The Encyclopaedia Britannica Hugh Chisholm, 1911
"What is Literature?" and Other Essays Jean-Paul Sartre, 1988 What is Literature? challenges anyone who writes as if literature could be extricated from history or society. But Sartre does more than indict. He offers a definitive statement about the phenomenology of reading, and he goes on to provide a dashing example of how to write a history of literature that takes ideology and institutions into account.

Text Book Robert Scholes, Nancy R. Comley, Gregory L. Ulmer, 2001-12-21 Designed for literature-based writing courses, Text Book introduces students to the idea that literary texts and ordinary spoken and written language share many of the same features. By providing imaginative methods and unique assignments that let students work with those features in their writing, Text Book involves students in the processes of exploring literature creatively, not simply consuming and

analyzing it, helping them understand literature from the inside out.

Literature for Young Adults Joan L.

Knickerbocker, James A. Rycik, 2019-08-28 Now in its second edition, this book explores a great variety of genres and formats of young adult literature while placing special emphasis on contemporary works with nontraditional themes, protagonists, and literary conventions that are well suited to young adult readers. It looks at the ways in which contemporary readers can access literature and share the works they're reading, and it shows teachers the resources that are available, especially online, for choosing and using good literature in the classroom and for recommending books for their students' personal reading. In addition to traditional genre chapters, this book includes chapters on literary nonfiction; poetry, short stories, and drama; and film. Graphic novels, diversity issues, and uses of technology are also included throughout the text. The book's discussion of literary language—including traditional elements as well as metafictional terms—enables readers to share in a literary conversation with their peers (and others) when communicating about books. This book is an essential resource for preservice educators to help young adults understand and appreciate the excellent literature that is available to them. New to the second edition: New popular authors, books, and movies with a greater focus on diversity of literature Updated coverage of new trends, such as metafiction, a renewed focus on nonfiction, and retellings of canonical works

Increased attention to graphic novels and multimodal texts throughout the book eResources with downloadable materials, including book lists, awards lists, and Focus Questions

The Value of Literature Rafe McGregor, 2016-08-22
The Value of Literature provides an original and compelling argument for the historical and contemporary significance of literature to humanity.

On Literature Hillis Miller, 2003-09-02 Debates rage over what kind of literature we should read, what is good and bad literature, and whether in the global, digital age, literature even has a future. But what exactly is literature? Why should we read literature? How do we read literature? These are some of the important questions J. Hillis Miller answers in this beautifully written and passionate book. He begins by asking what literature is, arguing that the answer lies in literature's ability to create an imaginary world simply with words. *On Literature* also asks the crucial question of why literature has such authority over us. Returning to Plato, Aristotle and the Bible, Miller argues we should continue to read literature because it is part of our basic human need to create imaginary worlds and to have stories. Above all, *On Literature* is a plea that we continue to read and care about literature.

The Invention of Literature Florence Dupont, 1999
The invention of literature, writes Florence Dupont, is recent, and its classical ancestry is not firm. Rather than representing solely the remains of a network of readers and writers, the odes, epics, tales, and dramas of Greece and Rome

had a much more diversified background and purpose. Some works were intended to be read in groups; other works were not meant to be read at all. Resisting the traditional temptation to project current tastes and beliefs backward upon Greece and Rome. *The Invention of Literature* presents classical writings in all their differences. The labor of understanding a lyric or an epic as it was understood in its time requires a radical reconsideration of what reading is and what it means.

Bourdieu and Literature John R. W. Speller, 2011
Bourdieu and Literature is a wide-ranging, rigorous and accessible introduction to the relationship between Pierre Bourdieu's work and literary studies. It provides a comprehensive overview and critical assessment of his contributions to literary theory and his thinking about authors and literary works. One of the foremost French intellectuals of the post-war era, Bourdieu has become a standard point of reference in the fields of anthropology, linguistics, art history, cultural studies, politics, and sociology, but his longstanding interest in literature has often been overlooked. This study explores the impact of literature on Bourdieu's intellectual itinerary, and how his literary understanding intersected with his sociological theory and thinking about cultural policy. This is the first full-length study of Bourdieu's work on literature in English, and it provides an invaluable resource for students and scholars of literary studies, cultural theory and sociology.

