AFRICANS Tiebet Joshua,2015-10-23 The world today regards the Europeans as the fathers of

Science and Technology and those who brought Light to the Black race. But if history says that civilization began in Africa, is it not correct to say that it was the Black race that taught the world Science and Technology? - Were the Blacks not the first Emperors of the world? - Is it not on record that at a point in human history, Africans were the most intelligent and the best instructed people in the world? - When the Europeans came to Africa, did they not see the Al-Azhur University in Egypt, University of Fez in Morocco and the University of Timbuktu in Mali? These and many more are the salient questions that this book bring to bare scientifically, historically and biblically.

Sustainability in Innovation and Entrepreneurship Antonio Leal-Millan,Marta Peris-Ortiz,Antonio L. Leal-Rodríguez,2017-07-03 This book provides a richly illustrated study of sustainability, innovation and entrepreneurship. Specifically, it examines the ways in which governmental policies and practices modify the social conditions necessary to promote innovation in businesses and by so doing impact economic development. Exploring topics such as green innovation, green customer capital, smart

cities, green entrepreneurship and environmental responsibility, this book presents some of the most current research and best practices in the field. In today's global economy, strategies, policies and practices that address the negative effects of human activity on the environment need to be incorporated into the business framework in order for companies to achieve a sustainable competitive advantage. Around the world, such changes have already resulted in a broad range of products, production methods and technical features that ensure environmental protection. At the same time, the mass media's communication of a deteriorating earth have motivated a growing number of citizens in both developed and developing nations to modify their consumption habits towards more ecological products. Consequently, an increasing number of companies are reacting to these changes in business and legal frameworks and consumer preferences by investing in new forms of green innovation or "eco-innovation" designed to promote both environmental and corporate sustainability. For example, Hewlett-Packard eliminated lead from its welding process; Wal-Mart reduced the emissions of their suppliers; and Cisco, Dell and IBM are investing in smart grids. This volume

showcases pioneering efforts among companies, citizens, and government agencies that are moving from theory to practice by placing sustainability at the core of their development strategies.
