Interfaith Education for All Duncan R. Wielzen, Ina Ter Avest, 2017-10-10 Living together in the midst of diversity is an issue of pivotal importance all over the world, in particular for people involved in the education of the younger generation. The search intended in this publication is to find the means to go beyond mere tolerance of differences. Education as envisioned in this book engages learners in active citizenship and enables pupils and students - young people - to transform their social environment. Learning about the other, and - to a certain extent - appreciating the other's perspective, together with acquiring dialogical skills are key elements for learning to live together with people from different cultural backgrounds and with diverse religious and secular worldviews. Hence, faith development, dialogicality and citizenship are central themes in this publication. This book brings together the latest insights and 'best practices' available in the fields of religious education from around the world, which are reflected upon by distinguished scholars in the field. The input provided by the three parts of this book will give every educator further food for thought, be it in the classroom, at home or in leisure activities. The diversity approach of this book is mirrored in the composition of the team of editors. Duncan Wielzen is a theologian with research interest in religious education in plural societies; Ina Ter Avest is a psychologist with a focus on the intersectionality of psychology, culture and religion. The focus of both editors is on (inter)faith education, its implication and further development.

Liposome Methods and Protocols Subhash C. Basu, Manju Basu, 2008-02-04 In vitro utilization of liposomes is now recognized as a powerful tool in many bioscience investigations and their associated clinical studies, e.g., liposomes in drug targeting; liposomes in gene transport across plasma and nuclear membranes; liposomes in enzyme therapy in patients with genetic disorders. However, before these areas can be effectively explored, many basic areas in liposome research require elucidation, including: (a) attachment of liposomes to cell surfaces; (b) permeation of liposomes through the plasma membranes; and (c) stability of liposomes in cell or nuclear matrices. None of these areas have been exhaustively explored and liposome researchers have ample opportunities to contribute to our knowledge. The aim of Liposome Methods and Protocols is to bring together a wide range of detailed laboratory protocols covering different aspects of liposome biology in order to assist researchers in those rapidly advancing medical fields mentioned earlier. With this goal in mind, in each protocol chapter we have detailed the materials to be used, followed by a step-by-step protocol. The Notes section of each protocol is also certain to prove particularly useful, since the authors include troubleshooting tips straight from their benchtops, valuable information that is seldom given in restricted methods sections of standard research journals. For this reason we feel that the book will prove especially useful for all researchers in the liposome field.

Formal Methods for Trustworthy Computer Systems (FM89) Dan Craigen, Karen Summerskill, 2013-11-11 The 1989 Workshop on the Assessment of Formal Methods for Trustworthy Computer Systems (FM89) was an invitational workshop that brought together representatives from the research, commercial and governmental spheres of Canada, the United Kingdom, and the United States. The workshop was held in Halifax, Nova Scotia, Canada, from July 23 through July 27, 1989. This document reports the activities, observations, recommendations and conclusions resulting from

FM89. 1. 1 Purpose of Workshop The primary purpose for holding FM89 was to assess the role of formal methods in the development and fielding of trustworthy critical systems. The need for this assessment was predicated upon four observations: 1. Critical systems are increasingly being controlled by computer systems; 2. Existing techniques for developing, assuring and certifying computer-based critical systems are inadequate; 3. Formal methods have the potential for playing the same role in the development of computer-based systems as applied mathematics does for other engineering disciplines; and 4. Formal methods have had limited impact on the development of computer-based systems and supporting technologies. The goal of the workshop was to complete the following tasks: 1. Assess the problems retarding the development of trustworthy critical systems; 2. Determine the (potential) impact of applying formal methods techniques to the development of trustworthy critical systems; 3. Determine the research and development required to facilitate a broader application of formal methods techniques; 4.

Trafficking in Broken Hearts Edwin Sanchez,2014-12-15 When Papo, a tough-talking Puerto Rican hustler from the Bronx, meets Brian, a frightened young lawyer from the Midwest, Papo begins to glimpse the possibility of a romantic escape from his life on the streets. At the same time, Bobby, a 17-year-old runaway who has been repeatedly raped by his older brother, offers to take care of Papo and moves in with him in his fleabag hotel room. It is then when Papo suddenly finds his defenses melting and his heart torn in two directions. TRAFFICKING IN BROKEN HEARTS is a gritty, urban love story. Playwright Edwin Sanchez makes a promising New York debut with TRAFFICKING IN BROKEN HEARTS, a grim, streetwise and bracingly compassionate work ... he convinces with the honesty of his writing and a canny, thoughtful grasp of his trio of characters. The playwright does an especially effective job in penning the gray shades of his characters ... -Greg Evans, Variety

Telomeres and Telomerase John A. Double,Michael J. Thompson,2010-10-28 John A. Double and Michael J. Thompson have collected a critically important series of novel and essential techniques for studying telomeres and telomerase. These readily reproducible methods provide cutting-edge tools to identify, measure, and analyze telomeres, to determine telomerase expression at the RNA level, to determine telomerase activity, and to detect potential modifiers of this activity. The techniques for assaying telomerase activity range from standard radiological TRAP assays to nonradioactive methods, from non PCR-based methods to techniques using real-time PCR. Telomeres and Telomerase: Methods and Protocols provides the core array of productive techniques needed today to develop telomerase inhibitors or diagnostic/prognostic telomerase markers.
