Lab Hopping Aashima Dogra,Nandita Jayaraj,2023-04-24 Embark on a one-of-a-kind journey through India's science laboratories in pursuit of the true story behind the gender gap. From Bhopal to Bhubaneswar, from Bangalore to Jammu, Aashima Dogra and Nandita Jayaraj engage in thought-provoking conversations with renowned scientists like Gagandeep Kang, Rohini Godbole, Kiran Mazumdar-Shaw and Prajval Shastri, as well as researchers at earlier stages of their scientific careers. These dialogues about the triumphs and challenges faced by women offer fresh perspectives on the gender gap that continues to haunt Indian science today. Our labs are brimming with inspiring stories of women scientists persisting in science despite facing apathy, stereotypes, and sexism to systemic and organizational challenges. Stories that reveal both a broken system and the attempts by extraordinary women working to fix it. By questioning whether India is doing enough to support its women in science and if western models of science and feminism can truly be applied in India, the authors not only offer a comprehensive examination of the state of women in science but also offer a roadmap for the way forward.

Jess' son Taylor wants a pet, and for some reason, he picks the angriest rabbit Jess has ever seen. Jess isn't sure it's a good idea, but they bring Thumper home, and the rabbit settles down. **Scaffold Hopping in Medicinal Chemistry** Nathan Brown, 2013-11-06 This first systematic treatment of the concept and practice of scaffold hopping shows the tricks of the trade and provides invaluable guidance for the reader's own projects. The first section serves as an introduction to the topic by describing the concept of scaffolds, their discovery, diversity and representation, and their importance for finding new chemical entities. The following part describes the most common tools and methods for scaffold hopping, whether topological, shape-based or structure-based. Methods such as CATS, Feature Trees, Feature Point Pharmacophores (FEPOPS), and SkelGen are discussed among many others. The final part contains three fully documented real-world examples of successful drug development projects by scaffold hopping that illustrate the benefits of the approach for medicinal chemistry. While most of the case studies are taken from medicinal chemistry, chemical and structural biologists will also benefit greatly from the insights presented here.

Is Hopping a Science? Issai Shlimak, 2015-03-05 The book provides an overview of the author's work devoted to experimental study of hopping conductivity, which includes substantial contributions, such as solving the problem of critical indices of the metal-insulator transition in doped semiconductors, investigation of transitions from different kinds of hopping conductivity, development of the hopping spectroscopy method that allows to reveal the details of the density-of-states near the Fermi level — appearance of a hard magnetic gap, temperature induced smearing of the soft Coulomb gap, the phononless hopping and so on. A separate chapter is devoted to the hopping photoconductivity and inter-impurity radiative recombination of non-equilibrium carriers. This book is suitable for undergraduate and graduate students in physics, researchers in semiconductor electronics and even for the non-experts who wish to have a notion about hopping mechanism of transport. The explanations in the book are simple and detailed enough to capture the interest of the curious reader. Contents: Critical Indices of the Metal-Insulator Transition Different Types of Hopping Conductivity Hopping Spectroscopy Spin-Dependent and Phononless Hopping Conductivity 1/f Noise Application of the Hopping Conduction Inter-Impurity Radiative Recombination and Hopping Photoconductivity Readership: This book is suitable for undergraduate and graduate students in physics, researchers in semiconductor electronics and even for the non-experts who wish to have a notion about hopping transport. Key Features: The phenomena described and discussed in this book (with few exceptions) are not covered in the existing textbooks and reviews A new method of hopping spectroscopy, which allows to reveal the details of the density-of-states near the Fermi level, is developed This book is suitable for undergraduate and graduate students in physics, researchers in semiconductor electronics and even for the non-experts who wish to have a notion about hopping transport Keywords: Hopping Conductivity; Localization; Metal-Insulator Transition

*Architectures and Synthesizers for Ultra-low Power Fast Frequency-Hopping WSN Radios* Emanuele Lopelli, Johan van der

Tang, Arthur H.M. van Roermund, 2010-11-19 Wireless sensor networks have the potential to become the third wireless revolution after wireless voice networks in the 80s and wireless data networks in the late 90s. Unfortunately, radio power consumption is still a major bottleneck to the wide adoption of this technology. Different directions have been explored to minimize the radio consumption, but the major drawback of the proposed solutions is a reduced wireless link robustness. The primary goal of Architectures and Synthesizers for Ultra-low Power Fast Frequency-Hopping WSN Radios is to discuss, in detail, existing and new architectural and circuit level solutions for ultra-low power, robust, uni-directional and bi-directional radio links. Architectures and Synthesizers for Ultra-low Power Fast Frequency-Hopping WSN Radios guides the reader through the many system, circuit and technology trade-offs he will be facing in the design of communication systems for wireless sensor networks. Finally, this book, through different examples realized in both advanced CMOS and bipolar technologies opens a new path in the radio design, showing how radio link robustness can be guaranteed by techniques that were previously exclusively used in radio systems for middle or high end applications like Bluetooth and military communications while still minimizing the overall system power consumption.

**Island Hopping** Amanda Lindroth, 2018-09-25 White duck, boldly colored fabrics in solids, stripes, and jaunty prints, rattan and cane seating, whitewashed or colorfully painted English case furniture, canopied beds, straw matting--these are but some of the signature ingredients of an Amanda Lindroth interior. The Florida-born designer decamped to Nassau some 20 years ago after stints in New York and London. Since she founded her firm in 2010, she has become the go-to designer of island dwellers from Lyford Cay to Antigua, Abaco to Belize, Harbour Island to Palm Beach, and Southampton to Great Cranberry Island in Maine. Her airy, relaxed, indoor-outdoor aesthetic--a hybrid that merges colonial and island influences--is apparent in every one of the 30 projects featured in Island Hopping. With photographs by the masterly Tria Giovan, herself an island native, and charming illustrations by the gifted Aldous Bertram, the book is the visual equivalent of an island getaway.

**Railroad Semantics**, 2016-06-14 In the fourth Railroad Semantics collection, Aaron takes you along on an epic train journey through desolate stretches of Wyoming, Colorado, and Utah. His personal accounts of train hopping are paired with newspaper clippings, photos, rail yard graffiti, and ephemera to fill in the story. In this volume, Aaron survives encounters with police, railroad

workers, and hipsters posing as hobos. He drinks under overpasses, is injured alone in the desert, and even takes a legitimate, ticketed Amtrak ride.
