Ubiquitous and Pervasive Commerce George Roussos,2006-02-20 At the core of this book is the interplay between technological and business innovation and social practice. Although the benefits of 50 years of rapid advances in digital telecommunications and computing technology have not benefited everyone equally, they have nevertheless transformed almost every aspect of the way we live. One area where technology has had a clear impact is in the way we conduct business. The rate of change that brings about modernity has been considerably strengthened by technological advances applied to product manufacturing, distribution, financing, and management, which arguably form the substrate for globalization and consumerism. It is thus no surprise that businesses closely monitor advances in technology and invest considerable resources in exploring possible new applications and market opportunities. Yet, consumers' acceptance of new ways of buying and selling depends as much on business and technology as on our society's culture and the culture of the material environment that defines our values, sensibilities, and thus our commitments. Moreover, the rate of technological innovation is such that to the consumer, technology implementation is fully opaque. Nonetheless, opportunities to carry out commerce in novel ways also introduce risk to established social structures, conventions, and institutions. In modernity, risk management is one of the core functions of society and to be successful in this, societies depend on their trust of experts. Experts take risks on behalf of society and are responsible for evaluating the full extent of a particular set of hazards including those associated with a particular technology.

Black Brands Fernando Olivares,2019-07-01 Who manufactures cereal for Kellogg's? Why are the Mercedes Smart and the Renault Twingo almost identical? Do Danone and Nestlé really manufacture everything they make us believe they manufacture? Is Zara an opaque or a transparent brand? Why do some companies claim "we do not manufacture for other brands" when yet they hide from us the fact that sometimes "other brands manufacture for them"? The number of companies outsourcing the whole of their production for their brands in an opaque manner is constantly increasing while they disregard the legitimate need for information and communication of the general public and consumers. Paradoxically, in this age of transparency opacity is ever growing among well-known brands in every industrial sector. Black Brands (in the Age of Transparency) is an extraordinary piece of work on truths and lies, on transparency and opacity of leading companies and brands in our age. The book is full of relevant cases never discussed before in sectors such as consumer products, baby foods, fashion, vehicles and mobile phones. Insightful and incisive, Fernando Olivares has directed his team to produce this book that will educate us as citizens and consumers. Their goal is to promote honest transparency – the only way to attain corporate legitimacy and sustainability in our time.

Hoppy Agreement Varun Khetawat,2021-09-10 Beer: A Punctilious Private Label Agreement During my college coursework, I did not take lessons in the study of commercial contracts or well-defined procurement processes. However, I got introduced to them working with large enterprises. I have inculcated years of experience & industry best practices in this private label agreement, designed for buying beer, which is made in Germany. I am confident this book will help you study industrial procurement processes, private label arrangement, collection of exclusive & creative clauses to help protect rights of the parties, and policies & procedures to regulate their relationship.

Lean Sustainable Supply Chain The Robert Palevich,2011-12-29 Lean, green supply chain management combines the efficiency that lean technologies deliver with the environmental and cost benefits of sustainability. The Lean Sustainable Supply Chain illuminates the business benefits of combining lean and green, and offers start-to-finish guidance for redesigning company infrastructure and technologies to achieve these benefits. Palevich introduces the essential concepts of lean green supply chain management, illuminating them with a comprehensive case study showing how to manage change, innovation, talent, execution, inventory, warehousing, and transportation. He demonstrates how to integrate supply chain sustainability into business scorecards; make more effective use of third-party providers (3PLs); drive more value from information; build a state-of-the-art forecasting system and share it with suppliers; and much more. He then systematically addresses the full spectrum of technical issues, including forecasting methodologies, the nitty-gritty of supplier integration; business intelligence in event-driven supply chains; carbon tracking; quantifying lean savings; and much more. This book will be an invaluable resource for every business and technical manager, decision-maker, technical specialist, and consultant concerned with lean and green supply chains.

Food Labelling J R Blanchfield,2000-07-25 J Ralph Blanchfield has brought together a distinguished panel of European and American experts from industry and academia. Together they provide a comprehensive guide to producing labelling that complies with existing legislation and satisfies the needs of all interested parties. Food labelling also provides a valuable insight into possible future developments. The book deals with each aspect of food labelling from the EU and USA perspectives in turn. The legislative requirements for both are fully examined in sections written by experts from the UK Ministry of Agriculture, Fisheries and Food and the US Food and Drug Administration respectively. There are chapters on major themes including the declaration of ingredients and additives, durability indication, nutrition information and nutrition and health claims. Readers will find answers to the questions raised by the issues of Genetically Modified and irradiated foods and ingredients, as well as guides to good international practice in design, multi-lingual requirements, shelf-life issues, traceability and instructions for storage and use. Food labelling is an invaluable guide for food processors, those concerned with food law and regulation, and all those involved in selling food products in the European Union, United States and throughout the rest of the world. Current legislation on the labelling of food products in the EU and US Full coverage of US and EU labelling regulations in a single source Controversial issue of labelling genetically modified and irradiated ingredients and foods

In part three traceability is reviewed in detail, looking at the development of efficient traceability systems and their application in practice to such areas as animal feed and fish processing. Food Authenticity and Traceability is an essential reference for all those concerned with food safety and quality. Outlines methods and issues in food authentication and traceability Deals with analytical techniques applied to food authentication, with chapters on established and developing technologies, chemometrics and data handling Explores how techniques are applied in particular sectors and reviews recent developments in traceability systems for differing food products

Doing Business 2018 World Bank,2017-11-14 Fifteen in a series of annual reports comparing business regulation in 190 economies, Doing Business 2018 measures aspects of regulation affecting 10 areas of everyday business activity: • Starting a business • Dealing with construction permits • Getting electricity • Registering property • Getting credit • Protecting minority investors • Paying taxes • Trading across borders • Enforcing contracts • Resolving insolvency These areas are included in the distance to frontier score and ease of doing business ranking. Doing Business also measures features of labor market regulation, which is not included in these two measures. The report updates all indicators as of June 1, 2017, ranks economies on their overall “ease of doing business”†, and analyzes reforms to business regulation †“ identifying which economies are strengthening their business environment the most. Doing Business illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced in partnership by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship. More than 137 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground. In addition, the Doing Business data has generated over 2,182 articles in peer-reviewed academic journals since its inception. Data Notes; Distance to Frontier and Ease of Doing Business Ranking; and Summaries of Doing Business Reforms in 2016/17 can be downloaded separately from the Doing Business website.
