Proceedings of the Fifth SIAM International Conference on Data Mining Hillol Kargupta,2005-04-01 The Fifth SIAM International Conference on Data Mining continues the tradition of providing an open forum for the presentation and discussion of innovative algorithms as well as novel applications of data mining. Advances in information technology and data collection methods have led to the availability of large data sets in commercial enterprises and in a wide variety of scientific and engineering disciplines. The field of data mining draws upon extensive work in areas such as statistics, machine learning, pattern recognition, databases, and high performance computing to discover interesting and previously unknown information in data. This conference results in data mining, including applications, algorithms, software, and systems.

The Modernisation of the Republic of Korea Navy
Ian Bowers,2018-08-11 This book sheds light on one of the most under-studied but powerful navies in the world. Using a multifaceted approach, it examines how the Republic of Korea Navy (ROKN) has sought to transform itself from a coastal naval force focused solely on deterring North Korea to a navy capable of operating in the blue waters of East

Asia and beyond. The project argues that peninsular and regional security dynamics, technological developments, the US-South Korea alliance and internal politics combine to inform and shape ROKN modernisation.

Naval Powers in the Indian Ocean and the

Western Pacific Howard M. Hensel,Amit Gupta,2018-05-11

A vital component of the interdependent global economy, maritime transit routes are nowhere more critical than those traversing the Indian Ocean and the Western Pacific. Previously, areas of the Indian Ocean and Western Pacific have been viewed as separate and discrete political, economic, and military regions. In recent years, however, a variety of economic, political, and military forces have created a new understanding of these maritime expanses as one zone of global interaction. This book complements the material presented in its companion volume, *Maritime Security in the Indian Ocean and the Western Pacific*, by analysing the perceptions, interests, objectives, maritime capabilities, and policies of the major maritime powers operating in the Indian Ocean and the Western Pacific. In addition, the book also assesses the contemporary maritime challenges and opportunities that confront the global community within what is rapidly becoming recognised as an integrated zone of global interaction. A valuable study for researchers and policymakers working in the fields of maritime security; military, security and peace studies; conflict resolution; and Asian affairs.

The Chinese Navy ,2012

Small Navies Michael Mulqueen,Deborah Sanders,Ian Speller,2016-04-01 Whilst maritime studies tend to reflect the dominance of large navies, history shows how relatively small naval forces can have a disproportionately large impact on global events. From Confederate commerce raiders in the nineteenth century, to Somali pirates today, even the most minor of maritime forces can become a key player on a global stage. Examining a broad range of examples, this volume addresses the roles and activities of small navies in the past and the present at the national, regional and international level. In particular, it focusses on the different ways in which such forces have identified and addressed national and international security challenges and the way in which they interact with other navies and security agencies. In addition the collection also investigates the relationship of such navies with non-governmental organisations, institutions and bodies in pursuit of broader maritime goals, be they political, financial or environmental. Adopting an interdisciplinary approach drawing on the best new research from the fields of international relations, security studies, strategic studies and maritime history, the book examines the diversity of experience amongst different smaller navies and also

establishes areas of similarity. Divided into two sections, part one begins with a number of chapters that are theoretical in nature, whilst part two provides case studies that offer a more regional focus, including analysis of the challenges facing contemporary navies and historical case studies designed to reveal the experience of small navies over time. By adopting an approach that combines historical considerations with analysis of current events, the collection offers a unique perspective on the role that small navies have played in wider nautical affairs and their continued impact upon global maritime strategies.

Optics F2f Charles S. Adams,Ifan G. Hughes,2018-12-13 This textbook on optics provides an introduction to key concepts of wave optics and light propagation. It uniquely makes extensive use of Fourier methods and the angular-spectrum approach, especially to provide a unified approach to Fraunhofer and Fresnel diffraction. A recurring theme is that simple building blocks such as plane and

spherical waves can be summed to construct useful solutions. The text pays particular attention to analysing topics in contemporary optics such as propagation, dispersion, laser beams and wave guides, apodisation, tightly-focused vector fields, unconventional polarization states, and light-matter interactions. Throughout the text, the principles are applied through worked examples, and the book is copiously illustrated with more than 240 figures. The 200 end-of-chapter exercises offer further opportunities for testing the reader's understanding.

Naval Strategy in Northeast Asia Duk-Ki Kim, 2012-10-12
Over the past decade, Northeast Asia has been dominated by quite significant strategic change, which is ongoing and brings with it many uncertainties. naval capabilities in Northwest Asia are instrumental in promoting maritime security interests - helping to build a stable security environment through active participation in regional naval co-operation. This landmark book explores the region's maritime peace and stability, and examines in depth the strategic, military and apolitical issues that underpin any effort to develop maritime co-operation.
