and now you can too! Today's Marines operate in conflict situations that change from low intensity to high intensity over a matter of hours. This fully-illustrated guide features both the lethal and nonlethal techniques needed to responsibly handle any situation without unnecessarily escalating the violence. The U.S. Marine Close Combat Fighting Handbook explains the methods to quickly neutralize any attacker in close quarters and teaches you how to use any part of the human body as a weapon. It covers breaking a fall, defending against headlocks and chokes, protecting against punches and kicks, surviving armed attackers and more.

For Security Personnel, DEFENCE and INTERVENTION, Theory and Practice, 2020 (Officer Survival Skills, Use of Force, Soft Empty Hand Control, Hard Empty Hand Control, Weapon Retention and Disarming, Handcuffing, Conducting Suspect Searches, Defensive Baton) Mürsel Sevindik,2020-04-29 This book covers Officer Survival Skills, Use of Force, Soft Empty Hand Control, Hard Empty Hand Control, Weapon Retention and Gun Disarming, Handcuffing, Conducting Suspect Searches, and Defensive Baton issues for law enforcement officer. The most important priority of the officer is able to survive in dangerous situations. These techniques provide officers self-confidence, which is needed to win. Law enforcement officers are

authorized to use a range of force options to preserve the peace, prevent crimes, maintain order, and apprehend suspects. Soft empty hand techniques are the first option of physical response used to restrain a person who is resisting. Hard Empty Hand Control techniques are defined as striking techniques. In some close encounters, a suspect may try to grab the officer's sidearm. Officers must develop a defensive awareness that their weapon can be snatched. Handcuffs are temporary restraining devices designed to control the movements of a subject. Body searching is a careful, systematic examination of the suspect at the scene of a crime, or immediately after apprehension. A trained officer who is proficient in the use of the baton is better able to protect himself and is less likely to resort to the use of his firearm. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

Publications Combined: Marine Corps Expeditionary Combat Skills Training (MCECST)
, Marine Corps Expeditionary Combat Skills Training (MCECST) was originally Chaplain and Religious Program Specialist Expeditionary Skills Training (CREST-RP), and was established in October 1996 at the Field Medical Service School, Marine Corps Base, Camp Lejeune (renamed Field Medical Training Battalion in 2007). The purpose of MCECST is to train Navy Occupational Specialty (NOS) B720 in the skills essential for combat survival, delivery of religious program support in an expeditionary environment, and the several associated technical, military tactical, and defensive techniques required for duty with the Marine Corps operating forces. MCMAP is an integrated, weapons-based system that incorporates the full spectrum of the force continuum on the battlefield, and contributes to the mental, character and physical development of Marines. It is the intent that MCMAP enhances the transformation from civilian to Marine by capitalizing on the zeal of entry level training, and developing the Marine ethos in a progressive manner throughout a Marine's career. Concept of operations (a) All Marines, regardless of age, grade or sex must perform MCMAP qualifications. (b) Commanders shall conduct MCMAP training in accordance with the instructions contained. (e) The prescribed minimum requirements of this Order should not be interpreted as limiting the commander. Commanders are encouraged to conduct additional MCMAP training in a progressive, safe manner to enhance unit performance and fitness levels of Marines.
