She covers garden layout, bed construction, and fencing options and offers specific design examples for a wide variety of possibilities for edible landscapes, such as a schoolyard, restaurant, or residence. Landscaping with Trees in the Midwest Scott A.

Zanon,2014-08-15 Trees not only add beauty and value to property but also enhance the physical environment by providing shade, reflecting heat, and blocking wind. Choosing the right trees for the right location and conditions, however, is not always easy: each species has its own requirements for sunlight, water, drainage, and protection. *Landscaping with Trees in the Midwest: A Guide for Residential and Commercial Properties* describes sixty-five desirable tree species, their characteristics, and their uses. More than 325 color photographs illustrate the appearance of each species through the seasons—including height, shape, bark, flowers, and fall colors—as well as other factors that influence selection and siting in order to help the landscape professional or homeowner make informed choices. This guidebook also considers trees as a factor in overall environmental health and gives special consideration to the effects of the emerald ash borer, which continues to wreak havoc in wooded areas of the Midwest, offering replacement alternatives for vulnerable areas. In addition to the text and photos, the book includes a table of growth rates and sizes, a map of hardiness zones, and other valuable reference tools.
