Playing the Identity Card Colin J Bennett,David Lyon,2013-01-11 National identity cards are in the news. While paper ID documents have been used in some countries for a long time, today's rapid growth features high-tech IDs with built-in biometrics and RFID chips. Both long-term trends towards e-Government and the more recent responses to 9/11 have prompted the quest for more stable identity systems. Commercial pressures mix with security rationales to catalyze ID development, aimed at accuracy, efficiency and speed. New ID systems also depend on computerized national registries. Many questions are raised about new IDs but they are often limited by focusing on the cards themselves or on privacy. Playing the Identity Card shows not only the benefits of how the state can see citizens better using these instruments but also the challenges this raises for civil liberties and human rights. ID cards are part of a broader trend towards intensified surveillance and as such are understood very differently according to the history and cultures of the countries concerned.

Getting Around Town: M. Sherril Moon,Emily M. Luedtke,Elizabeth Halloran-Tornquist,2010-01-01 Transition experts agree that learning to get around the community is one of the essential components of all school programs for students with disabilities regardless of the type or degree of disability. By teaching mobility skills across several areas and its impact for students to learn in the domestic, work, social, self-determination, and recreation domains, educators, families, and older students have a starting point for including these goals in individualized education programs (IEP). This guide provides examples of possible IEP goals and field-tested lesson plans for individual students or entire classes across all age and grade levels.

Identity Card Technologies Great Britain: Parliament: House of Commons: Science and Technology Committee,Great Britain. Parliament. House of Commons. Select Committee on Science and Technology,2006-08-04 This report focuses upon the Home Office's identity cards scheme, which uses various technologies including biometrics, information and communication technology (ICT) and smart cards. It explores the ways in which scientific advice, risk and evidence are being managed in relation to technologies that are continually developing. The Home Office has followed good practice by the establishment of advisory committees, the use of Office of Government Commerce (OGC) Gateway Reviews and the development of risk management strategies, along with a policy of gradual implementation. But the Committee has identified weaknesses in the use of scientific advice and evidence. There has been a lack of transparency surrounding the incorporation of scientific advice, the procurement process and the ICT system. Consultations have been limited in scope and their objectives have been unclear. Only some aspects of the scheme such as the biometrics have been determined. The Home Office's decisions demonstrate an inconsistent approach to scientific evidence, and the Committee is concerned that choices regarding biometric technology have preceded trials. With extensive trialling still to take place, the Committee is sceptical about the validity of projected costs. The Committee recommends that the Home Office seeks advice on ICT from senior and experienced professionals and establishes an ICT assurance committee. It is crucial that the Home Office increases clarity and transparency across the programme, not only in problem areas. The programme should also be flexible enough to change should evidence emerge that contradicts existing assumptions.

Making the Poor Free? S.K. Das,2015-10-01 While handing over the first set of 12-digit unique identification numbers to ten tribal families of Tembhli, a dusty village tucked away in a far corner of Maharashtra, the then Prime Minister Manmohan Singh said, 'UID will help hundreds of people in India, whose pride was hurt for so many years because of the lack of an identity. This will be their source of recognition from now on'. The Aadhaar scheme, since its inception, has been operating without parliamentary approval and, thus, the Supreme Court of India held that Aadhaar cannot be made mandatory for availing public services in India. This book, therefore, is an attempt to understand how Aadhaar will make India's poor free. Fifteen chapters describe the evolution of different schemes of the Indian government that have sought to provide identification, enrolment to and functioning of Aadhaar, and the legal framework involved in the process. This book is an in-depth analysis of this unique and controversial programme in India. Das maintains that while the Aadhaar programme's contribution in the implementation of PDS, MGNREGS, education, and public health can only be modest, it will be in a position to create a platform for greater financial inclusion of the poor.

Sport Architecture. Design Construction Management of Sport Infrastructure Emilio Faroldi,2021-11-18 The history of civilisations and places conveys the importance of the role the culture of sport and a cultivated management of leisure play in the definition of the identity of peoples and communities. Elevating such realms to the status of cultural assets to be shared and enhanced by analysing the dynamics of transformation of the city and territory related to them is a sensible, necessary and ethically correct action. The context of European architecture shows an increasing number of plans that both transform existing facilities and create new ones with a defining and strategic role in the development of urban and landscape fabrics. Activating a basic and permanent

theoretical discussion is a fundamental and strategic action for the credibility and professional values of a sector that powerfully conveys the need to update and retrain its technical, executive and managerial personnel through a renewed cultural approach. The goal of this book is promoting awareness about the design enhancement of sport infrastructures as collective assets capable of developing identity and citizenship, through the analysis of both physical and immaterial factors and of the personnel charged with their conception, construction and management. Within contemporary architecture, the design of facilities for sport practice provides an extraordinary opportunity for the adaptation and strategic re-evaluation of the environment and its paradigmatic places. At the same time, sport infrastructures provide a crucial opportunity for architectural, design and technological experimentation – exploring their core features and enhance their potential is the main goal of this book.

Surveillance, Privacy, and the Globalization of Personal Information Elia Zureik, Lynda Harling Stalker, Emily Smith, 2010-06-01 Covering a range of countries from China, Japan, Brazil, and Mexico to the United States, Canada, Spain, France, and Hungary, this volume reveals the similarities and differences among populations in their reactions to the surveillance era and in the amount each knows about government monitoring. Topics deal with pertinent issues such as global, national, and local transfer of personal information about citizens' financial transactions, work, and travel. The authors also analyse the collaboration of government and the private sector in the collection and transfer of private information. A remarkable resource in understanding attitudes towards surveillance, security, and privacy, *Surveillance, Privacy, and the Globalization of Personal Information* is indispensable for anyone curious about what governments, the private sector, and citizens know about each other.
