On the Move Filiz Garip,2016-11-01 Why do Mexicans migrate to the United States? Is there a typical Mexican migrant? Beginning in the 1970s, survey data indicated that the average migrant was a young, unmarried man who was poor, undereducated, and in search of better employment opportunities. This is the general view that most Americans still hold of immigrants from Mexico. On the Move argues that not only does this view of Mexican migrants reinforce the stereotype of their undesirability, but it also fails to capture the true diversity of migrants from Mexico and their evolving migration patterns over time. Using survey data from over 145,000 Mexicans and in-depth interviews with nearly 140 Mexicans, Filiz Garip reveals a more accurate picture of Mexico-U.S migration. In the last fifty years there have been four primary waves: a male-dominated migration from rural areas in the 1960s and '70s, a second migration of young men from socioeconomically more well-off families during the 1980s, a migration of women joining spouses already in the United States in the late 1980s and '90s, and a generation of more educated, urban migrants in the late 1990s and early 2000s. For each of these four stages, Garip examines the changing variety of reasons for why people migrate and migrants' perceptions of their opportunities in Mexico and the United States. Looking at Mexico-U.S. migration during the last half century, On the Move uncovers the vast mechanisms underlying the flow of people moving between nations.

Cultures of Migration Jeffrey H. Cohen,Ibrahim Sirkeci,2011-09-01 Around the globe, people leave their homes to better themselves, to satisfy needs, and to care for their families. They also migrate to escape undesirable conditions, ranging from a lack of economic opportunities to violent conflicts at home or in the community. Most studies of migration have analyzed the topic at either the macro level of national and global economic and political forces, or the micro level of the psychology of individual migrants. Few studies have examined the culture of migration—that is, the cultural beliefs and social patterns that influence people to move. Cultures of Migration combines anthropological and geographical sensibilities, as well as sociological and economic models, to explore the household-level decision-making process that prompts migration. The authors draw their examples not only from their previous studies of Mexican Oaxacans and Turkish Kurds but also from migrants from Europe, sub-Saharan Africa, the Pacific, and many parts of Asia. They examine social, economic, and political factors that can induce a household to decide to send members abroad, along with the cultural beliefs and traditions that can limit migration. The authors look at both transnational and internal migrations, and at shorter- and longer-term stays in the receiving location. They also consider the effect that migration has on those who remain behind. The authors' culture of migration model adds an important new dimension to our understanding of the cultural beliefs and social patterns associated with migration and will help specialists better respond to increasing human mobility.

The Promised Land Nicholas Lemann,1992-03-31 A New York Times bestseller, the groundbreaking authoritative history of the migration of African-Americans from the rural South to the urban North. A definitive book on American history, The Promised Land is also essential reading for educators and policymakers at both national and local levels.

Why Do People Migrate? Maciej Duszczyk,2019-09-16 By looking at case studies from around Europe, this book focuses the impact of the expected labour market security on migration decision-making and will prove invaluable for researchers, leaders and policy makers in the field of politics and migration studies.

Migration in World History Patrick Manning,2005 This fascinating study traces the connections among regions brought about by the movement of people, diseases, crops, technology and ideas. Drawing on examples from a wide range of geographical regions and thematic areas, Manning covers: * earliest human migrations, including the earliest hominids, their development and spread, and the controversy surrounding the rise of homo sapiens * the rise and spread of major language groups * examination of civilizations, farmers and pastoralists from 3000 BCE to 500 CE * trade patterns including the early Silk Road and maritime trade in the Mediterranean and Indian Ocean * the effect of migration on empire and industry between 1700 and 1900 * the resurgence of migration in the later twentieth century, including movement to cities, refugees and diasporas.

Migration of Rich Immigrants Alex Vailati,Carmen Rial,2016-01-26 Migration of Rich Immigrants addresses flows of emigrants who establish themselves in other countries temporarily or permanently, in favorable economic conditions. Vailati and Rial explore these migratory paths and analyze how gender, class, age, sexual orientation and ethnicity influence these processes.

World Migration Report 2020 United Nations,2019-11-27 Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

Les Mbengis - Migration, Gender, and Family Christina Atekmangoh,2017-07-19 This book is about transnational migration (familiarily called bushfalling) and remittance flows to Cameroon. With the current dire economic state, Cameroonians increasingly aspire to go abroad to make a living. Migrants achieve this through a collective (family) strategy and with the help of migration brokers. Relations between migrants and the family that stays in Cameroon can be characterized as follows: Families raise and educate their children to become adults. In return to giving their children the gift of life, families expect reciprocity, best secured through economic success abroad and the sending of remittances by migrants. As families in Cameroon heavily contribute to the funding of migration trajectories, often by selling properties such as land or houses or borrowing money, they also expect a return on their investments. All that constitutes this study explores under the notion of the moral economy of transnational remittances. In this study, remittances are understood to be a composite of financial, material, and cultural flowsmaintaining and transforming social and kinship ties. The book proposes also a large exploration of themes in relation to transnational migration: why and how Cameroonians migrate (the role of the operational family in terms of decision and funding; the role of migration brokers through the identification of lines and the provision of the necessary papers); the moral justification for migration; the ways social relations and customs are changed by status gained through migration; the ways people explain the failure of migration projects, the difficulties to stay abroad; the matrimonial strategies to go and stay abroad. This is an empirically rich and theoretically sophisticated study that takes thinking on transnational migration informed by African strategies and experiences a step further.

Caribbean Migration Elizabeth M. Thomas-Hope, 2002 Originally published in 1992, this text considers out-migration from the Caribbean in an analytical manner. Its comparative approach, involving three islands (Jamaica, Barbados and St Vincent) and the range of micro-environments within those islands, is based on data from extensive surveys and in-depth interviews. Analysis of the migration process reflects the perspective of Caribbean potential migrants themselves.

