Click On Democracy Grant Reeher, 2018-03-09 Click on Democracy examines the first national election in which the Internet played a major role. The contributors argue that the Internet's most profound political impact on Election 2000 has largely been missed or underestimated. The reason: the difference it made was more social than electoral, more about building political communities than about generating votes and money. The contributors to Click on Democracy talk at length with the people who are using the Internet in new and effective ways, and who are capitalizing on the Internet's power as a networking tool for civic action. Viewed from this bottom-up perspective, the Internet emerges as an exciting and powerful source of renewal for civic engagement. The new foreword is from Scott Heiferman and William Finkel, both of Meetup, Inc.

Negative Geographies David Bissell, Mitch Rose, Paul Harrison (Geographer), 2021-11 Negative Geographies is the first edited collection to chart the political, conceptual, and ethical consequences of how the underexplored problem of the negative might be posed for contemporary cultural geography. Using a variety of case studies and empirical investigations, these chapters consider how the negative, through annihilations, gaps, ruptures, and tears, can work within or against the terms of affirmationism. The collection opens up new avenues through which key problems of cultural geography might be differently

posed and points to the ways that it might be possible and desirable to think, theorize, and exemplify negation.

The authors present the ecological concepts which form the bases of biological control and discuss recent changes to make biological control safe for the environment. Case studies are included throughout, providing in-depth examples of the use of different organisms and strategies in a variety of ecosystems. A new chapter covers the current challenges; the impact of climate change, the problem of invasive species, and how biological control can aid sustainability.

**The Procrastination Economy** Ethan Tussey, 2020-04-01 2018 Outstanding Academic Title, given by Choice Magazine How mobile devices make our in-between moments valuable to media companies while also providing a sense of control and connection In moments of downtime – waiting for a friend to arrive or commuting to work – we pull out our phones for a few minutes of distraction. Just as television reoriented the way we think about living rooms, mobile devices have taken over the interstitial spaces of our everyday lives. Ethan Tussey argues that these in-between moments have created a procrastination economy, an opportunity for entertainment companies to create products, apps, platforms, subscription services, micropayments, and interactive opportunities that can colonize our everyday lives. But as businesses commoditize our free time, and mobile devices become essential tools for promotion, branding and distribution, consumers are using these devices as a means of navigating public and private space. These devices are not just changing the way we spend and value our time, but also how we interact with others and transform our sense of the politics of space. By examining the four main locations of the procrastination economy—the workplace, the commute, the waiting room, and the “connected” living room—Ethan Tussey illuminates the relationship between the entertainment industry and the digitally empowered public.
