Lock 'N' Load Tee O'Fallon,2018-05-28 Crack CIA analyst Trista Gold is a whiz with the computer, but not so much with people. She hides behind her job, analyzing Top Secret code and making recommendations on national security. She doesn't need a man in her life. But she will, very soon... CIA K-9 officer Sgt. Matt Connors suspects that beneath Trista's uptight appearance, there's a sexy woman itching to cut loose. But he doesn't dare act on his attraction. He's a loner and always will be. Keeping away from Trista is a must-do directive. Until he doesn't have a choice... During a routine assignment, Trista stumbles across a cryptic exchange. She doesn't think much of it...until someone tries to murder her—twice. Both times, Matt had been there to save her. But now she has to hide. And her new bodyguard, Matt, and his K-9 are the only hope she has against the powerful forces that want her dead. Each book in the Federal K-9 series is STANDALONE: * Lock 'N' Load * Armed 'N' Ready * Dark 'N' Deadly * Trap 'N' Trace * Serve 'N' Protect * Honor 'N' Duty * Above 'N' Beyond

Short-Term Load Forecasting 2019 Antonio Gabaldón,María Carmen Ruiz-Abellón,Luis Alfredo Fernández-Jiménez,2021-02-26 Short-term load forecasting (STLF) plays a key role in the formulation of economic, reliable, and secure operating strategies (planning, scheduling, maintenance, and control processes, among others) for a power system and will be significant in the future. However, there is still much to do in these research areas. The deployment of enabling technologies (e.g., smart meters) has made high-granularity data available for many customer segments and to approach many issues, for instance, to make forecasting tasks feasible at several demand aggregation levels. The first challenge is the improvement of STLF models and their performance at new aggregation levels. Moreover, the mix of renewables in the power system, and the necessity to include more flexibility through demand response initiatives have introduced greater uncertainties, which means new challenges for STLF in a more dynamic power system in the 2030–50 horizon. Many techniques have been proposed and applied for STLF, including traditional statistical models and AI techniques. Besides, distribution planning needs, as well as grid modernization, have initiated the development of hierarchical load forecasting. Analogously, the need to face new sources of uncertainty in the power system is giving more importance to probabilistic load forecasting. This Special Issue deals with both fundamental research and practical application research on STLF methodologies to face the challenges of a more distributed and customer-centered power system.

Cognitive Load Measurement and Application Robert Z. Zheng,2017-11-22 Cognitive Load Measurement and Application provides up-to-date research and

theory on the functional role of cognitive load measurement and its application in multimedia and visual learning. Grounded in a sound theoretical framework, this edited volume introduces methodologies and strategies that effect high-quality cognitive load measurement in learning. Case studies are provided to aid readers in comprehension and application within various learning situations, and the book concludes with a review of the possible future directions of the discipline.

Wave 2002: Wave Propagation - Moving Load - Vibration Reduction Nawawi Chouw, Günther Schmid, 2021-07-29 Detailing the proceedings of the Wave 2002 workshop at Okayama University in Japan, this collection of eighteen peer-reviewed papers concerns the issue of the ground vibration and noise caused by construction activities, explosions in the ground, or high-speed trains. Providing key information for engineers, researchers, scientists, practitioners, teachers and students working in the field of structural dynamics or soil dynamics, this text also includes a useful address list in the appendix to enable readers to gather further information if required.

