The Absent Image Elina Gertsman, 2021-06-24 Winner of the 2022 Charles Rufus Morey Award from the College Art Association Guided by Aristotelian theories, medieval philosophers believed that nature abhors a vacuum. Medieval art, according to modern scholars, abhors the same. The notion of horror vacui—the fear of empty space—is thus often construed as a definitive feature of Gothic material culture. In *The Absent Image*, Elina Gertsman argues that Gothic art, in its attempts to grapple with the unrepresentability of the invisible, actively engages emptiness, voids, gaps, holes, and erasures. Exploring complex conversations among medieval philosophy, physics, mathematics, piety, and image-making, Gertsman considers the concept of nothingness in concert with the imaginary, revealing profoundly inventive approaches to emptiness in late medieval visual culture, from ingenious images of the world's creation ex nihilo to figurations of absence as a replacement for the invisible forces of conception and death.

Innovative and challenging, this book will find its primary audience with students and scholars of art, religion, physics, philosophy, and mathematics. It will be particularly welcomed by those interested in phenomenological and cross-disciplinary approaches to the visual culture of the later Middle Ages.

The Image Allison Bown, 2018-07 Our lives are God's masterpiece - and He deeply enjoys the process of relational development us that reveals it. He is passionate for us to perceive clearly the beautiful and powerful image of our true identity in Christ that already His reality. But far too often, we've settled for a less valuable, inauthentic copy of the life we think God is asking of us. Difficult experiences, poor histories and a host of other negatives have defined us in ways that are not an accurate image of what God sees when He looks at you. For many years, Allison Bown and Graham Cooke have partnered together in exploring this lifestyle, teaching and training people in their true identity in Christ - seeing astonishing, lasting transformation. In *The Image*, Allison translates these discoveries, along with her own experience and wisdom, into writing that will allow you to have a greater encounter of life from God's perspective.

What is an Image? James Elkins, 2011 Brings together historians, philosophers, critics, postcolonial theorists, and curators to ask how images, pictures, and paintings are conceptualized. Issues discussed include concepts such as image and picture in and outside the West; semiotics; whether images are products of discourse; religious meanings; and the ethics of viewing--Provided by publisher.

The Spitting Image Jerry Lembcke, 2000-05 How the startling image of an anti-war protester spitting on a uniformed veteran misrepresented the narrative of Vietnam War political debate One of the most resilient images of the Vietnam era is that of the anti-war protester — often a woman — spitting on the

uniformed veteran just off the plane. The lingering potency of this icon was evident during the Gulf War, when war supporters invoked it to discredit their opposition. In this startling book, Jerry Lembcke demonstrates that not a single incident of this sort has been convincingly documented. Rather, the anti-war Left saw in veterans a natural ally, and the relationship between anti-war forces and most veterans was defined by mutual support. Indeed one soldier wrote angrily to Vice President Spiro Agnew that the only Americans who seemed concerned about the soldier's welfare were the anti-war activists. While the veterans were sometimes made to feel uncomfortable about their service, this sense of unease was, Lembcke argues, more often rooted in the political practices of the Right. Tracing a range of conflicts in the twentieth century, the book illustrates how regimes engaged in unpopular conflicts often vilify their domestic opponents for stabbing the boys in the back. Concluding with an account of the powerful role played by Hollywood in cementing the myth of the betrayed veteran through such films as *Coming Home*, *Taxi Driver*, and *Rambo*, Jerry Lembcke's book stands as one of the most important, original, and controversial works of cultural history in recent years.

The Discarded Image C. S. Lewis, 1994-08-26 Hailed as the final memorial to the work of a great scholar and teacher and a wise and noble mind, this work paints a lucid picture of the medieval world view, as historical and cultural background to the literature of the Middle Ages and Renaissance.

