A Life of George Washington Francis Glass,1836

Seasons of Captivity Amia Lieblich,1995-04 [An] engrossing study, told mainly by the subjects themselves... a valuable addition to POW literature and unique for its positive view of wartime captivity. —Publishers Weekly Lieblich has skillfully integrated oral histories to produce a compelling story. —Library Journal The minutes of the meetings recorded hereby are an excerpt of the lives of ten men, who had spent all their days and nights together. Each one observed the other in his grief and joy.Each one, according to his ability and sensitivity, saw it as his duty to contribute to the general welfare, to save our boat from sinking....In fact, we managed to keep afloat most of the time, and if we erred here or there, at least we had the best intentions. —From a secret collective diary kept by ten POWs A national bestseller when it first appeared in Israel, Seasons of Captivity is a story of human survival and hope that documents the experience of ten Israeli prisoners of war who shared a single jail cell in Egypt for more than three years. The engrossing chronicle of the prisoners' ordeal is told in their own words—from their capture in 1969, through six months of interrogation, torture, and isolation, to their movement to a common room. A watershed event, their transfer to shared living quarters enabled them to forge a community and an almost utopian social system. They held weekly meetings, kept a common diary, started study classes, and, among other projects, translated The Hobbit into Hebrew. The narrative goes on to describe the re-entry of the POWs into family and social roles upon their release and return to Israel in 1973. An exploration of the personal impact of the experience on the wives of the married prisoners introduces the women's own stories of separation and reunion. Some of them had suddenly found themselves, in effect, single mothers—yet their husbands were alive. Their husbands found stronger, more independent women in place of the traditional ones they had left behind. One of the women remarks, I thought [my husband] had been angry at me, in part unconsciously, for being so strong and competent in his absence...I had managed, well, almost effortlessly. This dramatic and moving account illustrates the resilience of the human spirit in the face of the most dehumanizing circumstances.

A new abridgment of Ainsworth's Dictionary, English and Latin, by J. Dymock Robert Ainsworth,1830

Escape Arti Rajan,2018-08-17

A messed up escapist trapped in the confines of her own mind, who happens to find another one. They relate-- they are beautiful, they are powerful, they are messed up and helpless. They are the only ones capable of saving each other totally, or destroying each other completely.

They are aware of the dangers of the power the other has, and yet they decide it's worth a shot...

HE is a captive in the world of his past, longing for just one way to escape. He is rude, closed, violent and heartless. Someone who would disappear from anybody's life and leave anyone stranded in order to escape-A past she finds hard to believe because she has only heard of it. In HER he finds a reason to live...

SHE is a beautiful mind with a terrible side to her. Sins, secrets and addictions were all just the unimaginable part of her life that a terrible past had given birth to. She longed to see a truth and innocence that had been taken away way too soon from her. In HIM she finds a reason to live...

Molecular Basis of Resilience Patrick L. Iversen,2018-09-29 This book illuminates mechanisms of resilience. Threats and defense systems lead to adaptive changes in gene expression. Environmental conditions may dampen adaptive responses at the level of RNA expression. The first seven chapters elaborate threats to human health. Human populations spontaneously invade niche boundaries exposing us to threats that drive the resilience process. Emerging RNA viruses are a significant threat to human health. Antiviral drugs are reviewed and how viral genomes respond to the environment driving genome sequence plasticity. Limitations in predicting the human outcome are described in “nonlinear anomalies.” An example includes medical countermeasures for Ebola and Marburg viruses under the “Animal Rule.” Bacterial infections and a review of antibacterial drugs and bacterial resilience mediated by horizontal gene transfer follow. Chapter 6 shifts focus to cancer and discovery of novel therapeutics for leukemia. The spontaneous resolution of AML in children with Down syndrome highlights human resilience. Chapter 7 explores chemicals in the environment. Examples of chemical carcinogenesis illustrate how chemicals disrupt genomes. Historic research ignored RNA damage from chemically induced nucleic acid damage. The emergence of important forms of RNA and their possible role in resilience is proposed. Chapters 8-10 discuss threat recognition and defense systems responding to improve resilience. Chapter 8 describes the immune response as a threat recognition system and response via diverse RNA expression. Oligonucleotides designed to suppress specific RNA to manipulate the immune response including exon-skipping strategies are described. Threat recognition and response by the cytochrome P450 enzymes parallels immune responses. The author proposes metabolic clearance of small molecules is a companion to the immune system. Chapter 10 highlights RNA diversity expressed from a single gene. Molecular Resilience lists paths to RNA transcriptome plasticity forms the molecular basis for resilience. Chapter 11 is an account of ExonDys 51, an approved drug for the treatment of Duchenne muscular dystrophy. Chapter 12 addresses the question “what informs molecular mechanisms of resilience?” that drives the limits to adaptation and boundaries for molecular resilience. He speculates that radical oxygen, epigenetic modifications, and ligands to nuclear hormone receptors play critical roles in regulating molecular resilience.

Patience and Salvation in Third Century North Africa Sarah Klitenic Wear, 2022-08 Patience and Salvation in Third Century North Africa: A Christian Latin Reader features the entirety of Tertullian's *To Martyrs and The Passion of Perpetua and Felicity*, with selections from Cyprian's *On the Good of Patience* and a short appendix on Augustine's *Commentary on Psalm 121.6*. The Latin text has facing vocabulary and theological, historical, philosophical, and grammatical notes. In the first three centuries, Roman Carthage produced some of the earliest literature composed originally in Latin by Christians. Tertullian's *Ad Martyras* (197); *Passio Perpetuae et Felicitatis* (203), and Cyprian's *De Bono Patientiae* (256) all embody the force of this new genre of Latin literature. With this literature, we see a variant of Latin often denoted Christian Latin. Christian Latin featured linguistic elements marked by characteristics of biblical Latin, later Latin, as well as vulgarisms. In addition to converging philologically, Tertullian, the author of the *Passio*, and Cyprian align themselves in *topos*: they all ask the question of how one can endure torment and anxiety in this world. Patience (*patientia*), derived from the verb *for to suffer* (*patior*), is a virtue that allows one to endure troubles, anxieties, and physical pains with the hope of eternal happiness and salvation in heaven. In this Reader, the student will find three different literary perspectives on this theme. The book also draws parallels to the works of Seneca and Cicero on patience and suffering.
