Amrit Chhetri

The Historian's Toolbox Robert C Williams,2014-12-17 Written in an engaging and entertaining style, this widely-used how-to guide introduces readers to the theory, craft, and methods of history and provides a series of tools to help them research and understand the past. Part I is a stimulating, philosophical introduction to the key elements of history--evidence, narrative, and judgment--that explores how the study and concepts of history have evolved over the centuries. Part II guides readers through the workshop of history. Unlocking the historian's toolbox, the chapters here describe the tricks of the trade, with concrete examples of how to do history. The tools include documents, primary and secondary sources, maps, arguments, bibliographies, chronologies, and many others. This section also covers professional ethics and controversial issues, such as plagiarism, historical hoaxes, and conspiracy theories. Part III addresses the relevance of the study of history in today's fast-paced world. The chapters here will resonate with a new generation of readers: on everyday history, oral history, material culture, public history, event analysis, and historical research on the Internet. This Part also includes two new chapters for this edition. GIS and CSI examines the use of geographic information systems and the science of forensics in discovering and seeing the patterns of the past. Too Much Information treats the issue of information overload, glut, fatigue, and anxiety, while giving the reader meaningful signals that can benefit the study and craft of history. A new epilogue for this edition argues for the persistence of history as a useful and critically important way to understand the world despite the information deluge.

Through Angela's Eye Angela Hart,2010-12-08 Through Angela's Eye is the untold, inside story of Operation Firewall." After a series of unfortunate changes in circumstances, my life took an unwelcomed turn. What started out as my personal battle against those terrorizing me by stealing my identity through my personal computer turned into the largest case of identity theft in United States history! Not only did the computer hackers cause me financial distress, but they threatened my life! Not only did I get mad, but now I was determined to get justice. Little did I realize that my journey would lead to the exposing of corruption within our own government up to the vice president and president of the US and continued right up to the UN! Once the first domino fell, a series of events began to unfold. Operation Firewall began in July 2003 as an investigation into access device fraud before expanding into an investigation of global credit card fraud and identity theft. This case led to the inception of many laws being placed on the books to prosecute those who were perpetuating the crimes. The removal of spyware, malware, and malicious web sites that were trafficking in stolen identities, spam, hacking and even pornography are some of the positive results. My account of "Operation Firewall" will make Watergate look like child's play. It has led to over 4,000 cases and well over 64,000 arrests as of December 2005. The ramifications of this case will go on for years to come. As a result of the investigation, over \$260 billion per year is being saved by taking these criminals off the streets. It was a war that was fought without weapons but used computers coupled with a woman's intuition and common sense! Here is the inside story of "Operation Firewall," case number SSC\_2003R01260 as told by someone who is seeking Divine Justice.

**History in the Digital Age** Toni Weller,2012-11-27 The digital age is affecting all aspects of historical study, but much of the existing literature about history in the digital age can be alienating to the traditional historian who does not necessarily value or wish to embrace digital resources. History in the Digital Age takes a more conceptual look at how the digital age is affecting the field of history for both scholars and students. The printed copy, the traditional archive, and analogue research remain key constitute parts for most historians and for many will remain precious and esteemed over digital copies, but there is a real need for historians and students of history to seriously consider some of the conceptual and methodological challenges facing the field of historical enquiry as we enter the twenty-first century. Including international contributors from a variety of disciplines - History, English, Information Studies and Archivists – this book does not seek either to applaud or condemn digital technologies, but takes a more conceptual view of how the field of history is being changed by the digital age. Essential reading for all historians.

**Digital Privacy in the Marketplace** George Milne,2015-01-14 Digital Privacy in the Marketplace focuses on the data ex-changes between marketers and consumers, with special ttention to the privacy challenges that are brought about by new information technologies. the reader think more deeply about the impact of privacy issues on both consumers and marketers. It covers topics such as: why privacy is needed, the technological, historical and academic theories of privacy, how market exchange affects privacy, what are the privacy harms and protections available, and what is the likely future of privacy.

**Writing History in the Digital Age** Jack Dougherty, Kristen Nawrotzki, 2013-10-28 Writing History in the Digital Age began as a “what-if” experiment by posing a question: How have Internet technologies influenced how historians think, teach, author, and publish? To illustrate their answer, the contributors agreed to share the stages of their book-in-progress as it was constructed on the public web. To facilitate this innovative volume, editors Jack Dougherty and Kristen Nawrotzki designed a born-digital, open-access, and open peer review process to capture commentary from appointed experts and general readers. A customized WordPress plug-in allowed audiences to add page- and paragraph-level comments to the manuscript, transforming it into a socially networked text. The initial six-week proposal phase generated over 250 comments, and the subsequent eight-week public review of full drafts drew 942 additional comments from readers across different parts of the globe. The finished product now presents 20 essays from a wide array of notable scholars, each examining (and then breaking apart and reexamining) if and how digital and emergent technologies have changed the historical profession.