The Dortmund Lumbar Load Atlas Matthias Jäger, 2023-03-07 This handbook supports the identification of inappropriate work design in manual materials handling and thus the prevention of overloading the body and of the development of health disorders. The approach at hand, The Dortmund Lumbar Load Atlas, is focussed exclusively on biomechanical aspects of loading, overload criteria and signs of overloading in the form of verifiable low-back diseases due its strikingly frequently affectedness. Manual materials handling is understood to be the holding, lifting or lowering, pulling or pushing as well as carrying of load objects and thus the application of forces mostly with one or both hands on the item handled. Due to the biomechanical similarity, special handling tasks are also addressed, such as shoveling bulk material, transporting goods via wheelbarrow and moving people manually in the care sector. The book aims to promote interest in biomechanical approaches and provides information to all persons involved in the design, evaluation and redesign of manual materials handling, e.g. ergonomists, occupational physicians, orthopaedists, employers or researchers, lecturers and students. This handbook enables analysis of manual materials handlings regarding potential lumbar overload and contains the following: a comprehensive collection of data on lumbar load in typical manual materials handling activities—a load register on interbranch activities, synopses of previously analysed biomechanically challenging occupational activities—a load register on branch-specific activities, explanations of the methodological approach to predicting moments and forces as well as their components in relation to the lumbar spine via biomechanical modelling and criteria for the evaluation of load data with regard to potential lumbar overloading during single operations, working shifts and the entire occupational life. The new recommendations on maximum daily exposure for lifelong work for both men and women are bridging the former gap of biomechanically justified action frequency limits and now offer the possibility of a completely biomechanical path for risk assessment of manual materials handling. The book provides hence a serious contribution to the objectification of lumbar load and load-bearing capacity aiming at an ergonomic work design of manual materials handling for short- as well as long-term exposures.

Wind Loads and Anchor Bolt Design for Petrochemical Facilities Task Committee on Anchor Bolt Design,1997-01-01 Prepared by the Task Committee on Wind-Induced Forces and Task Committee on Anchor Bolt Design of the Petrochemical Committee of the Energy Division of ASCE. This report presents state-of-the-practice set of guidelines for the determination of wind-induced forces and the design of anchor bolts for petrochemical facilities. Current codes and standards do not address many of the structures found in the petrochemical industry. As a result, engineers and petrochemical companies have independently developed procedures and techniques for handling engineering issues such as the two contained in this report. A lack of standardization in the industry has led to inconsistent structural reliability, however. This volume is intended for structural design engineers familiar with design of industrial-type structures.

A Load of Hooey Bob Odenkirk,2014-10-07 Bob Odenkirk is a legend in the comedy-writing world, winning Emmys and acclaim for his work on Saturday Night Live, Mr. Show with Bob and David, and many other seminal TV shows. This book, his first, is a spleen-bruisingly funny omnibus that ranges from absurdist monologues ("Martin Luther King, Jr's Worst Speech Ever") to intentionally bad theater ("Hitler Dinner Party: A Play"); from avant-garde fiction ("Obituary for the Creator of Madlibs") to free-verse poetry that's funnier and more powerful than the work of Calvin Trillin, Jewel, and Robert Louis Stevenson combined. Odenkirk's debut resembles nothing so much as a hilarious new sketch comedy show that's exclusively available as a streaming video for your mind. As Odenkirk himself writes in "The Second Coming of Jesus and Lazarus," it is a book "to be read aloud to yourself in the voice of Bob Newhart."

Critical Loads and Dynamic Risk Assessments Wim de Vries,Jean-Paul Hettelingh,Maximilian Posch,2015-04-20 This book provides a unique overview of research methods over the past 25 years assessing critical loads and temporal effects of the deposition of air pollutants. It includes critical load methods and applications addressing acidification, eutrophication and heavy metal pollution of terrestrial and aquatic ecosystems. Applications include examples for each air pollution threat, both at local and regional scale, including Europe, Asia, Canada and the US. The book starts with background information on the effects of the deposition of sulphur, nitrogen and heavy metals and geochemical and biological indicators for risk assessments. The use of those indicators is then illustrated in the assessment of critical loads and their exceedances and in the temporal assessment of air pollution risks. It also includes the most recent developments of assessing critical loads and current and future risks of soil and water chemistry and biodiversity under climate change, with a special focus on nitrogen. The book thus provides a complete overview of the knowledge that is currently used for the scientific support of policies in the field of air pollution control to protect ecosystem services.

Design of Piles Under Cyclic Loading Alain Puech, Jacques Garnier, 2018-01-04
Recent developments in the fields of energy, transport and industrial engineering have led to the emergence of new types of structures and infrastructures subject to variable stresses, for which the usual methods for designing pile foundations are now inadequate. The recommendations presented in this book will help to partly fill this technical gap by proposing a methodological approach and calculation methods to take account of the effects of cyclic loads in the design of foundations on piles. These are based on both laboratory and full scale experiments, and on modeling carried out within the framework of the national SOLCYP project.
