Профессиональный поиск в Интернете Кутовенко

Алексей Алексеевич, 2011-01-27 Найти нужную и актуальную информацию в Интернете порой очень непросто. Количество информационного мусора в Сети растет как снежный ком, и добраться до данных, которые вам действительно необходимы, используя традиционные Яндекс и Google, иногда просто невозможно. Книга, которую вы держите в руках, позволит увеличить эффективность вашего поиска информации в Интернете во много раз. Здесь описаны приемы, поисковые сайты и программы для специализированного поиска информации. Рассмотрены современные разновидности интернет-поиска: универсальный поиск, вертикальный поиск, метапоисковые системы, построение персональных поисковиков, поиск аудиовизуального контента, поиск по скрытому Интернету. Для всех рассмотренных систем приведены их характеристика и советы по максимально эффективному использованию.

Untangling the Web National Security Agency (NSA), 2013 Use the internet like a real spy. Untangling the Web is the National Security Agency's once-classified guide to finding information on the internet. From the basic to the advanced, this 650-page book offers a fascinating look at tricks the real spies use to uncover hidden (and not-so-hidden) information online. Chapters include: Google hacks Metasearch sites Custom search engines Maps & mapping Uncovering the invisible internet Beyond search engines: Specialized research tools Email lookups Finding people Researching companies A plain english guide to interworking Internet toolkits Finding ISPs Cybergeography Internet privacy and securityand over a hundred more chapters. This quote from the authors hints at the investigative power of the techniques this book teaches: Nothing I am going to describe to you is illegal, nor does it in any way involve accessing unauthorized data, [...but]

involves using publicly available search engines to access publicly available information that almost certainly was not intended for public distribution. From search strings that will reveal secret documents from South Africa (filetype: xls site: za confidential) to tracking down tables of Russian passwords (filetype: xls site: ru login), this is both an instructive and voyeuristic look at how the most powerful spy agency in the world uses Google.
