Creating with Laser Cutters and Engravers Mary-Lane Kamberg,2016-12-15 This text provides readers with an exploratory lens into the general world of the Fab Lab with an in-depth focus on two specific types of machinery: laser cutters and engravers. These machines give users the unique opportunity to create through the removal of material from its source. Included for readers are hands-on tips and tricks for operating laser cutters and engravers, providing a variety of projects for every experience level, all the while connecting these skills to real-world business models and careers. This title tackles the arts and design element of STEAM more than any other Fab Lab machines do.

Machine Learning for Camera-Based Monitoring of Laser Welding Processes Hartung, Julia,2024-03-08 The increasing use of automated laser welding processes causes high demands on process monitoring. This work demonstrates methods that use a camera mounted on the focussing optics to perform pre-, in-, and post-process monitoring of welding processes. The implementation uses machine learning methods. All algorithms consider the integration into industrial processes. These challenges include a small database, limited industrial manufacturing inference hardware, and user acceptance.

Laser Metrology and Machine Performance V G. N. Peggs,2001 Reporting on the latest international standards, calibration and certification procedures, this volume contains the official proceedings of the Fifth International Conference on Laser Metrology, Machine Tool, CMM and Robot Performance. Areas highlighted include: machine tool condition monitoring and calibration; co-

ordination of metrology and its application to manufacturing performance and industrial inspection; new techniques in performance assessment and verification; numerical and computational tools.

Mastering Digitally Controlled Machines Jean-michel Molenaar,Daniele Ingrassia,2024-01-30
Take control of your machine building and production processes with computer-run tools to safely use, or even build, a durable machine for use in your garage or even a startup company. This book provides best practices for laser cutters, 3D printers, CNC mills, vinyl cutters, and more. You'll begin by learning the history of digitally controlled tools, as well as how they work and what materials you can use with them. With this knowledge, you won't just learn how to make common machines work, you'll go to the next level and build your own machine—whether that be a plasma cutter or a CNC milling machine. You will learn how they use these tools to create amazing products, art, and even new machines! You'll also find handy overviews of tools, software, and materials to use in a reference appendix. After reading Mastering Digitally Controlled Machines you'll be able to create something for yourself, your community, or your company. What You'll LearnUse accessible computer-controlled machines safely to make anything you want to buildFit the right tool and materials with the right projectsBuild your own CNC machine custom tailored to your project's needs Who This Book Is For People who want to understand how accessible computer-controlled tools work and build any kind of product themselves. Makerspaces, Fab Labs, and similar spaces will benefit. And people who want to create prototypes and products for themselves or their company/ startup, or to start creating prototypes without much prior knowledge.