Ghost Image Hervé Guibert, 2014-03-26 *Ghost Image* is made up of sixty-three short essays—meditations, memories, fantasies, and stories bordering on prose poems—and not a single image. Hervé Guibert's brief, literary rumination on photography was written in response to Roland Barthes's *Camera Lucida*, but its deeply personal contents go far beyond that canonical text. Some essays talk of Guibert's parents and friends, some describe old family photographs and films, and spinning through them all are reflections on remembrance, narcissism, seduction, deception, death, and the phantom images that have been missed. Both a memoir and an exploration of the artistic process, *Ghost Image* not only reveals Guibert's particular experience as a gay artist captivated by the transience and physicality of his media and his life, but also his thoughts on the more technical aspects of his vocation. In one essay, Guibert searches through a cardboard box of family portraits for clues—answers, or even questions—about the lives of his parents and more distant relatives. Rifling through vacation snapshots and the autographed images of long-forgotten film stars, Guibert muses, "I don't even recognize the faces, except occasionally that of an aunt or

great-aunt, or the thin, fair face of my mother as a young girl.” In other essays, he explains how he composes his photographs, and how—in writing—he seeks to escape and correct the inherent limits of his technique, to preserve those images lost to his technical failings as a photographer. With strains of Jean Genet and recurring themes that speak to the work of contemporary artists across a range of media, Guibert’s *Ghost Image* is a beautifully written, melancholic ode to existence and art forms both fleeting and powerful—a unique memoir at the nexus of family, memory, desire, and photography.

Image Bearer Ellie Sanazaro, 2021-04 Inspired by Genesis 1:27, *Image Bearer* is a Christian children's book that teaches how God wonderfully created every child in his image. *Image Bearer* is meant to be a resource to help churches and families celebrate differences. It features illustrations inspired by real kids who have an array of diagnoses including Down syndrome, autism, Williams syndrome, spina bifida, cerebral palsy, osteogenesis imperfecta, lymphatic malformation, port-wine stain, Kniest syndrome, epilepsy, and more.

The Image and the Book K. van der Toorn, 1997 *The Image and the Book* is a richly documented and provocative collection of studies and essays dealing with the historical background of biblical ban on religious images. It describes the role and theology of the divine image in the civilizations surrounding Israel, and shows that there has been long-standing worship of images in Israel. Though the Bible intimates that Israelite religion was aniconic from the very beginning, the archaeological evidence and the dispassionate analysis of the available texts shows otherwise. The iconographical remains yield a fascinating view of the development and varieties in the cult of religious images. The iconoclasm of influential

currents in the late Israelite and early Judaic religion went in tandem with the promotion of the Book of the Law as a substitute of the image. In the case of the Bible, the rise of book religion must be seen in conjunction with the battle against images.

The Technical Image Horst Bredekamp, Vera Dunkel, Birgit Schneider, 2015 The use of images has been critical to the pursuit of science for centuries. This book explores, within an art historical framework how to comprehend images not as illustrative representations, but as productive agents and distinctive multi-layered elements of the epistemic process. If scientific images play a constructive role in shaping the findings and insights they illustrate, the representation of an observation in images, however mechanical, however detached from the individual researcher's choices their appearance may be, likewise becomes an instance of the style of a period, a mindset, a research collective, and a device. The Technical Image emerges from an institute in Germany, which has married art and historical analysis of technical images, and serves as a methodological reference and inspiration for visual representation in the sciences. The work opens with a series of methodological chapters that introduce a set of questions about representations in sciences and medicine, and the core of the work consists of historical case studies around specific images that in turn illustrate themes ranging from objectivity and evidence to digital images. Within these case studies are also definitions and elaborations of selected terms that have in recent years become key concepts in the analysis of scientific imagery.

Cinema: The time-image Gilles Deleuze, 1986 Discusses the theoretical implications of the cinematographic image based on Henri Bergson's theories

Everything Is Cinema Richard Brody, 2008-05-13 When Jean-Luc Godard, exemplary director of the French New Wave, wed the ideals of filmmaking to the realities of autobiography and current events, he changed the nature of cinema. Among the greatest cinematic innovations, Godard's films shift fluidly from fiction to documentary, from criticism to art. Similarly, his persona projects shifting images - cultural hero, impassioned loner, shrewd businessman. Hailed by filmmakers as a - if not the - key influence, Godard has entered the modern canon, a figure as mysterious as he is indispensable. In *Everything is Cinema*, critic Richard Brody has amassed hundreds of interviews with friends, family, and collaborators to demystify the elusive director and paint the fullest picture yet of his life and work. Paying as much attention to Godard's revolutionary technical inventions as to the political and emotional forces of the postwar world, Brody traces an arc from the director's early critical writing, through his popular success with *Breathless* and *Contempt*, to the grand vision of his later years. He vividly depicts Godard's wealthy, conservative family, his fluid and often disturbing politics, his tumultuous dealings with fellow filmmakers, and his troubled relations with women.--Jacket.

