Die Filioque-Kontroverse zwischen Ost- und Westkirche im Frühmittelalter

Peter Gemeinhardt, 2013-06-10 Die intensiv diskutierte ökumenische und systematisch-theologische Frage, ob der Heilige Geist allein aus dem Vater oder auch aus dem Sohn hervorgeht (ex Patre Filioque), wird kirchen- und dogmengeschichtlich analysiert. Ausgehend von der differenzierten Rezeption des Nizäno-Konstantinopolitanums im lateinischen Sprachraum wird nach den Ursprüngen der Filioque-Kontroverse zwischen dem 8. und 12. Jahrhundert gefragt. Dabei werden die pneumatologischen und bekenntnishermeutischen Differenzen sowie die politischen und ekklesiologischen Rahmenbedingungen dargestellt. Der Streit um das Filioque erweist sich als Schlüssel zu einer theologischen Divergenzbewegung zwischen griechischem Osten und lateinischem Westen, deren Ursprünge bereits in den trinitätstheologischen Grundentscheidungen des 4. Jahrhunderts liegen. Eine Lösung der Filioque-Problematik ist daher nicht durch die Streichung eines Wortes zu erreichen, sondern nur im Dialog zweier irreduzibler Ausgestaltungen des trinitarischen Dogmas.

Review of Medical Microbiology Ernest Jawetz, 1987

Advances in Processing Technologies for Bio-based Nanosystems in Food Óscar L. Ramos, Ricardo N. Pereira, Miguel A. Cerqueria, José A. Teixeira, António A. Vicente, 2019-07-25 Nanotechnology can be used to address challenges faced by the food and bioprocessing industries for developing and implementing improved or novel systems that can produce safer, nutritious, healthier, sustainable, and environmental-friendly food products. This book overviews

the most recent advances made on the field of nanoscience and nanotechnology that significantly influenced the food industry. Advances in Processing Technologies for Bio-Based Nanosystems in Food provides a multidisciplinary review of the complex mechanisms involved in the research, development, production and legislation of food containing nanostructures systems.

Features: Presents the most recent advances made in the field of nanoscience and nanotechnology as applied to the food industry Discusses innovative approaches and processing technologies Shows how nanotechnology can be used to produce safer, nutritious, healthier, sustainable and environmental-friendly food products Covers the complex mechanisms involved in the research, development, production and legislation of food containing nanostructures Selected examples of nanotechnology applications in food industry are shown, focusing on advanced aspects of food packaging, processing and preservation; followed by one contribution that presents the potential commercialization and the main challenges for scale-up. Comprised of 15 chapters, this book provides much-needed and up-to-date information on the use of emergent technologies in bio-based nanosystems for foods, and serves as an ideal reference for scientists, regulators, industrialists, and consumers that conduct research and development in the food processing industry.

Community Programs to Promote Youth Development Institute of Medicine,National Research Council,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Committee on Community-Level Programs for Youth,2002-02-12 After-school programs, scout groups, community service activities, religious youth groups, and other community-based activities have long been thought to play a key role in the lives of adolescents. But what do we know about the role of such programs for today's adolescents? How can we ensure that programs are designed to successfully meet young people's developmental needs and help them become healthy, happy, and productive adults? Community Programs to Promote Youth Development explores these questions, focusing on essential elements of adolescent well-being and healthy development. It offers recommendations for policy,

practice, and research to ensure that programs are well designed to meet young people's developmental needs. The book also discusses the features of programs that can contribute to a successful transition from adolescence to adulthood. It examines what we know about the current landscape of youth development programs for America's youth, as well as how these programs are meeting their diverse needs. Recognizing the importance of adolescence as a period of transition to adulthood, Community Programs to Promote Youth Development offers authoritative guidance to policy makers, practitioners, researchers, and other key stakeholders on the role of youth development programs to promote the healthy development and well-being of the nation's youth.

Data Analysis, Machine Learning and Applications Christine Preisach,Hans Burkhardt,Lars Schmidt-Thieme,Reinhold Decker,2008-04-13 Data analysis and machine learning are research areas at the intersection of computer science, artificial intelligence, mathematics and statistics. They cover general methods and techniques that can be applied to a vast set of applications such as web and text mining, marketing, medical science, bioinformatics and business intelligence. This volume contains the revised versions of selected papers in the field of data analysis, machine learning and applications presented during the 31st Annual Conference of the German Classification Society (Gesellschaft für Klassifikation - GfKl). The conference was held at the Albert-Ludwigs-University in Freiburg, Germany, in March 2007.
