Hot Mark Hertsgaard,2011-01-19 An “informative and vividly reported book” that goes beyond the politics of climate change to explore practical ways we can adapt and survive (San Francisco Chronicle). Journalist Mark Hertsgaard has reported on global warming for outlets including the New Yorker, NPR, Time, and Vanity Fair. But it was only after he became a father that he started thinking about the two billion young people worldwide who will spend the rest of their lives coping with mounting climate disruption. In *Hot*, he presents a well-researched blueprint for how all of us—parents, communities, companies, and countries—can navigate this unavoidable new era. Reporting from across the nation and around the world, Hertsgaard provides examples of ambitious attempts to mitigate the effects of sea-level rise, mega-storms, famine, and other threats—and an “urgent message . . . that citizens and governments cannot afford to ignore” (The Boston Globe). “This readable, passionate book is surprisingly optimistic: Seattle, Chicago, and New York are making long-term, comprehensive plans for flooding and drought. Impoverished farmers in the already drought-stricken African Sahel have discovered how to substantially improve yields and decrease malnutrition by growing trees among their crops, and the technique has spread across the region; Bangladeshis, some of the poorest and most flood-vulnerable yet resilient people on earth, are developing imaginative innovations such as weaving floating gardens from water hyacinth that lift with rising water. Contrasting the Netherlands’ 200-year flood plans to the New Orleans Katrina disaster, Hertsgaard points out that social structures, even more than technology, will determine success, and persuasively argues that human survival depends on bottom-up, citizen-driven government action.” —Publishers Weekly “His analysis of the impact of global warming on industries as different as winemaking and insurance is intriguing, and his well-supported conclusion that social change can beat back climate change is inspiring . . . an exceptionally productive approach to a confounding reality.” —Booklist “This is an important book.” —Bill McKibben

Hot Laboratories ,1960 This search, containing 126 references, was prepared to serve as a guide to the report literature on the design and construction of hot laboratories. These reports are listed alpha-numerically. Articles selected from scientific journals and which appear in the 1951 thru 1959 issues of Nuclear Science Abstracts (NSA) are included. These articles are listed under Published References according to NSA reference number, and therefore chronologically.

Hot, Hot Chicken Rachel Louise Martin,2021-03-15 These days, hot chicken is a “must-try” Southern food. Restaurants in New York, Detroit, Cambridge, and even Australia advertise that they fry their chicken “Nashville-style.” Thousands of people attend the Music City Hot Chicken Festival each year. The James Beard Foundation has given Prince’s Chicken Shack an American Classic Award for inventing the dish. But for almost seventy years, hot chicken was made and sold primarily in Nashville’s Black neighborhoods—and the story of hot chicken says something powerful about race relations in Nashville, especially as the city tries to figure out what it will be in the future. *Hot, Hot Chicken* recounts the history of Nashville’s Black communities through the story of its hot chicken scene from the Civil War, when Nashville became a segregated city, through the tornado that ripped through North Nashville in March 2020.

Hot Rod Pin-ups David Perry, David Perry, Foreword by Robt. Williams. For as long as young men have been channeling, chopping, and hopping up rods and customs, women - whether loyal girlfriends or trouble-seeking bad girls - have been an integral to their scene. In this unique portfolio evoking great 1950s pin-up artists like Vargas and Elvgren, talented photographer David Perry depicts models in and out of cherry-picked rods and customs wearing painstakingly chosen period dress and hairstyles. More than 100 photos present these modern-day pin-ups under three themes: Garage, Cruising, and Race. In addition, essays explore each topic and are also accompanied by pulp novel covers, period mags, and ads that place the photography in a historical context. Captions identify the car owners, photo location, and, where appropriate, interesting car specs and histories.

American Hot Rod Boyd Coddington,2006 Written in a lively, engaging style, the book chronicles Boyd Coddington's career as well as the long, colorful history of hot rods, street rods, and custom cars, machines that transcend transportation to express the highest levels of skill and artistry.

