Speed Reading Made Easy Helena Watson,2022-08-18 Recognizing written words and processing a quick temporal sequence of stimuli are two key components of the early sensory aspect of reading that are captured by reading speed. Reading speed, as opposed to mere word recognition, is more illuminating of a reader's reading abilities. Eye movements and reading speed are tightly correlated. Eye movements occur at a consistent rate of roughly four per second. Shorter eye movements are related to slower reading. The time per fixation grows as reading slows down due to difficulty understanding the text's meaning. Three reading processes-word shape, sentence context, and letter-by-letter decoding-each provide a unique contribution to reading speed.

Ultralearning Scott Young,2019-08-06 Now a Wall Street Journal bestseller. Learn a new talent, stay relevant, reinvent yourself, and adapt to whatever the workplace throws your way. Ultralearning offers nine principles to master hard skills quickly. This is the essential guide to future-proof your career and maximize your competitive advantage through self-education. In these

tumultuous times of economic and technological change, staying ahead depends on continual self-education—a lifelong mastery of fresh ideas, subjects, and skills. If you want to accomplish more and stand apart from everyone else, you need to become an ultralearner. The challenge of learning new skills is that you think you already know how best to learn, as you did as a student, so you rerun old routines and old ways of solving problems. To counter that, Ultralearning offers powerful strategies to break you out of those mental ruts and introduces new training methods to help you push through to higher levels of retention. Scott H. Young incorporates the latest research about the most effective learning methods and the stories of other ultralearners like himself—among them Benjamin Franklin, chess grandmaster Judit Polgár, and Nobel laureate physicist Richard Feynman, as well as a host of others, such as little-known modern polymath Nigel Richards, who won the French World Scrabble Championship—without knowing French. Young documents the methods he and others have used to acquire knowledge and shows that, far from being an obscure skill limited to aggressive autodidacts, ultralearning is a powerful tool anyone can use to improve their career, studies, and life. Ultralearning explores this fascinating subculture, shares a proven framework for a successful ultralearning project, and offers insights into how you can organize and execute a plan to learn anything deeply and quickly, without teachers or budget-busting tuition costs. Whether the goal is to be fluent in a language (or ten languages), earn the equivalent of a college degree in a

fraction of the time, or master multiple tools to build a product or business from the ground up, the principles in Ultralearning will guide you to success.