Mobility Patterns and Experiences of the Middle Classes in a Globalizing Age Monica Laura Vazquez Maggio, 2017-05-11 The book presents insights from a mixed methodology study that examines recent mobility patterns exhibited by the middle classes. Its major contributions are two-fold: theoretically, it advances the conceptualisation of middle class migration; empirically, it analyses the migratory motivations of a relatively new Latin-American group in Australia. The accelerated insertion of the Mexican society into globalisation processes is strongly linked not only to the growing participation in migration phenomena but also to people's outflow to new destinations. Although studies of Mexican emigration are vast, research on Mexican skilled migration is scarce, and research that focuses on mobility to non-USA destinations is even scarcer. Mexicans are a relatively new addition to Australia's multicultural society, and little is known about this group's profile and why they choose to migrate to Australia. Employing a mixed methodology approach, the book provides a comprehensive portrait of migration in a new group.

Everyday Ruptures Cati Coe, Deborah A. Boehm, Heather Rae-Espinoza, Julia Meredith Hess, Rachel R. Reynolds, 2011 Explores the effects of migration on the children affected by migration, as well as child migrants themselves. Simultaneous.

Child Migration in Africa Iman Hashim, Doctor Dorte Thorsen, 2011-02-10 Child Migration in Africa explores the mobility of children without their parents within West Africa. Drawing on the experiences of children from rural Burkina Faso and Ghana, the book provides rich material on the circumstances of children's voluntary migration and their experiences of it. Their accounts challenge the normative ideals of what a 'good' childhood is, which often underlie public debates about children's migration, education and work in developing countries. The comparative study of Burkina Faso and Ghana highlights that social networks operate in ways that can be both enabling and constraining for young migrants, as can cultural views on age- and gender-appropriate behaviour. The book questions easily made assumptions regarding children's experiences when migrating independently of their parents and contributes to analytical and cross-cultural understandings of childhood. Part of the groundbreaking Africa Now series, Child Migration in Africa is an important and timely contribution to an under-researched area.

Animals Migrating Etta Kaner, 2005 Discusses why animals migrate to find food or raise their young.

The Culture of Migration in Southern Mexico Jeffrey H. Cohen, 2004-12 Publisher Description

The Cambridge Survey of World Migration Robin Cohen, 1995-11-02 This extensive survey of migration in the modern world begins in the sixteenth century with the establishment of European colonies overseas, and covers the history of migration to the late twentieth century, when global communications and transport systems stimulated immense and complex flows of labour migrants and skilled professionals. In ninety-five contributions, leading scholars from twenty-seven different countries consider a wide variety of issues including migration patterns, the flights of refugees and illegal migration. Each entry is a substantive essay, supported by up-to-date bibliographies, tables, plates, maps and figures. As the most wide-ranging coverage of migration in a single volume, The Cambridge Survey of World Migration will be an indispensable reference tool for scholars and students in the field.

The Global Horizon Knut Graw, Joska Samuli Schielke, 2012 Although contemporary migration in and from Africa can be understood as a continuation of earlier forms of interregional and international migration, current processes of migration seem to have taken on a new quality. This volume argues that one of the main reasons for this is the fact that local worlds are increasingly measured against a set of possibilities whose referents are global, not local. Due to this globalization of the personal and societal horizons of possibilities in Africa and elsewhere, in many contexts migration gains an almost inevitable attraction while, at the same time, actual migration becomes increasingly restricted. Based on detailed ethnographic accounts, the contributors to this volume focus on the imaginations, expectations, and motivations that propel the pursuit of migration. Decentering the focus of much of migration studies on the receiving societies, the volume foregrounds the subjective aspect of migration and explores the impact which the imagination and practice of migration have on the sociocultural conditions of the various local settings concerned.

People in motion, forests in transition: Trends in migration, urbanization, and remittances and their effects on tropical forests Susanna Hecht, Anastasia Lucy Yang, Bimbika Sijapati Basnett, Christine Padoch, Nancy L Peluso, 2015-11-08 Migration is not new. In recent decades however, human mobility has increased in numbers and scope and has helped fuel a global shift in the human population from predominantly rural to urban. Migration overall is a livelihood, investment and resilience strategy. It is affected by changes across multiple sectors and at varying scales and is affected by macro policies, transnational networks, regional conditions, local demands, political and social relations, household options and individual desires. Such enhanced mobility, changes in populations and communities in both sending and receiving areas, and the remittances that mobility generates, are key elements of current transitions that have both direct and indirect consequences for forests. Because migration processes engage with rural populations and spaces in the tropics, they inevitably affect forest resources through changes in use and management. Yet links between forests and migration have been overlooked too often in the literature on migration as well as in discussions about forest-based livelihoods. With a focus on landscapes that include tropical forests, this paper explores trends and diversities in the ways in which migration, urbanization and personal remittances affect rural livelihoods and forests.

Global Migration and Development Ton van Naerssen, Ernst Spaan, Annelies Zoomers, 2008-02-13 The debate on international migration and development currently focuses on South-North migration, transnationalism, remittances and knowledge transfer. The potential positive role of migration for countries and regions the emigrants originate from has recently been acknowledged by, among others, the World Bank, United Nations Commissions and the International Organisation for Migration (IOM). This volume addresses the question: to what extent and under what conditions does international migration contribute to local and national development? By presenting novel insights and themes on the basis of new empirical evidence from various countries, this volume is an indispensable addition to the international discussion on migration.
