Progressive Library Organizations Alfred Kagan,2015-03-26 This work presents the history and impact of the seven most important progressive library organizations worldwide--in Austria, Germany, South Africa, Sweden, United Kingdom, and two in the United States. Each organization is considered within its national context, and in fact, the English word organization does not quite fit the nature of all of the groups. The South African organization, LIWO, was transitional in that it helped bring South African librarianship from apartheid to majority rule and then disbanded. The other organizations or their successors are still working in one form or another. Some of the organizations have had or continue to have vibrant local chapters, though many of the original activists have recently retired or died. The author has interviewed many of them at a time when they were assessing their life work, and handing off to new generations.

College Libraries and Student Culture Lynda M. Duke,Andrew D. Asher,2011-09-23 This important book deepens our understanding of how academic libraries can better serve students' needs, and also serves as a model for other researchers interested in a user-centered approach to evaluating library services.

Each chapter has been expanded and updated with new material and reading lists. In addition, a chapter that is new to this edition deals with e-serials; and two appendixes contain samples of policies related to electronic concerns. It is an excellent survey of the state of the art of collection development and a comprehensive text.

The Dark Library Cyrille Martinez,2020-10-20 Libraries are magical places. But what if they're even more magical than we know?
A History of Modern Librarianship Pamela Spence Richards,Wayne A. Wiegand,Marija Dalbello,2015-05-26 A broad, comparative history of librarianship, this intriguing work goes beyond the standard focus on institutions and collections to help you explore the part modern librarianship played—and continues to play—in forming Western cultures. Previous histories of libraries in the Western world—the last of which was published nearly 20 years ago—concentrate on libraries and librarians. This book takes a different approach. It focuses on the practice of librarianship, showing you how that practice has contributed to constructing the heritage of cultures. To do so, this groundbreaking collection of essays presents the history of modern librarianship in the context of recent developments of the library institution, professionalization of librarianship, and innovation through information technology. Organized by region, the book addresses the widely recognized, international impact of Anglo-American librarianship and its continuing influence over the past century, combining critical analysis with chronological histories of modern librarianship in Europe, North America, Australia/New Zealand, and Africa. An introductory chapter explains the origins of the project, and a concluding chapter examines the effects of digitization on modern librarianship in the 21st century.