Hot and Bothered Jancee Dunn,2023-05-02 “Hot and Bothered removes the shame, disdain, and mystery that’s surrounded menopause...An informative, entertaining and desperately needed book.” —Jen Sincero, author of *You Are a Badass* When Jancee Dunn hit her mid-forties, she was bombarded by seemingly random symptoms: rampant insomnia, spring-loaded nerves, weirdly dry mouth, and Rio Grande-level periods. After going to multiple doctors who ran test after fruitless test, she was surprised to finally discover the culprit—perimenopause. For more than two decades, Jancee had been reporting on mental and physical health. So if she was unprepared for this, what about all the women who don’t write about health for a living? *Hot and Bothered* is the book she wishes existed as she was scrambling for information: an empowering, research-based guide on how women can tackle this new stage of life. Menopause isn’t a disease, but a natural, normal life transition. Why, then, are we still speaking in whispers about something that affects half the earth’s population? Through in-depth interviews with renowned menopause experts and trusted authorities, Dunn peels back the layers on this still-mystifying topic with her trademark humor and unpacks the science on both hormonal and nonhormonal treatments. She provides actionable ways to improve sleep, sex, moods, mental clarity, and skin; details the latest treatments for hot flashes; and explores the best practices to stop “peezing” (that would be peeing when you sneeze, thanks to your new urinary issues). Dunn’s clear, easy-to-follow advice will help you reclaim yourself—and fully embrace life’s next chapter.

Hot and Cold Darlene R. Stille,2001 Explains why things feel hot or cold; what thermometers are and how they indicate the temperature; and how materials change between solid, liquid, and gas states based on the temperature.

Hot-Carrier Reliability of MOS VLSI Circuits Yusuf Leblebici,Sung-Mo (Steve) Kang,2012-12-06 As the complexity and the density of VLSI chips increase with shrinking design rules, the evaluation of long-term reliability of MOS VLSI circuits is becoming an important problem. The assessment and improvement of reliability on the circuit level should be based on both the failure mode analysis and the basic understanding of the physical failure mechanisms observed in integrated circuits. Hot-carrier induced degradation of MOS transistor characteristics is one of the primary mechanisms affecting the long-term reliability of MOS VLSI circuits. It is likely to become even more important in future generation chips, since the downward scaling of transistor dimensions without proportional

scaling of the operating voltage aggravates this problem. A thorough understanding of the physical mechanisms leading to hot-carrier related degradation of MOS transistors is a prerequisite for accurate circuit reliability evaluation. It is also being recognized that important reliability concerns other than the post-manufacture reliability qualification need to be addressed rigorously early in the design phase. The development and use of accurate reliability simulation tools are therefore crucial for early assessment and improvement of circuit reliability : Once the long-term reliability of the circuit is estimated through simulation, the results can be compared with predetermined reliability specifications or limits. If the predicted reliability does not satisfy the requirements, appropriate design modifications may be carried out to improve the resistance of the devices to degradation.

Nutritional Needs in Hot Environments Institute of Medicine,Committee on Military Nutrition Research,1993-02-01
 This volume examines the current state of knowledge concerning the influence of a hot environment on nutrient requirements of military personnel. A parallel concern is ensuring that performance does not decline as a result of inadequate nutrition. The committee provides a thorough review of the literature in this area and interprets the diverse data in terms of military applications. In addition to a focus on specific nutrient needs in hot climates, the committee considers factors that might change food intake patterns and therefore overall calories. Although concern for adequate nutrition for U.S. soldiers in Saudi Arabia prompted the initiation of this project, its scope includes the nutrient needs of individuals who may be actively working in both hot-dry and hot-moist climates.

Spokane Hot Rodding John Gunsaulis,2015-04-13 Spokane, located just 20 miles from the Idaho border, is the largest city in Eastern Washington, and during the 1940s, it became a center point of an evolving postwar hot rod community. Auto sports were expanding at this time from stock car and midget racing to street cars and drag racing. Local car enthusiasts joined together with an influx of military personnel and college students who were just as passionate for hot rodding, and it was during this time that the Spokane hot rodding culture started flourishing. Together, they pushed the boundaries of hot rodding and created lifelong bonds in the process. This book explores that evolution of inland northwest hot rodding from the mid-1940s to the mid-1960s, starting with the jalopy-styled hot rods that began popping up on local streets to the formation of new clubs and organized racing.
