Lead-Bismuth-Cooled Fast Reactors Georgii I. Toshinskii,2023-05-03 Nuclear power (NP) can bring great benefits to humanity by generating energy without emitting carbon into the environment. To solve the problem of global climate change, the number of nuclear power plants (NPPs) in the world must be much larger than it currently is. However, due to accidents at NPPs, people are in disbelief of NP, which has led to the closure of NPPs in some countries and a slowdown in the development of NP across the world. This tendency can be overcome by creating NPPs with reactors with a high level of inherent self-protection, in which the causes of the most severe accidents are excluded by the laws of nature. These reactors include those with a lead-bismuth eutectic, in which there is no high pressure and no explosive hydrogen is formed. This book brings together articles and reports from Russian specialists devoted to such reactors. It will be of interest to both specialists working in nuclear power engineering and university students.

Seattle General Strike Cal Winslow,2019-02-05 A thrilling account of one of the most dramatic chapters in the history of American labor, retold for the strike's 100th anniversary One hundred years before the dystopian promise of Seattle's wish-fulfillment centers, the city seemed on the precipice of another future entirely. For five days in February 1919, the emerald city's working class struck across all trades and sectors; as production came to a stop, the real work began: committees were organized to feed the hungry, others to keep the peace and tend to the sick. To the terror of Western tycoons, it seemed as if a red star was flying over Seattle. Cal Winslow retells this tragically forgotten story with fresh eyes. Drawn from original research, Winslow does justice to the leading role that women, black, and Japanese-immigrant workers played in the upsurge, just as he shows the multitudinous histories of resistance that were bound together by the act of the strike. An unprecedented history from below, *The Soviet in Seattle* shows that what E.P. Thompson called the long tenacious revolutionary tradition of the common people was never foreign to American shores.

The Morals of the Market (LBE) Jessica Whyte,2020-01-21 The fatal embrace of human rights and neoliberalism Drawing on detailed archival research on the parallel histories of human rights and neoliberalism, Jessica Whyte uncovers the place of human rights in neoliberal attempts to develop a moral framework for a market society. In the wake of the Second World War, neoliberals saw demands for new rights to social welfare and self-determination as threats to “civilisation”. Yet, rather than rejecting rights, they developed a distinctive account of human rights as tools to depoliticise civil society, protect private investments and shape liberal subjects.

City of Segregation (LBE) Andrea Gibbons,2018-09-18 A majestic one-hundred-year study of segregation in Los Angeles *City of Segregation* documents one hundred years of struggle against the enforced separation of racial groups through property markets, constructions of community, and the growth of neoliberalism. This movement history covers the decades of work to end legal support for segregation in 1948; the 1960s Civil Rights movement and CORE's efforts to integrate LA's white suburbs; and the 2006 victory preserving 10,000 downtown residential hotel units from gentrification enfolded within ongoing resistance to the criminalization and displacement

of the homeless. Andrea Gibbons reveals the shape and nature of the racist ideology that must be fought, in Los Angeles and across the United States, if we hope to found just cities.