Why Reading Books Still Matters Martha C.

Pennington, Robert P. Waxler, 2017-08-29 Bringing together strands of public discourse about valuing personal achievement at the expense of social values and the impacts of global capitalism, mass media, and digital culture on the lives of children, this book challenges the potential of science and business to solve the world's problems without a complementary emphasis on social values. The selection of literary works discussed illustrates the power of literature and human arts to instill such values and foster change. The book offers a valuable foundation for the field of literacy education by providing knowledge about the importance of language and literature that educators can use in their own teaching and advocacy work.

Understanding Literature Walter B. Kalaidjian, Judith Roof, Stephen Watt, 2004

Aunt Phillis's Cabin Mary H. Eastman, 2019-09-25

The Object of Jewish Literature Barbara E. Mann, 2022-07-26 A history of modern Jewish literature that explores our enduring attachment to the book as an object. With the rise of digital media, the death of the book" has been widely

discussed. But the physical object of the book persists. Here, through the lens of materiality and objects, Barbara E. Mann tells a history of modern Jewish literature, from novels and poetry to graphic novels and artists' books. Bringing contemporary work on secularism and design in conversation with literary history, she offers a new and distinctive frame for understanding how literary genres emerge. The long twentieth century, a period of tremendous physical upheaval and geographic movement, witnessed the production of a multilingual canon of writing by Jewish authors. Literature's objecthood is felt not only in the physical qualities of books—bindings, covers, typography, illustrations—but also through the ways in which materiality itself became a practical foundation for literary expression.

Introduction to Literature Dorothy U.

Seyler, Richard A. Wilan, 1981

The Routledge Introduction to American War Literature Jennifer Haytock, 2018-05-11 War and violence have arguably been some of the strongest influences on literature, but the relation is complex: more than just a subject for story-telling, war tends to reshape literature and culture. Modern war literature necessarily engages with national ideologies, and this volume looks at the specificity of how American literature deals with the emotional, intellectual, social, political, and economic contradictions that evolve into and out of war. Raising questions about how American ideals of independence and gender affect representations of war while also considering how specifically American experiences of race and

class interweave with representations of combat, this book is a rich and coherent introduction to these texts and critical debates.

Prizing Children's Literature Kenneth B. Kidd, Joseph T. Thomas Jr., 2016-11-10 Children's book awards have mushroomed since the early twentieth-century and especially since the 1960s, when literary prizing became a favored strategy for both commercial promotion and canon-making. There are over 300 awards for English-language titles alone, but despite the profound impact of children's book awards, scholars have paid relatively little attention to them. This book is the first scholarly volume devoted to the analysis of Anglophone children's book awards in historical and cultural context. With attention to both

political and aesthetic concerns, the book offers original and diverse scholarship on prizing practices and their consequences in Australia, Canada, and especially the United States. Contributors offer both case studies of particular awards and analysis of broader trends in literary evaluation and elevation, drawing on theoretical work on canonization and cultural capital. Sections interrogate the complex and often unconscious ideological work of prizing, the ongoing tension between formalist awards and so-called identity-based awards – all the more urgent in light of the We Need Diverse Books campaign – the ever-morphing forms and parameters of prizing, and scholarly practices of prizing. Among the many awards discussed are the Pura Belpré Medal, the Inky Awards, the Canada Governor General Literary Award, the Printz Award, the Best Animated Feature Oscar, the Phoenix Award, and the John Newbery Medal, giving due attention to prizes for fiction as well as for non-fiction, poetry, and film. This volume will interest scholars in literary and cultural studies, social history, book history, sociology, education, library and information science, and anyone concerned with children's literature.
