History of Spartanburg County J. B. O. Landrum, J. B. O. Landrum's history of Spartanburg County is meticulously researched, being much-consulted by local and national historians since it was first published in 1900. Writing his account in a time that predates history books being of standardized structure and composition, Landrum's chronicle is unique and multifaceted. He focuses alternately on the history of the city of Spartanburg, and then of the surrounding countryside. The most famous buildings and places of business are discussed, with an insightful account of the local development of manufacturing and trade throughout the 19th century given. Importantly for modern-day readers is Landrum's research into the significance of Spartanburg during the U.S. Civil War. Many young men living locally were drafted into the Confederate army, several going on to display heroism and distinction in service. The war affected the area deeply; many families sustained at least one casualty, with the destruction of life and property leaving a lasting mark on the local culture. Roughly two-thirds of this book discusses the distinguished families and individuals who resided in the Spartanburg area. These genealogies and short biographies are accompanied by photographs, that we appreciate the personal and professional history of the area's respected sons and daughters.

Martin Folkes (1690-1754) Anna Marie Roos,2021 Martin Folkes (1690-1754): Newtonian, Antiquary, Connoisseur is a cultural and intellectual biography of the only President of both the Royal Society and the Society of Antiquaries. Sir Isaac Newton's protég , astronomer, mathematician, freemason, art connoisseur, Voltaire's friend and Hogarth's patron, his was an intellectually vibrant world. Folkes was possibly the best-connected natural philosopher and antiquary of his age, an epitome of Enlightenment sociability, and yet he was a surprisingly neglected figure, the long shadow of Newton eclipsing his brilliant disciple. A complex figure, Folkes edited Newton's posthumous works in biblical chronology, yet was a religious skeptic and one of the first members of the gentry to marry an actress. His interests were multidisciplinary, from his authorship of the first complete history of the English coinage, to works concerning ancient architecture, statistical probability, and astronomy. Rich archival material, including Folkes's travel diary, correspondence, and his library and art collections permit reconstruction through Folkes's eyes of what it was like to be a collector and patron, a Masonic freethinker, and antiquarian and virtuoso in the days before 'science' became sub-specialised. Folkes's virtuosic sensibility and possible role in the unification of the Society of Antiquaries and the Royal Society tells against the historiographical assumption that this was the age in which the 'two cultures' of the humanities and sciences split apart, never to be reunited. In Georgian England, antiquarianism and 'science' were considered largely part of the same endeavour.

Cultural Economy Paul du Gay,Michael Pryke,2002-01-31 Phrases such as `corporate culture', `market culture' and the `knowledge economy', have now become familiar clarion calls in the world of work. They are calls that have echoed through organizations and markets. Clearly something is happening to the ways markets and organizations are being represented and intervened in and this signals a need to reassess their very constitution. In particular, the once clean divide that placed the economy, dealt with mainly by economists, on one side, and culture, addressed chiefly by those in anthropology, sociology and the other `cultural sciences', on the other, can no longer hold. This volume presents the work of an international group of academics from a range of disciplines including sociology, media and cultural studies, social anthropology and geography, all of whom are involved not only in thinking `culture' into the economy but thinking culture and economy together.

Carbohydrate Chemistry Amelia Pilar Rauter,Thisbe K. Lindhorst,Yves Queneau,2015-12-02 With the increase in volume, velocity and variety of information, researchers can find it difficult to keep up to date with the literature in the field. As the synthesis of novel carbohydrates and carbohydrate mimetics continues to be a major challenge for organic chemists, not least because of the increasingly interdisciplinary nature of carbohydrate science, Carbohydrate Chemistry Volume 41 will prove invaluable. Covering both chemical and biological science, this series collates modern carbohydrate research from theory to application and will be of great benefit to any researcher who wishes to learn about the latest developments in the carbohydrate field.

Braddock's Defeat David L. Preston,2015-06-16 On July 9, 1755, British regulars and American colonial troops under the command of General Edward Braddock, commander in chief of the British Army in North America, were attacked by French and Native American forces shortly after crossing the Monongahela River and while making their way to besiege Fort Duquesne in the Ohio Valley, a few miles from what is now Pittsburgh. The long line of red-coated troops struggled to maintain cohesion and discipline as Indian warriors quickly outflanked them and used the dense cover of the woods to masterful and lethal effect. Within hours, a powerful British army was routed, its commander mortally wounded, and two-thirds of its forces casualties in one the worst disasters in military history. David Preston's gripping and immersive account of Braddock's Defeat, also known as the Battle of the Monongahela, is the most authoritative ever written. Using untapped sources and collections, Preston offers a reinterpretation of Braddock's Expedition in 1754 and 1755, one that does full justice to its remarkable achievements. Braddock had rapidly advanced his army to the cusp of victory, overcoming uncooperative colonial governments and seemingly insurmountable logistical challenges, while managing to carve a road through the formidable Appalachian Mountains. That road would play a major role in America's expansion westward in the years ahead and stand as one of the expedition's most significant legacies. The causes of Braddock's Defeat are debated to this day. Preston's work challenges the stale portrait of an arrogant European officer who refused to adapt to military and political conditions in the New World and the first to show fully how the French and Indian coalition achieved victory through effective diplomacy, tactics, and leadership. New documents reveal that the French Canadian commander, a seasoned veteran named Captain Beaujeu, planned the attack on the British column with great skill, and that his Native allies were more disciplined than the British regulars on the field. Braddock's Defeat establishes beyond question its profoundly pivotal nature for Indian, French Canadian, and British peoples in the eighteenth century. The disaster altered the balance of power in America, and escalated the fighting into a global conflict known as the Seven Years' War. Those who were there, including George Washington, Thomas Gage, Horatio Gates, Charles Lee, and Daniel Morgan, never forgot its lessons, and brought them to bear when they fought again-whether as enemies or allies-two decades hence. The campaign had awakened many British Americans to their provincial status in the empire, spawning ideas of American identity and anticipating the social and political divisions that would erupt in the American Revolution.