The Computer Image Alan H. Watt, Fabio Policarpo, 1998 The *Computer Image* is a unique book and CD-ROM package which provides a comprehensive overview of three converging areas of the computer image - computer graphics, image processing and computer vision.

Performing Image Isobel Harbison, 2019-04-09 An examination of how artists have combined performance and moving image for decades, anticipating our changing relation to images in the internet era. In *Performing Image*, Isobel Harbison examines how artists have combined performance and moving

image in their work since the 1960s, and how this work anticipates our changing relations to images since the advent of smart phones and the spread of online prosumerism. Over this period, artists have used a variety of DIY modes of self-imaging and circulation—from home video to social media—suggesting how and why Western subjects might seek alternative platforms for self-expression and self-representation. In the course of her argument, Harbison offers close analyses of works by such artists as Robert Rauschenberg, Yvonne Rainer, Mark Leckey, Wu Tsang, and Martine Syms. Harbison argues that while we produce images, images also produce us—those that we take and share, those that we see and assimilate through mass media and social media, those that we encounter in museums and galleries. Although all the artists she examines express their relation to images uniquely, they also offer a vantage point on today's productive-consumptive image circuits in which billions of us are caught. This unregulated, all-encompassing image performativity, Harbison writes, puts us to work, for free, in the service of global corporate expansion. Harbison offers a three-part interpretive framework for understanding this new proximity to images as it is negotiated by these artworks, a detailed outline of a set of connected practices—and a declaration of the value of art in an economy of attention and a crisis of representation.

Image, Eye and Art in Calvino Birgitte Grundtvig, Martin L. McLaughlin, Lene Waage Petersen, 2007
Few recent writers have been as interested in the cross-over between texts and visual art as Italo Calvino (1923-85). Involved for most of his life in the publishing industry, he took as much interest in the visual as in the textual aspects of his own and other writers' books. In this volume twenty international Calvino experts, including Barengi, Battistini, Belpoliti, Hofstadter, Ricci, Scarpa and others, consider the many

facets of the interplay between the visual and textual in Calvino's works, from the use of colours in his fiction to the influence of cartoons, from the graphic qualities of the book covers themselves to the significance of photography and landscape in his fiction and non-fiction. The volume is appropriately illustrated with images evoked by Calvino's major texts.

The Authority of the Word Celeste Brusati, Karl A. E. Enenkel, Walter Melion, 2011-11-11 This book examines scriptural authority and its textual and visual instruments, asking how words and images interacted to represent and by representing to constitute authority, both sacred and secular, in Northern Europe between 1400 and 1700.

The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

The Ground of the Image Jean-Luc Nancy, 2009-08-25 The renowned philosopher provides “noteworthy contributions to themes connected with images, imagination, representation, aesthetics, and . . . religion.” —Journal of American Academy of Religion What is this power that lies in the depths and recesses of an image—which is always only an impenetrable surface? What secrets are concealed in the

ground or in the figures of an image—which never does anything but show just exactly what it is and nothing else? How does the immanence of images open onto their unimaginable others, their imageless origin? In this collection of writings on images and visual art, Jean-Luc Nancy explores such questions through an extraordinary range of references. From Renaissance painting and landscape to photography and video, from the image of Roman death masks to the language of silent film, from Cleopatra to Kant and Heidegger, Nancy pursues a reflection on visibility that goes far beyond the many disciplines with which it intersects. He offers insights into the religious, cultural, political, art historical, and philosophical aspects of the visual relation, treating such vexed problems as the connection between image and violence, the sacred status of images, and, in a profound and important essay, the forbidden representation of the Shoah. In the background of all these investigations lies a preoccupation with finitude, the unsettling forces envisaged by the images that confront us, the limits that bind us to them, the death that stares back at us from their frozen traits and distant intimacies. In these vibrant and complex essays, a central figure in European philosophy continues to work through some of the most important questions of our time.
